SAFETY TIPS:

- Position products while engine is off and vehicle is stopped.
- Ensure all people and pets are standing clear of vehicle prior to moving onto stack of Lynx Levelers®
- Never crawl under vehicle when Lynx Levelers® are in use.
- We recommend when using Lynx products to not combine with other materials such as rocks, wood, glass, cement, or any other products that are not from the Lynx product line up.

TANDEM AXLE RVs:

1. **SELECT** a suitable flat parking area. Park your RV in the exact position it will be once it's level. Remove any large stones or debris that will be directly under Lynx Levelers®.
2. **TURN** off engine and set parking brake.
3. **DETERMINE** which wheels need to be raised.
4. **STACK** your Lynx Levelers® directly next to the tires that you need to raise. Make two pyramids rather than one big stack so you have lots of Lynx Levelers® left over for stabilizing.
5. **PULL** your rig forward so the back tire is just ahead of your front pyramid.
6. **SLIDE** your leveler pyramids forward so they're in line with the tires.

7. **NOW** roll 'er back. Note that it'll feel a bit bumpy before you're sitting pretty on your stacks.

If you're using a Lynx Stop 'N Chock® it will stop you in your tracks so you'll know for sure when you're perched perfectly. But please, for safety's sake, go slow when you're backing up.

SINGLE AXLE RVs:

FOLLOW the same steps on the previous pages but instead of two pyramids, only build one.

DUAL WHEEL RVs:

FOLLOW the same steps on the previous pages but instead of two pyramids back-to-back you're stacking them side-by-side. Note: we recommend both wheels have their own pyramid.

STABILIZING:

1. **ENSURE** your RV is leveled and secure.
2. **PLACE** your stack of Lynx Levelers® right underneath your landing gear
3. **LOWER** your landing gear until it is firmly pressing against your Lynx Levelers®.

PRO TIP:

Use a Lynx Cap® leveler top for a smooth flat surface on the top of the stack.

One block will raise your RV 1.5 inches, but when interlocking another leveling block to the stack or pyramid it will add 1 more inch. We recommend not stacking your levelers higher than 5 blocks (5.5 inches).

WARRANTY REGISTRATION

Warranty Registration is available online at trilynx.com

All Lynx Levelers® and stabilizing products must be registered online at trilynx.com within 21 days of purchase to validate any claim.

Please refer to trilynx.com for all product warranty details.

LYNX LINE-UP

LYNX LEVELERS®

The **ORIGINAL** RV leveling system since 1992.

Lynx Levelers® leveling blocks are designed to withstand tremendous weight for most leveling or stabilizing functions.

LYNX STOP 'N CHOCK®

Lynx Stop 'N Chock® wheel chock is designed to interlock with Lynx Levelers leveling blocks as a self-positioning wheel guide, and as a stabilizing wheel chock.

LYNX LINE-UP

LYNX CHOCK 'R DOCK™

Lynx Chock 'R Dock™ wheel chock will never sit idle. The two-in-one accessory adds safety and stability to your rig using it as a wheel chock or a tongue dock.

LYNXCAP®

LynxCap® Leveler Tops are designed to give your pyramid or stack of Lynx Levelers® a flat top for easier stabilization and leveling.

LYNX LIL' CHOCK™

Lynx Lil' Chock™ is a small but mighty chock made from the same material and design as our other wheel chocks.

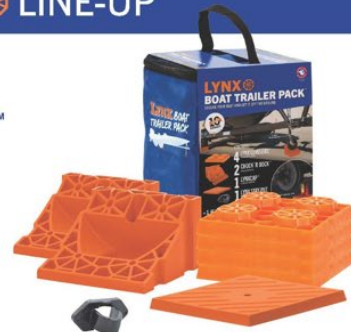

LYNX LINE-UP
