#### Product Description

The Aputure Mount Light Dome 150 is a large soft light modifier designed specifically for Aputure fixtures with an Aputure Mount, including the STORM XT52, Electro Storm XT26, and Electro Storm CS15. Featuring the new Aputure Smart Mount system, this dome brings the same reliability and diffusion quality as the original Light Dome 150, now optimized for our highest-output LED fixtures. Its wide 150cm diameter delivers ultra-soft, even illumination. The Aputure Smart Mount ensures secure, tool-free attachment and compatibility with Aputure's high-output professional fixtures.

### Product Description

The Aputure Mount Lantern 120 is a versatile omnidirectional soft light modifier engineered for Aputure's high-output Aputure Mount fixtures, including the STORM XT52, Electro Storm XT26, and Electro Storm CS15 fixtures. Featuring a large 120cm diameter and the new Aputure Smart Mount system, this lantern builds on the popular Bowens mount Lantern 90, delivering broader, softer illumination ideal for lighting entire spaces or creating natural ambient light. Its durable construction, fast setup, and seamless compatibility with Aputure's latest high-output professional fixtures make it an essential tool for filmmakers and lighting technicians seeking consistent soft lighting at scale.

## STORM XT52 ACCESSORIES

### DATA BOOK

## STORM XT52 Skid

### Product Description

The STORM XT52 Skid is a stainless-steel skid attachment that secures to the bottom of the STORM XT52. It enables users to safely place their fixture flat on the ground without the risk of the fixture tipping over, even with a CF16 Fresnel attached to the front of the light. This skid features a cutout at the rear which allows for clearance of the STORM XT52's head cable when users are tilting the fixture up and down on a stand. With this Skid mounted, the STORM XT52 with its head cable, a CF16 Fresnel, and CF16 Barn Doors attached can sit safely on a head cart or shelf.
