

devolo presents WiFi 6 Stick nano for laptops and PCs

Aachen, Germany, 24 June 2025 – The Aachen-based network experts at devolo have created the new devolo WiFi 6 Stick nano to accelerate Wi-Fi on older computers at a reasonable price.

The topics of this press release:

- **Wi-Fi 6 for everyone**
- **devolo Wi-Fi 6 Stick nano**
- **The custom-fit upgrade**
- **Price and availability**

Wi-Fi 6 for everyone

When we think about upgrading computers, we tend to think about replacing graphics cards, inserting additional hard drives or brushing heat-conducting paste onto a new CPU. But how do you upgrade or retrofit Wi-Fi connections? With the new devolo WiFi 6 Stick nano, it's really easy! The USB adapter makes any Windows or Linux-based PC or laptop fit for the Wi-Fi 6 standard. And it does this even for devices which never supported Wi-Fi before.

devolo Wi-Fi 6 Stick nano

The devolo WiFi 6 Stick nano is particularly compact and reminiscent of typical USB dongles, such as those used for wireless mice. It is ideal for laptops because it almost completely disappears in a free USB port, which enables safe transport. The devolo WiFi 6 Stick nano supports the current IEEE 802.11ax standard, is backwards compatible with Wi-Fi and offers transfer rates of up to 1800 Mbps.

The custom-fit upgrade

By using strong technology for fast speeds and state-of-the-art security, the devolo stick brings up-to-date Wi-Fi to older devices. No matter whether it's a laptop with an outdated Wi-Fi port or desktop computer that is only made to communicate via Ethernet – simply plug in the stick, install the driver and then you can stream, work and play wirelessly. The devolo WiFi 6 Stick nano supports Windows 10/11 and brings along a driver for Linux systems as well.

Price and availability

The devolo WiFi 6 Stick nano is now available for EUR 46.90. The price is a recommended retail price including value-added tax. devolo grants a three-year manufacturer's warranty.
