OS Support

WinXP/Vista/Win7/Win8/Win10

How to connect the keyboard with a computer Wired Connection

1. Slide the 2.4G/OFF/BT switch on bottom of keyboard to OFF.
2. Take out the USB A to USB Type C cable in the package and connect the keyboard with your computer.
3. The computer will recognize and configure the keyboard automatically.
4. The keyboard will be ready for use when the configuration is finished.
5. Once the keyboard is powered up, charging begins. The LED marked with M light is in white.

2.4G Wireless Connection

1. Slide the 2.4G/OFF/BT switch on bottom of keyboard to 2.4G.
2. Take out the nano USB receiver and plug it into an available USB port on your computer. The computer will recognize and configure the keyboard automatically.
3. The keyboard will be ready for use when the configuration is finished.
4. In some cases, you may need to pair the keyboard. Turn on the keyboard and press [FN]+[2.4G] for about 3 seconds, the LED marked with M flashes in yellow, plug the USB receiver into any available USB port on your computer within 20 seconds. The keyboard will be paired automatically. Make sure the keyboard has enough power before doing so.
5. The indicator will flash when the battery is low. Please recharge the keyboard in time or it will turn off automatically soon.

Bluetooth Connection

1. Slide the 2.4G/OFF/BT switch on bottom of keyboard to BT.
2. Press [FN]+[BT1](or [BT2]/[BT3] for other Bluetooth devices), the LED marked with M flashes in blue (or cyan/Purple for the others)
3. Turn on Bluetooth and scan for available devices on your computer or smart phone. It will find "BT3.0KB or BT5.0 KB" device. Select it and it will connect automatically.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help
- This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
