

Villo

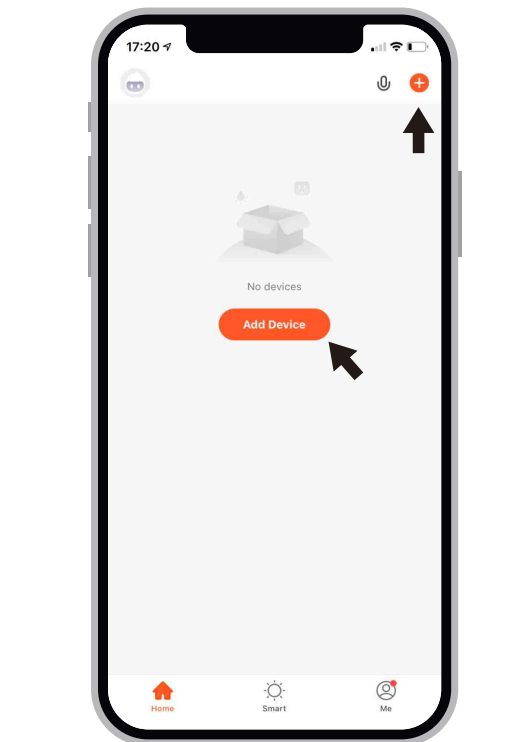

Model:J300

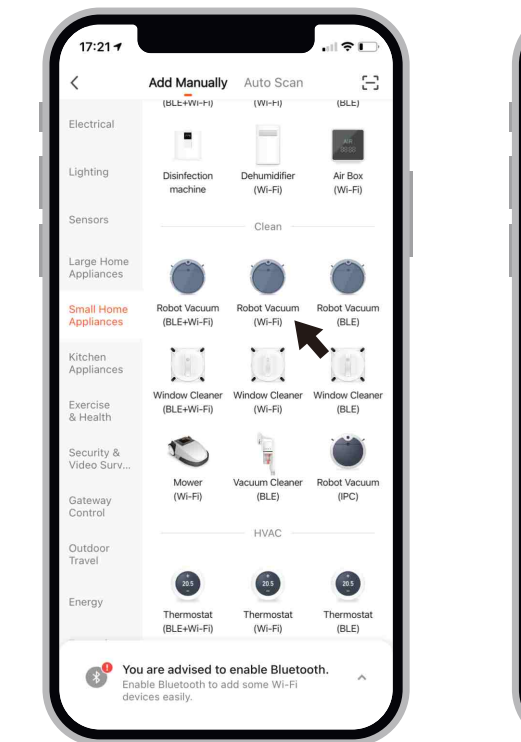

1. Search and download Tuya Smart App from Google Play or Apple APP Store. Or Scan the QR code aside.

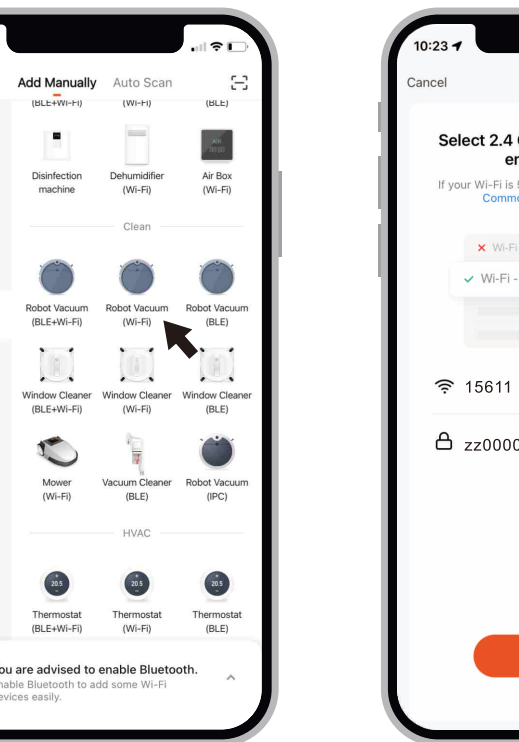

2. For new users, please register a new user account. For existing users, just log in the Tuya Smart App.

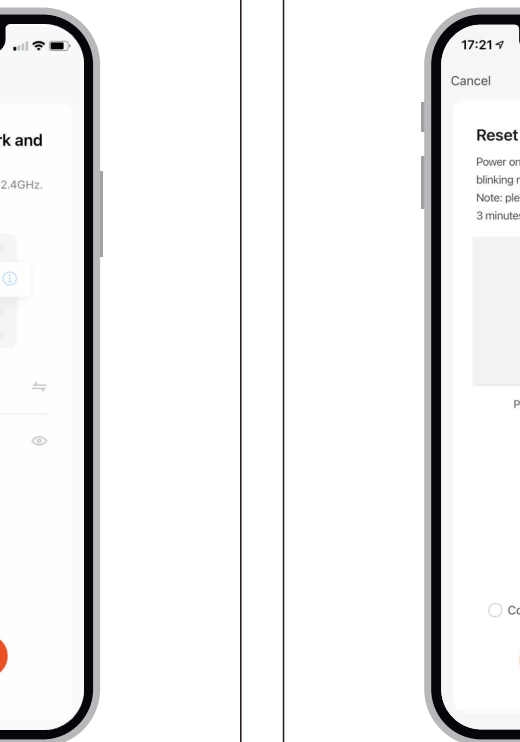

3. Please ensure the robot is in standby mode before connection. If not, please hold both the Home Button and ON/OFF Button for 3 seconds until the robot indicator light starts flashing and broadcast voice prompt: Wi-Fi lost, please follow the App instruction for reconnection. Ensure your phone and robot are connect with the same Wi-Fi Network.

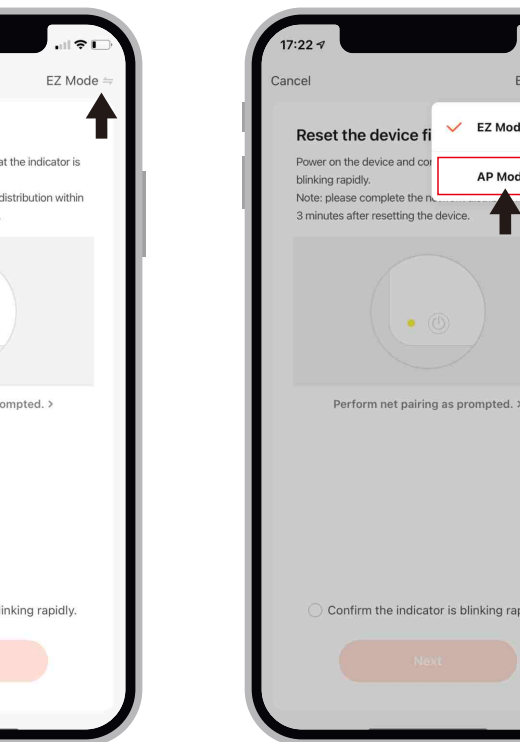

4. Click 'Add Device' or '+'.

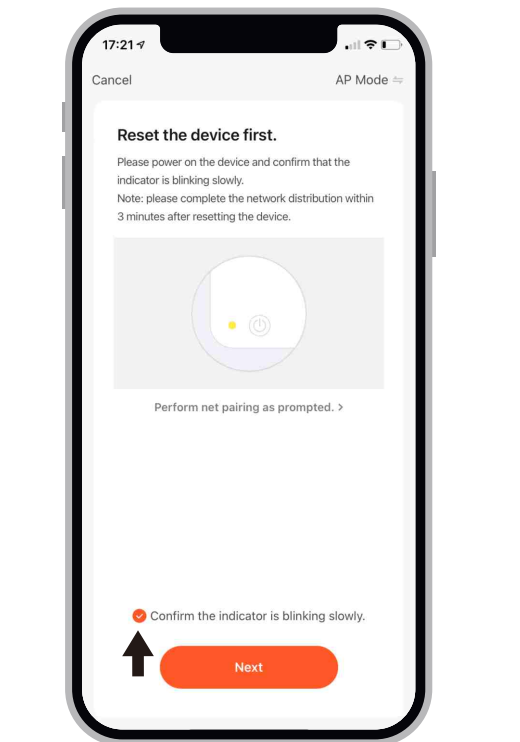

5. Select Small Home Appliance Category, and choose Robot Vacuum (Wi-Fi).

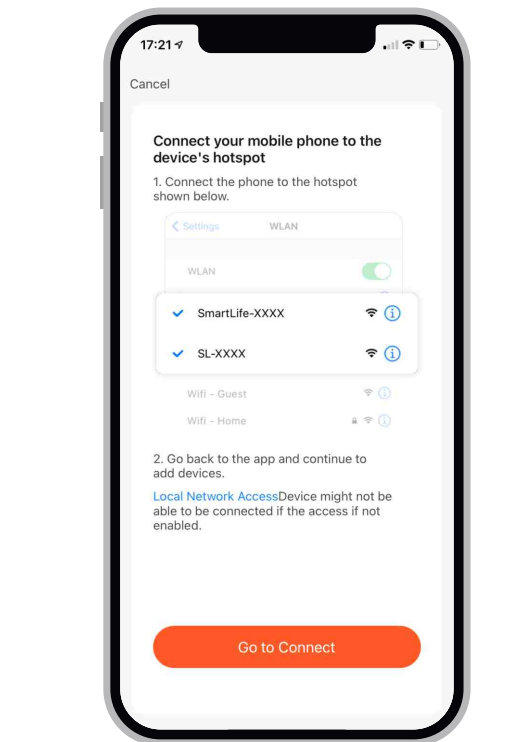

6. Log in your Wi-Fi network. Notice: the robot can only work with 2.4GHz Wi-Fi. If your Wi-Fi is 5GHz, please follow the Router Setting Instruction on APP and set it to 2.4GHz.

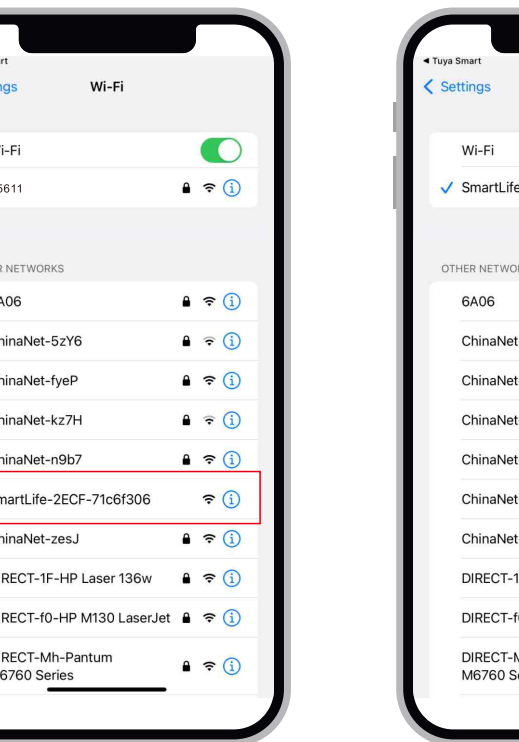

7. The App default connection mode is EZ mode, please switch it to AP Mode.

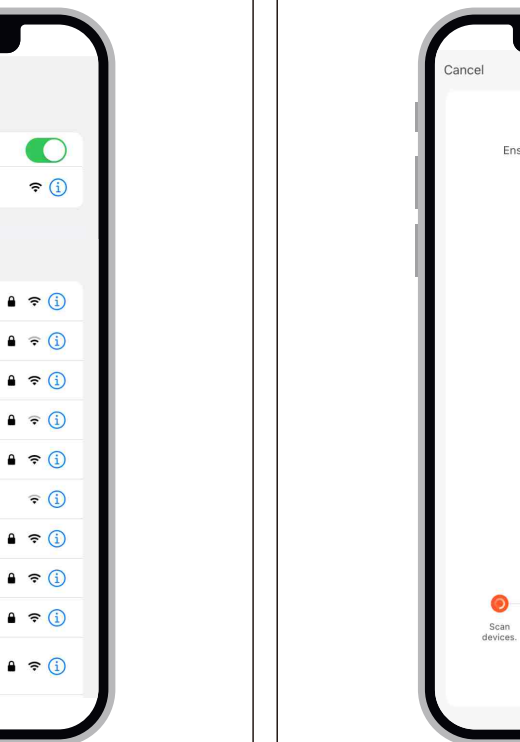

8. Ensure the Wi-Fi indicator light on the robot is flashing slowly, and confirm it on your phone.

9. Select 'Go to Connect'.

10. Find Wi-Fi Network named 'SmartLife-XXXX', no password needed.

11. The Robot will connect with your phone within 2 minutes. If not, please try again or contact our customer service team (support@imartine.com).
