

Installation instructions for replacing the fan house in Villa

Unplug the toilet from any power source before starting!

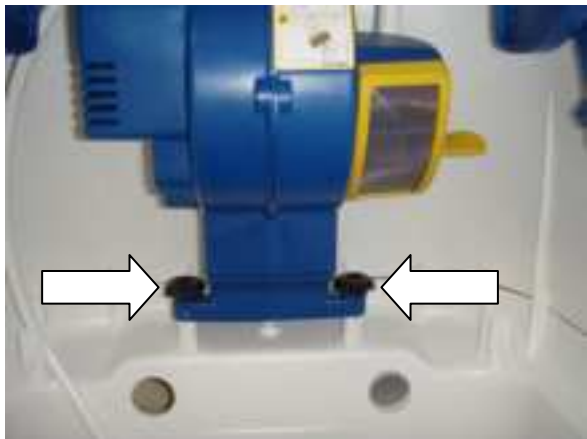

Push the plastic sleeve up through the hole as shown in the image above.

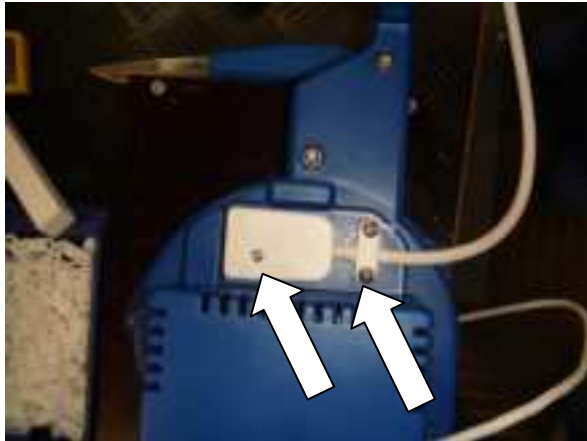

Remove the button.

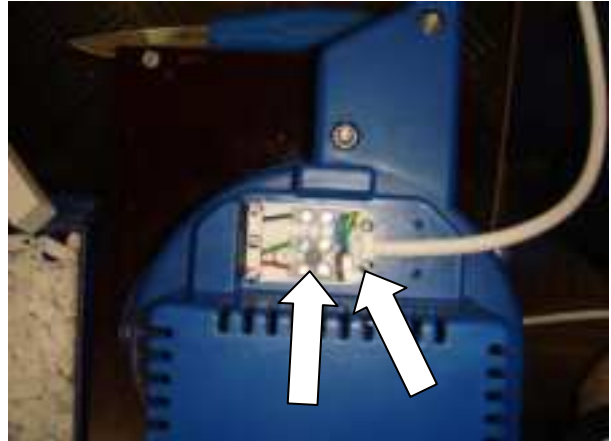

Open the plastic sleeve as shown in the images above and remove it.

Loosen the two knobs as indicated by the arrows in the image and pull out the fan housing.

Remove the cover and the connectors as indicated by the arrows in the image above.

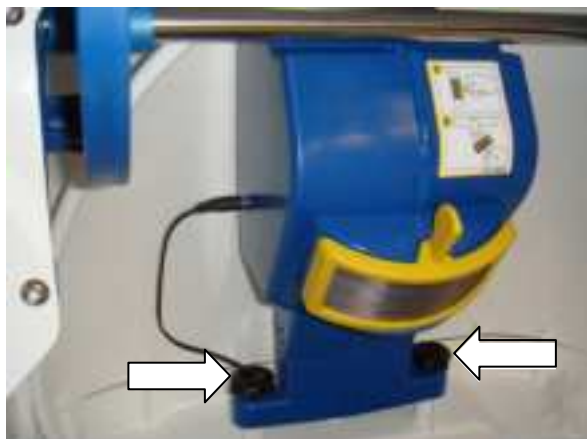

Loosen the cable as indicated by the arrows and the image above, and remove the cord.

Install the gasket in the 12 V housing as shown in the image above.

Pull the cord through the hole as shown in the image above.

Install the fan housing using the 2 knobs and also the 2 washers underneath the fan housing as shown in the image above.

Install the plastic cover plug.
