

Installation Instructions

Installation Steps

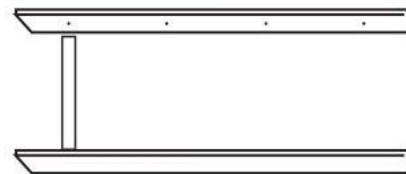

Step 1

Unfold the hinges on the legs of the ladder and lay them flat on the floor.

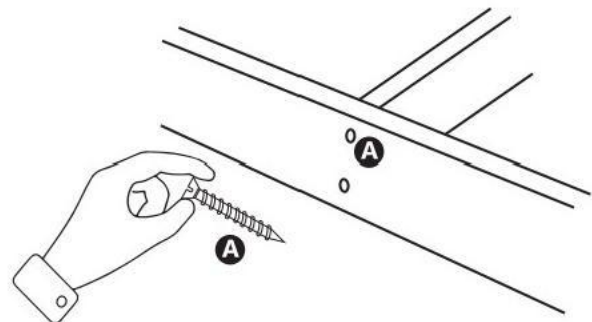

Step 2

Insert the cross beam between the two ladder legs, align the screw holes of the ladder legs and the cross beam, and lock them with long screws.

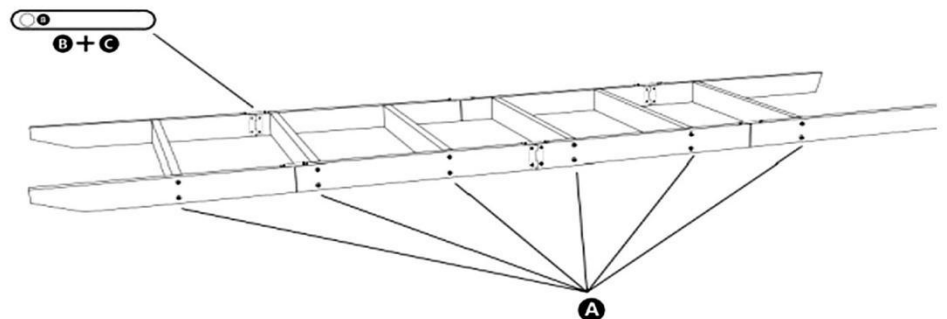

Step 3

Repeat Step 3 to install the second cross beam, being careful not to overtighten the screw.

Parts List

1. Long screws* 25
2. Screwdriver * 1

Solution to the problem of tilting the blanket ladder: Check whether the screws are tightened and whether the holes in the board are aligned. Note: The larger holes in the board face outwards and the smaller holes face inward. Watch our installation video to make assembly easier for you!
