Instructions for use

Bluetooth mode

1. Bluetooth connection: The default setting is Bluetooth mode when the speaker is turned on. And you also can press "M" to switch to Bluetooth mode. Turn on your phone's Bluetooth and search for "D26-T" to pair. When Bluetooth pairing is successful, it will indicate "Bluetooth connected".
2. Play music: Turn on your phone or other devices, download and play your favorite songs downloaded on your phone or devices.
3. After connecting the machine to the phone once, Bluetooth has a memory function, which can be automatically or manually connected after turning on. If you need to disconnect, you can disconnect it through the Bluetooth device of the phone.

TF card mode

Insert the TF card port, and the machine will automatically perform a priority playback with a prompt sound. When TF card is inserted, you can switch other modes by briefly pressing the "MODE" button.

Indicator status

Charging indication: The charging indicator light is always on red when charging, and off when fully charged.

Microphone charging indication: The charging indicator light is always on red when charging, and off when fully charged.

Music Lamp Description

Our product has six kinds of music light modes, respectively, colorful circling light effects, gradient breathing effects (red, blue and green alternating gradient breathing), red breathing effects, blue breathing effects, green breathing effects, turn off the light effect: long press the "M" button to switch a light effect.

Wireless microphone

Turn on the speaker and microphone simultaneously, and the 2.4G wireless signal is automatically paired. At this time, you can start singing, and also adjust your preferred style according to your preferences.
