General

The F1943L-3P (19B16) is a wired touch screen programmable local controller for VRF Heat Recovery and Heat Pump indoor units capable of Wi-Fi control via a mobile application.

This controller and app should be used only as described in this manual.

⚠ WARNING

Improper installation, adjustment, alteration, service or maintenance can cause property damage, personal injury or loss of life. Installation and service must be performed by a licensed professional HVAC installer (or equivalent) or service agency.

⚠ IMPORTANT

Frequent changes to operating mode may cause system malfunction. Allow at least one minute between mode changes to allow the system to stabilize.

This manual must be left with the owner for future reference.

Scan this QR code to download the Lennox VRF Wi-Fi Controller App from the Apple App Store or the Google Play store. The app provides control of the VRF Wi-Fi Controller.

My VRF Controller App Operation

Easy to use interface allows monitoring and control of the VRF system from a mobile device.

Download the VRF Controller app from Google Play Store or Apple App store as appropriate for your device.

Create an Account

The first time you use the app, you will need to create a user account.

1. Enter your email address.
2. Enter your password.
Password Requirements:
 - 1) Must be at least 8 characters but fewer than 99 characters.
 - 2) Must include a number.
 - 3) Must include a special character.
 - 4) Must include uppercase and lowercase letters.
3. Tap the Sign Up button.

The screenshot displays the 'Create An Account' interface. At the top, the status bar shows 'Carrier', signal strength, '2:13 PM', and battery level. The title 'Create An Account' is centered. Below it, there are two input fields: 'Email' and 'Password'. The 'Password' field has a 'Show' toggle to its right. A blue 'Sign Up' button is positioned below the password field, and a 'Cancel' link is at the bottom.

Figure 1. Create an Account

The app will email you a confirmation code. Enter that code and tap Confirm.

A screenshot of a mobile application interface for confirming a new account. The screen is titled "Confirm Code" at the top center. Below the title is a light gray rectangular input field with the placeholder text "Email". Underneath the input field is a prominent blue button with the text "Confirm" in white. At the bottom of the screen, there are two links: "Cancel" on the left and "Resend Code" on the right, both in a light blue color. The top of the screen shows a status bar with "Carrier", a Wi-Fi icon, the time "2:13 PM", and a battery icon.

Figure 2. New Account Confirmation Code

Next prepare the F1943L-3P controller for connecting to the device.

Go to the wired controller.

1. Touch the Mode in the top-right corner of the screen.

Figure 3. Touch the Mode

2. Tap Settings.

Figure 4. Tap Settings

3. Tap the Connect button under the new network's name.

Figure 5. Tap Connect

The controller will reboot into Bluetooth mode to prepare for receiving the wifi credentials.

Figure 6. Controller Reboots

Now return to the app and tap Add.

Figure 7. Tap Add on App

NOTE - If prompted to allow the app to enable Bluetooth or Location Services on your device, choose Accept. The app does NOT track the user's location.

Connect a Controller to the Home Wifi

Before you can access a controller with the app, you have to connect the controller to your mobile device. This process uses secured encryption to protect your information.

- 1. Tap the Add button in the app.

Figure 8. Tap Add on App

- 2. Tap the name of the controller that you want to connect.

Figure 9. Tap Controller Name

3. Enter your home wifi's SSID and Password.
4. Tap the Complete button.

A screenshot of a mobile application interface with a dark blue background. At the top, there is a status bar with a search icon, signal strength bars, a Wi-Fi icon, the time '2:26 PM', and a battery icon at 91%. Below the status bar is a back arrow icon. The main content area features a light blue 'Scan Again' button at the top. Below it are two white input fields: 'SSID' and 'Password'. At the bottom, there are two grey buttons: 'Cancel' and 'Complete'.

Figure 10. Enter SSID and Password

5. When the Provision Successful! message displays, the process is complete. Tap the Ok button.

A screenshot of the same mobile application interface as Figure 10, but with a modal dialog box displayed in the center. The dialog box has a light purple background and contains the text 'Provision Successful!' in bold, followed by 'The device connected to the network'. At the bottom of the dialog box is a blue 'Ok' button. The background interface elements (status bar, back arrow, 'Scan Again' button, input fields, and 'Cancel/Complete' buttons) are visible but dimmed.

NOTE - If prompted to allow the app to enable Bluetooth or Location Services on your device, choose Accept. The app does NOT track the user's location.

Now you are ready to select a controller to monitor or control.

1. Tap the name of the controller from the list of devices.

Figure 12. Select Controller

Setup the App

The first time you use the app, you may want to make some settings changes.

1. Tap the Settings button to change the app settings.
2. Select whether you want the app's temperature display to be Celsius or Fahrenheit. This setting is only for the app and does not affect the controller.
3. Tap the Back button to return to the status screen.

Setup the Controller

The first time you use the controller, you will need to make some settings changes.

1. Give the controller a friendly name such as “My Room”, “Living Room” , or other.
2. Select if you want fan operation to stop when the indoor unit is satisfied or if you want the indoor unit fan to run continuously.
3. Select if an auxiliary heat device is connected to the indoor unit.
4. Select if you want the controller to display the temperature units in Celsius or Fahrenheit. This does not change the display on the app.
5. Tap the Back button to return to the status screen.
