

## Quick Start Guide

MCIMX93-EVKPF09

i.MX 93 applications processor

# i.MX 93 EVKPF09 applications processor QSG

## **About the i.MX 93 EVKPF09**

The i.MX 93 applications processor is the latest member of the i.MX 9 family. It excels in machine learning, vision, advanced multimedia and industrial IoT applications. Elevating edge intelligence, i.MX 93 processors are the solid foundation for products built for smart homes, smart cities, and industrial applications.

# Features

## SOM Module

- i.MX 93 applications processor with:
  - 2x Arm® Cortex®-A55
  - 1x Arm® Cortex®-M33
  - 0.5 TOPS NPU
- LPDDR4X 16-bit 2GB
- eMMC 5.1, 32GB
- Power Management IC (PMIC)
- Power Measurement ADC

## Base Board

- MicroSD 3.0 card slot
- Two USB 2.0 C connector
- One USB 2.0 C for Debug
- One USB C PD only
- M.2 Key-E for Wi-Fi/BT/802.15.4
- One MIPI-CSI connector
- One CAN port

- Four channels for ADC
- 6-axis IMU w/ I3C support
- I2C Expansion connector
- Two 1 Gbps Ethernet
  - Port1 supports TSN
  - Port2 supports ETER
- Multiple display interface:
  - MIPI-DSI connector
  - 1x4 data lane LVDS w/ Backlight
- Audio Codec Support
- PDM MIC array support
- External RTC w/ coin cell
- 2X20 Pin Expansion I/O

## Getting started

### Unpack the Kit

The MCIMX93-EVKPF09 is shipped with the items listed in Table 1.

**Table 1 — Kit Contents**

| Item             | Description                                             |
|------------------|---------------------------------------------------------|
| MCIMX93-EVKPF09  | i.MX 93 11X11 EVKPF09 board                             |
| Power Supply     | USB C PD 45W, 5V/3A; 9V/3A; 15V/3A; 20V/2.25A supported |
| USB Type-C Cable | USB 2.0 C Male to USB 2.0 A Male                        |
| Software         | Linux BSP image programmed in eMMC                      |
| Documentation    | Quick Start Guide                                       |
| M.2 Module       | PN: LBES5PL2EL; Wi-Fi 6 / BT 5.2 / 802.15.4 support     |

### Prepare Accessories

The following items in Table 2 are recommended to run the MCIMX93-EVKPF09.

**Table 2 — Customer Supplied Accessories**

| Item          | Description                                                           |
|---------------|-----------------------------------------------------------------------|
| IMX-MIPI-HDMI | MIPI-DSI to HDMI adapter board                                        |
| LVDS LCD      | 12.1" TFT LCD, 1280x800 RGB                                           |
| RPI-CAM-MIPI  | IAS camera to 22 Pin / 0.5mm pitch FPC camera adapter (AR0144 sensor) |
| Audio HAT     | Audio expansion board with most of audio features                     |

## Getting started Continued

### Download Software and Tools

Installation software and documentation are available at [www.nxp.com/imx93](http://www.nxp.com/imx93).  
The following are available on the website:

**Table 3 — Software and Tools**

| Item                 | Description                                                                                                                                                                |

| Software Development | Linux BSPs                                                                                                                                                                 |
| Demo Images          | Copy of the latest Linux® images that are available to program on to the eMMC<br>MCIMX93-EVKPF09 software can be found at <a href="http://nxp.com/imxsw">nxp.com/imxsw</a> |

## Setting up the system

The following will describe how to run the pre-loaded Linux image on the MCIMX93-EVKPF09 (i.MX 93).

### 1 Confirm Boot Switches

The boot switches should be set to boot from “eMMC”, SW1301[1-4] (Figure 1) are used for boot, See table below:

| BOOT Device | SW1301[1-4] |
|-------------|-------------|
| eMMC/uSDHC1 | 0000        |

### 2 Connect USB Debug Cable

Connect the UART cable into the port JPI401 (Figure 1). Connect the other end of the cable to a PC acting as a host terminal. UART connections will appear on the PC, this will be used as A55 and M33 core system debugging.

Open the terminal window (i.e., Hyper Terminal or Tera Term), choose the

right COM port number and apply the following configuration.

- Baud rate: 115200bps
- Data bits: 8
- Parity: None
- Stop bits: 1

### 3 Connect LVDS panel Display

Connect an LVDS panel with J702 2x20 PIN header through cable. Make sure jumpers on J703 (P2-P3) and J704 (P2-P1) have been installed.

### 4 Connect Mouse

Connect the mouse to the USB2 C port connector J302 through USB C OTG cable.

## Setting up the system Continued

### 5 Connect Power Supply

Connect the USB C PD power supply to J301, then power up the board by SW301 switch.

### 6 Board Boot Up

As the board boots up, you will see 4 penguins appear in the upper left-hand corner of the monitor, and then you will see the Linux terminal icon on the top left and timer on right top corner. Congratulations, you are up and running.

Run “NXP Demo Experience” application to explore the preinstalled demos. The NXP Logo is displayed on the top left-hand corner of screen, start the demo launcher by clicking this logo. Refer to user guide for details — <https://www.nxp.com/docs/en/user-guide/DEXPUG.pdf>.

## Additional information

### Boot Switches

SW1301[1-4] is the boot configuration switch, the default boot device is eMMC/uSDHC1, as shown in Table 4. If you want to try other boot devices, you need to change the boot switches to corresponding values as listed in Table 4.

Note: 1 = ON 0 = OFF

**Table 4 — boot device settings**

| Boot mode                   | Boot core  | SW1301-4 | SW1301-3 | SW1301-2 | SW1301-1 |
|-----------------------------|------------|----------|----------|----------|----------|
| From internal fuses         | Cortex-A55 | 0        | 0        | 0        | 1        |
| Serial downloader           | Cortex-A55 | 0        | 0        | 1        | 1        |
| USDHC1 8-bit eMMC 5.1       | Cortex-A55 | 0        | 0        | 0        | 0        |
| USDHC2 4-bit SD3.0          | Cortex-A55 | 0        | 0        | 1        | 0        |
| FlexSPI serial NOR          | Cortex-A55 | 0        | 1        | 0        | 1        |
| FlexSPI serial NAND 2K page | Cortex-A55 | 0        | 1        | 1        | 1        |
| Infinite loop               | Cortex-A55 | 0        | 1        | 0        | 0        |
| Test Mode                   | Cortex-A55 | 0        | 1        | 1        | 0        |
| From internal fuses         | Cortex-M33 | 1        | 0        | 0        | 1        |
| Serial downloader           | Cortex-M33 | 1        | 0        | 1        | 1        |

| Infinite loop               | Cortex-M33 | 1        | 1        | 0        | 0        |
| Test mode                   | Cortex-M33 | 1        | 1        | 1        | 0        |

## Additional information

### Do more with Accessory Boards

LVDS LCD: DY1212W-4856

12.1" (WXGA) TFT LCD (BOE EV121WXM-N10-1850)  
1280\*800 RGB with Capacitive Touch Panel (CTP)

IMX-MIPI-HDMI

MIPI DSI output to HDMI adapter board

Audio Board: MX93AUD-HAT

Audio expansion board with  
most of audio features

WiFi/BT M.2 Module (LBES5PL2EL)

Wi-Fi 6, IEEE 802.11a/b/g/n/ac + Bluetooth  
5.2 BR/EDR/LE, NXP IW612 chipset

## Additional information Continued

### RPi-CAM-MIPI

IAS camera to 22 Pin / 0.5mm pitch FPC camera adapter (AR0144 sensor)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
  - (2) This device must accept any interference received, including interference that may cause undesired operation.
- Attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.

The following information is provided per Article 10.8 of the Radio Equipment Directive 2014/53/EU:

- (a) Frequency bands in which the equipment operates.
- (b) The maximum RF power transmitted.

| PN       | RF technology              | (a) Frequency ranges (EU) | (b) Max transmitted power |
|----------|----------------------------|---------------------------|---------------------------|
| EAR00409 | Bluetooth BR/EDR/LE        | 2400 MHz – 2484 MHz       | 2.6 dBm                   |
| EAR00409 | Wi-Fi IEEE 802.11b/g/n     | 2400 MHz – 2484 MHz       | 2.6 dBm                   |
| EAR00409 | Wi-Fi IEEE 802.11a/n/ac/ax | 5150 MHz – 5850 MHz       | 3.64 dBm                  |

EUROPEAN DECLARATION OF CONFORMITY (Simplified DoC per Article 10.9 of the Radio Equipment Directive 2014/53/EU)

This apparatus, namely 8MNANOLPD4-EVK, conforms to the Radio Equipment Directive 2014/53/EU.

The full EU Declaration of Conformity for this apparatus can be found at this location: [www.nxp.com/i.MX8MNANO](http://www.nxp.com/i.MX8MNANO)
