

ROSSO 60 INDUCTION HOB INSTALLATION GUIDE

INSTALLATION

After unpacking the product, check for any damage during transport. In case of problems, contact the dealer or the After-Sales Service.

For built-in dimensions and installation instruction, see in below figures

1

4

The distance between the underside of the appliance and the separator panel must respect the dimensions given in the figure (min. 50mm).

In order to ensure the correct operation of the product, do not obstruct the minimum required clearance (min. 20 mm) on the worktop for air flow out.

If an undertop oven is installed, make sure the oven is equipped with a cooling system.

Do not install the hob above a dishwasher or washing-machine, so that the electronic circuits do not come into contact with steam or moisture which could damage them.

Wiring Guide

1 x 220-240V~

32A

Device is **not** suitable for operation with an EU plug!

2 x 230V 2N~

16A
