

Lenovo ThinkAgile HX5521-C Certified Node (Xeon SP Gen 1)

Product Guide (withdrawn product)

Lenovo ThinkAgile HX Certified Nodes are designed for deploying industry-leading hyperconvergence software from Nutanix on Lenovo enterprise platforms that feature the first generation of the Intel Xeon Processor Scalable Family (Xeon SP Gen 1).

The ThinkAgile HX Certified Nodes deliver fully validated and integrated Lenovo hardware and firmware, certified and preloaded with Nutanix software. Nutanix brings the benefits of web-scale technologies to enterprise applications through enterprise storage, data protection, infrastructure resilience, management and analytics, and security.

The ThinkAgile HX5521-C is a 2U rack-mount certified node that supports one processor, up to 96 GB of 2666 MHz TruDDR4 memory, 12x or 14x SAS/SATA SFF hot-swap drive bays with an extensive choice of SATA SSDs and HDDs, and flexible network connectivity options with 1/10 GbE RJ-45, 10 GbE SFP+, and 10/25 GbE SFP28 ports.

Several common uses for the ThinkAgile HX Certified Nodes that are optimized for storage-heavy workloads include file servers, on-cluster backups, and big data.

The ThinkAgile HX5521-C Certified Node is shown in the following figure.

Figure 1. ThinkAgile HX5521-C Certified Node

Did you know?

The ThinkAgile HX Certified Nodes are built on industry-leading Lenovo ThinkSystem servers that feature enterprise-class reliability, management, and security.

The ThinkAgile HX Certified Nodes deliver fully validated and integrated hardware and firmware that is certified with Nutanix software.

Key features

The ThinkAgile HX Certified Nodes are designed for the industry's most feature-rich hyperconverged infrastructure from Nutanix. Nutanix brings the benefits of web-scale technologies to enterprise applications through enterprise storage, data protection, infrastructure resilience, management and analytics, and security.

The ThinkAgile HX Certified Nodes offer the following key features:

- Built on proven and reliable Lenovo ThinkSystem servers featuring Intel Xeon Processor Scalable Family that provide compute power for a variety of workloads and applications.
- Deliver fully validated and integrated hardware and firmware that is certified with Nutanix software.
- Preloaded with Nutanix software and ready for out-of-box deployment (software licenses are not included).
- Provide flexibility in using the existing Nutanix term-based software licenses and active support contracts or purchasing new software licenses and support contracts from Nutanix.
- Offer optional Lenovo Professional Services to get customers up and running quickly.

The Nutanix software running on the HX Certified Nodes deliver the following key features:

- A natively integrated solution for data protection and continuous availability at VM granularity that gives administrators an affordable range of options to meet the recovery point objectives (RPO) and recovery time objectives (RTO) for different applications.
- A fault resistant platform, with no single point of failure and no bottlenecks with shared-nothing architecture, where all data, metadata and services are distributed to all nodes within the cluster, that is built to detect, isolate and recover from failures anywhere in the system.
- An intuitive user-centric management experience to simplify every aspect of the IT infrastructure lifecycle and provide a single pane of glass to monitor and control Nutanix clusters, with simplified workflows and rich automation for common administrative tasks.
- Powerful security features, such as two-factor authentication and data-at-rest encryption, with a security development lifecycle that is integrated into product development to help customers meet the most stringent security requirements.

Components and connectors

The following figure shows the front view of the HX5521-C Certified Node.

Figure 2. HX5521-C front view

The front of the HX5521-C Certified Node includes the following components:

- 12x LFF SAS/SATA hot-swap drive bays
- One VGA port
- One USB 2.0 port with XClarity Controller access
- One USB 3.0 port
- A Power button
- Status LEDs

The following figure shows the rear view of the HX5521-C Certified Node with 12 drive bays.

Figure 3. HX5521-C 12-drive bay node rear view

The following figure shows the rear view of the HX5521-C Certified Node with 14 drive bays.

Figure 4. HX5521-C 14-drive bay node rear view

The rear of the HX5521-C Certified Node includes the following components:

- Three (models with 12 drive bays) or one (models with 14 drive bays) PCIe expansion slots
- Two LFF SAS/SATA hot-swap rear drive bays (models with 14 drive bays)
- One LOM card slot
- One 1 GbE port for XClarity Controller
- One VGA port
- Two USB 3.0 ports
- Two hot-swap power supplies

System specifications

The following table lists the system specifications of the ThinkAgile HX5521-C Certified Node.

Table 1. HX5521-C system specifications

Attribute	Specification
Form factor	2U Rack-mount.
Processor	One Intel Xeon Silver or Gold Gen 1 processor.
Chipset	Intel C624.
Memory	Up to 96 GB with up to 6x 16 GB TruDDR4 2666 MHz RDIMMs.
Memory protection	Error correction code (ECC), patrol scrubbing, and demand scrubbing.
Drive bays	12x or 14x 3.5-inch SAS/SATA hot-swap.
Internal storage	- Hybrid: 2 cache SSDs and from 4 to 12 capacity HDDs in increments of 2 drives. - All Flash: From 6 to 14 SSDs in increments of 2 drives.
Drive capacities	- SSDs: 12 Gbps SAS SSDs up to 3.84 GB. 6 Gbps SATA SSDs up to 3.84 TB. - HDDs: 6 Gbps NL SATA HDDs up to 10 TB. Note: All SSDs in the certified node must be of the same model and capacity. All HDDs in the certified node must be of the same type and capacity.
Storage capacity	- Hybrid: Up to 80 TB (10x 8 TB or 8x 10 TB HDDs). - All Flash: Up to 53.76 TB (14x 3.84 TB SSDs).
Storage controller	1x 430-16i HBA (12 Gbps SAS/6 Gbps SATA).
Network interfaces	2x or 4x base 1/10 GbE RJ-45 or 10 GbE SFP+ network ports. 2x optional 1/10 GbE RJ-45, 10 GbE SFP+, or 25 GbE SFP28 expansion ports. 1x RJ-45 10/100/1000 Mb Ethernet port for systems management.
Boot drive	2x 128 GB M.2 non-hot-swap SSDs (RAID-1).
I/O expansion slots	HX5521-C (12 drive bays): 4x PCIe 3.0 slots - Slot 1: PCIe 3.0 x16; full-height, half-length (not used). - Slot 3: PCIe 3.0 x8; full-height, half-length (not used). - Slot 4: PCIe 3.0 x8; low profile (for a network adapter). - Slot 7: PCIe 3.0 x8 (for an internal storage controller). HX5521-C (14 drive bays): 2x PCIe 3.0 slots - Slot 4: PCIe 3.0 x8; low profile (for a network adapter). - Slot 7: PCIe 3.0 x8 (for an internal storage controller).
Ports	- Front: 1x USB 2.0 port with XClarity Controller access, 1x USB 3.0 port, 1x VGA port. - Rear: 2x USB 3.0 ports, 1x VGA port.
Cooling	Five hot-swap system fans with N+1 redundancy.
Power supply	Two redundant hot-swap 550 W (100 - 240 V) High Efficiency Platinum power supplies.
Video	Matrox G200 with 16 MB memory integrated into the XClarity Controller. Maximum resolution is 1920x1200 at 60 Hz with 32 bits per pixel.
Hot-swap parts	SSDs and HDDs, power supplies, and fans.
Systems management	XClarity Controller (XCC) Enterprise (Pilot 4 chip), proactive platform alerts, light path diagnostics, XClarity Provisioning Manager, XClarity Administrator and XClarity Pro. XClarity Energy Manager (optional).

Attribute	Specification
Security features	Power-on password, administrator's password, secure firmware updates, Trusted Platform Module (TPM) 1.2 or 2.0 (configurable UEFI setting). Optional security bezel.
Software	Nutanix Acropolis Pro and Ultimate editions (licenses purchased separately from Nutanix).
Hypervisors	Nutanix Acropolis Hypervisor (Bundled with AOS).
Warranty and support	One- (PRC only), three-, four-, or five-year customer-replaceable unit and onsite limited warranty with selectable service levels: 9x5 coverage with next business day (NBD) parts delivered (base warranty), 9x5 coverage with NBD onsite response (Foundation Service), 24x7 coverage with 4-hour onsite response or 24-hour committed repair (select areas) (Essential Service), or 24x7 coverage with 2-hour onsite response or 6-hour committed repair (select areas) (Advanced Service). Also available are 1-year and 2-year post-warranty extensions, YourDrive YourData, and Enterprise Software Support.
Dimensions	Height: 87 mm (3.4 in.), width: 445 mm (17.5 in.), depth: 720 mm (28.3 in.)
Weight	Maximum configuration: 32 kg (70.5 lb)

Factory-integrated models

Product availability: The ThinkAgile HX5521-C Certified Nodes that use the first generation of the Intel Xeon Processor Scalable Family are withdrawn and no longer available for ordering. For currently available ThinkAgile HX Series that use the second generation of the Intel Xeon Processor Scalable Family, refer to the Lenovo ThinkAgile HX Series (Xeon SP Gen 2) product guides:
http://lenovopress.com/servers/thinkagile/hx-series#resource_type=product-guide&sort=publish_date

Factory-integrated models of the ThinkAgile HX Certified Nodes are configured by using the Lenovo Data Center Solution Configurator (DCSC):
<http://dcsc.lenovo.com>

During the configuration process, you are selecting one of the base Configure-to-Order (CTO) models first, and then you are adding components (processors, memory, drives, and network adapters) to the selected model according to the output from the Nutanix Sizer tool:
<http://services.nutanix.com/>

The following table lists the base CTO models of the ThinkAgile HX5521-C Certified Nodes.

Table 2. Base CTO models

Description	Machine Type/Model
Models with 3-year warranty (Worldwide)	
Lenovo ThinkAgile HX5521-C Certified Node 3YR	7Y90CTO5WW
Models with 1-year warranty (PRC only)	
Lenovo ThinkAgile HX5521-C Certified Node 1YR	7Z05CTO5WW

The following table lists the base chassis for the HX5521-C Certified Node.

Table 3. Base chassis

Description	Feature code
ThinkAgile HX552x-C Base	B0T7

The HX5521-C Certified Nodes ship with the following items:

- *Electronic Publications Flyer*
- 2U Tool-less Slide Rail Kit with or without 2U CMA (depending on the rack installation option selected)
- With or without two rack power cables or line cords (depending on the power cable option selection)

Memory

The ThinkAgile HX5521-C Certified Nodes support Lenovo TruDDR4 memory. TruDDR4 memory uses the highest-quality components sourced from Tier 1 DRAM suppliers and only memory that meets strict requirements is selected. It is compatibility tested and tuned to maximize performance and reliability.

The HX5521-C supports up to 12 DIMMs with one processor. A processor has six memory channels, and there are two DIMMs per channel.

The following rules apply when selecting the memory configuration:

- The certified node supports up to 96 GB with RDIMMs.
- All DIMMs in the certified node operate at the same speed up to 2666 MHz, which is determined by the maximum memory speed supported by the specific processor.
Note: Maximum memory speed can be achieved when Max performance mode is enabled in UEFI.

The following memory protection technologies are supported:

- ECC
- Patrol scrubbing
- Demand scrubbing

The following table lists the memory options that are available for selection.

Table 4. Memory selection options

Capacity	Description	Part number	Feature code	Quantity
RDIMMs - 2666 MHz				
64 GB	ThinkSystem 16GB TruDDR4 2666 MHz (2Rx8 1.2V) RDIMM	7X77A01303	AUNC	4
128 GB	ThinkSystem 16GB TruDDR4 2666 MHz (2Rx8 1.2V) RDIMM	7X77A01303	AUNC	6

Internal storage

The ThinkAgile HX5521-C Certified Node provides 12x or 14x SAS/SATA LFF hot-swap drive bays for configurable storage capacity, and it contains two internal M.2 SATA non-hot-swap SSDs configured in a RAID-1 drive group for software preload.

The following table lists the internal storage options for the HX5521-C Certified Node.

Table 5. Internal storage options

Description	Feature code	Quantity (min / max)
Backplanes		
ThinkSystem SR550/SR650 3.5" SATA/SAS 12-Bay Backplane	AUR9	1 / 1
ThinkSystem SR590/SR650 3.5" Rear HDD Kit	AURZ	0 / 1
M.2 enablement kit		
ThinkSystem M.2 with Mirroring Enablement Kit	AUMV	1 / 1

Configuration notes:

- One 12-bay SAS/SATA backplane and one M.2 with Mirroring Enablement Kit are derived by the configurator.
- If more than 12 drives are selected (SSDs for all flash configurations or a combination of HDDs and SSDs for hybrid configurations), the certified node provides 12 front and 2 rear drive bays (the Rear HDD Kit is derived by the configurator). If 12 or fewer drives are selected, the certified node provides 12 front drive bays only (the rear drive bays are not present).
- The M.2 with Mirroring Enablement Kit is connected to the Intel PCH via the PCIe link, and the kit supports two M.2 SATA SSDs configured in a RAID-1 drive group for software preload.

The following table lists M.2 drive selection options for software preload.

Table 6. Drive options for software preload

Description	Feature code	Quantity
ThinkSystem M.2 CV3 128GB SATA 6Gbps Non-Hot-Swap SSD	AUUV	2

The following table lists the storage controllers for internal storage of the HX5521-C Certified Node.

Table 7. Controllers for internal storage

Description	Feature code	Quantity
ThinkSystem 430-16i SAS/SATA 12Gb HBA (non-RAID)	AUNM	1

Configuration note: A low profile SAS HBA for internal storage is derived by the configurator, and it occupies the PCIe slot 7.

Drives for internal storage

The following tables list the drive selection options.

Table 8. Drive selection options: Hybrid configurations

Description	Part number	Feature code	Quantity (min / max)
SSD selection (Cache tier): SAS 12Gb SSDs - PM1633a Capacity			
ThinkSystem 3.5" PM1633a 3.84TB Capacity SAS 12Gb Hot Swap SSD	4XB7A10173	B2XC	2 / 2
SSD selection (Cache tier): SAS 12Gb SSDs - PM1635a Mainstream			

Description	Part number	Feature code	Quantity (min / max)
ThinkSystem 3.5" PM1635a 800GB Mainstream SAS 12Gb Hot Swap SSD	4XB7A10188	B2XD	2 / 2

ThinkSystem 3.5" Intel S4510 3.84TB Entry SATA 6Gb Hot Swap SSD	4XB7A13629	B49H	6 / 14

Configuration notes:

- For hybrid configurations, the HX5521-C Certified Node supports 2 cache drives (SSDs) and from 4 to 12 capacity drives (HDDs) in increments of 2 drives.
- For All Flash configurations, the HX5521-C Certified Node supports from 6 to 14 SSDs in increments of 2 drives.
- All SSDs in the certified node must be of the same model and capacity. All HDDs in the certified node must be of the same type and capacity.

Network connectivity

The ThinkAgile HX5521-C Certified Nodes provide base two- or four-port 1/10 GbE RJ-45 or 10 GbE SFP+ network connectivity with the onboard Intel X722 NIC and a LOM card installed in the certified node. Two additional 1/10 GbE RJ-45, 10 GbE SFP+, or 25 GbE SFP28 expansion ports can be selected, if required.

The following table lists the network adapter options that are available for selection.

Table 10. Network adapter selection options

Description	Part number	Feature code	Quantity (min / max)
1/10 GbE RJ-45 base ports			
ThinkSystem 10Gb 2-port Base-T LOM (RJ-45)	7ZT7A00548	AUKL	0 / 1
ThinkSystem 10Gb 4-port Base-T LOM (RJ-45)	7ZT7A00549	AUKM	0 / 1
1/10 GbE RJ-45 expansion ports			
Intel X550-T2 Dual Port 10GBase-T Adapter (RJ-45)	00MM860	ATPX	0 / 1
10 GbE SFP+ base ports			
ThinkSystem 10Gb 2-port SFP+ LOM	7ZT7A00546	AUKJ	0 / 1
ThinkSystem 10Gb 4-port SFP+ LOM	7ZT7A00547	AUKK	0 / 1
10 GbE SFP+ expansion ports			
Intel X710-DA2 PCIe 10Gb 2-Port SFP+ Ethernet Adapter	7ZT7A00537	AUKX	0 / 1
10/25 GbE SFP28 expansion ports			
Mellanox ConnectX-4 Lx 10/25GbE SFP28 2-Port PCIe Ethernet Adapter	01GR250	AUAJ	0 / 1

Configuration notes:

- One of the 1/10 GbE RJ-45 or 10 GbE SFP+ LOM cards is required for selection, and it provides base network connectivity. Optional expansion ports can be selected, if needed.
- Supported transceivers or DAC cables should be purchased for the SFP+ and SFP28 ports, and UTP Category 6 cables should be purchased for the 10 GbE RJ-45 ports. The maximum number of transceivers or cables that are supported per adapter equals the quantity of the adapter ports, and all adapter ports must have the same type of the transceiver or cable selected.
The following transceiver and cables can be purchased:
 - [UTP cables for 1/10 GbE RJ-45 ports](#)
 - [Transceivers and cables for 10 GbE SFP+ ports](#)
 - [Transceivers and cables for 25 GbE SFP28 ports](#)

The following table lists cables for the 1/10 GbE RJ-45 ports.

Table 11. Cables for 1/10 GbE RJ-45 ports

Description	Part number	Feature code
UTP Category 6 cables (Green) for 1/10 GbE RJ-45 ports		
0.75m Cat6 Green Cable	00WE123	AVFW
1.0m Cat6 Green Cable	00WE127	AVFX
1.25m Cat6 Green Cable	00WE131	AVFY
1.5m Cat6 Green Cable	00WE135	AVFZ
3m Cat6 Green Cable	00WE139	AVG0

Power supplies and cables

The HX5521-C Certified Nodes ship with two power supplies that are listed in the following table.

Table 14. Power supplies

Description	Feature code	Quantity
ThinkSystem 550W (230V/115V) Platinum Hot-Swap Power Supply	AVWC	2

Configuration note: The power supplies support AC (Worldwide) and HVDC (China only) power sources.

The ThinkAgile HX5521-C Certified Nodes ship with two customer-configured power cords. The following table lists the rack power cables and line cords that are available for selection.

Table 15. Power cable selection options

Description	Part number	Feature code
Rack power cables		
1.0m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable	00Y3043	A4VP
1.0m, 13A/100-250V, C13 to IEC 320-C14 Rack Power Cable	4L67A08367	B0N5

Rack installation

The HX5521-C Certified Nodes ship with a rail kit. The following table lists the rail kit options that are available for selection.

Table 16. Rack kit selection options

Description	Feature code	Quantity (min / max)
4-post rail kits		
ThinkSystem Tool-less Slide Rail	AXCA	0 / 1
ThinkSystem Tool-less Slide Rail Kit with 2U CMA	AXCH	0 / 1
Lockable front bezel		
ThinkSystem 2U Security Bezel	AURX	0 / 1

Configuration note: One of the rail kits is required for selection.

The following table summarizes the rail kit features and specifications.

Table 17. Rail kit features and specifications summary

Feature	Tool-less Slide Rail	
	Without CMA	With 2U CMA
CMA	Not included	Included
Rail length	730 mm (28.74 in.)	807 mm (31.8 in.)
Rail type	Full-out slide (ball bearing)	
Tool-less installation	Yes	
In-rack maintenance	Yes	
1U PDU support	Yes	
0U PDU support	Limited*	
Rack type	IBM and Lenovo 4-post, IEC standard-compliant	
Mounting holes	Square or round	
Mounting flange thickness	2 mm (0.08 in.) – 3.3 mm (0.13 in.)	
Distance between front and rear mounting flanges^	609.6 mm (24 in.) – 863.6 mm (34 in.)	

* If a 0U PDU is used, the rack cabinet must be at least 1100 mm (43.31 in.) deep if no CMA is used, or at least 1200 mm (47.24 in.) deep if a CMA is used.

^ Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Software

The ThinkAgile HX5521-C Certified Nodes support the Nutanix Acropolis Hypervisor (AHV) (bundled with AOS) that is factory-preinstalled on the 2x 128 GB M.2 SSDs configured in a RAID-1 drive group.

The ThinkAgile HX Certified Nodes are shipped with the Nutanix software preloaded. Nutanix software licenses and software support are not included. Customers can use the existing Nutanix term-based software licenses and active support contracts, or they can purchase term-based software licenses and support contracts from Nutanix.

Configuration notes:

- The HX Certified Nodes support the Nutanix Software Pro and Ultimate editions; the Starter edition is not supported.
- The HX5521-C Certified Nodes cannot be deployed as a cluster on their own; one or more HX5521-C can be deployed as a cluster with two or more HX1321, HX3321, HX3521-G, HX3721, HX5521, HX7521, or HX7821 Certified Nodes (AOS 5.1.3 or later).
- VMs are not supported on the HX5521-C Certified Nodes.

Systems management

The ThinkAgile HX Certified Nodes support the following systems management tools:

- [Lenovo XClarity Controller](#)
- [Light path diagnostics](#)
- [Lenovo XClarity Administrator and XClarity Pro](#)
- [Lenovo XClarity Energy Manager](#)

Lenovo XClarity Controller

The ThinkAgile HX Certified Nodes contain Lenovo XClarity Controller (XCC) Enterprise, which provides advanced service-processor control, monitoring, and alerting functions.

XClarity Controller Enterprise offers the following capabilities for the HX Certified Nodes:

- Gathering and viewing system information and inventory
- Monitoring system status and health
- Alerting and notifications
- Event logging
- Syslog alerting
- Configuring security
- Updating system firmware
- Real-time power usage monitoring
- Displaying graphics for real-time and historical power usage data and temperature
- Capping power usage
- Remotely controlling power (Power on, Power off, Restart)

The XClarity Controller provides remote server management through the following interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Data Center Manageability Interface (DCMI) Version 1.5
- Redfish REpresentational State Transfer (REST) API
- Web browser with HTML5 support
- Command-line interface
- Virtual Operator Panel with XClarity Mobile App via the front USB port with XClarity Controller access

Virtual Operator Panel provides quick access to system status, firmware, network, health, and alerts information. With proper authentication, it also allows to configure systems management and network settings and to control system power (Power on, Power off, Restart). The Virtual Operator Panel can be accessed from the XClarity Mobile App running on the Android or iOS mobile device that is connected to the front USB port with XClarity Controller access (See [Components and connectors](#)).

Light path diagnostics

The ThinkAgile HX5521-C Certified Nodes include basic light path diagnostics, which provides the system LEDs on the front of the certified node (see [Components and connectors](#)) and the LEDs near the monitored components (for example, the DIMM error LEDs on the system board).

Lenovo XClarity Administrator and XClarity Pro

Lenovo XClarity Administrator is a centralized systems management solution that helps administrators deliver infrastructure faster. This solution integrates easily with Lenovo x86 servers, appliances, certified nodes, Top-of-Rack Ethernet switches, and storage systems, providing automated agent-less discovery, inventory, monitoring, and alerts across multiple systems. In addition, some managed endpoints support firmware updates and configuration management.

Lenovo XClarity Administrator is an optional software component for the ThinkAgile HX Certified Nodes which can be used to manage firmware upgrades outside of the Nutanix Prism software.

Notes:

- Lenovo XClarity Administrator can be downloaded and used at no charge to discover and monitor HX Certified Nodes and manage firmware upgrades for them.
- Optional Lenovo XClarity Pro subscription license that can be selected in the configurator provides software support for XClarity Administrator for the duration of the selected warranty period. If Lenovo XClarity software support is required, the XClarity Pro option must be selected.

The XClarity Pro license can be added during the initial purchase by selecting one of the software options listed in the following table.

Table 18. XClarity Pro selection options

Description	Feature code	Quantity (per node)
XClarity Pro	B0W3	1

Also, XClarity Pro licenses can be added after the initial deployment by purchasing one of the software license options listed in the following table.

Table 19. Lenovo XClarity Pro license options

Description	Part number		Quantity (per node)
	NA, AP, Japan*	EMEA, LA**	
Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S	00MT201	00MT207	1
Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S	00MT202	00MT208	1
Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S	00MT203	00MT209	1

* NA = North America; AP = Asia Pacific.

** EMEA = Europe, Middle East, Africa; LA = Latin America.

Lenovo XClarity Administrator is available from Lenovo at no charge, and it offers the following features:

- Auto-discovery and monitoring of HX Certified Nodes
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting support with Windows PowerShell, providing command-line visibility and control over hardware resources

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables customers to observe, plan and manage power and cooling for Lenovo servers and appliances. Using built-in intelligence, XClarity Energy Manager identifies power consumption trends and ideal power settings, and it performs cooling analysis so that customers can define and optimize their power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- Monitors room, row, rack, and device levels in the data center
- Reports vital system information, such as power, temperature and resource utilization
- Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

Lenovo XClarity Energy Manager license is included in the XClarity Controller Enterprise upgrade.

For more information, refer to the Lenovo XClarity Energy Manager web page:

<http://datacentersupport.lenovo.com/us/en/solutions/lnvo-lxem>

Physical specifications

The ThinkAgile HX5521-C Certified Nodes have the following dimensions and weight (approximate):

- Height: 87 mm (3.4 in.)
- Width: 445 mm (17.5 in.)
- Depth: 720 mm (28.3 in.)
- Weight (maximum): 32 kg (70.5 lb)

Operating environment

The ThinkAgile HX Certified Nodes comply with ASHRAE class A2 specifications. The node performance might be impacted when the operating temperature is outside the ASHRAE A2 specifications. Depending on the hardware configuration, some HX5521-C Certified Nodes comply with ASHRAE class A3 and class A4 specifications. To comply with ASHRAE class A3 and class A4 specifications, the nodes must meet the following hardware configuration requirement: Intel Xeon Gold 6126 processors not installed.

The ThinkAgile HX Certified Nodes are supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A4: 5 °C - 45 °C (41 °F - 113 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 125-m (410-ft) increase in altitude
 - ASHRAE Class A3: 5 °C - 40 °C (41 °F - 104 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 175-m (574-ft) increase in altitude
 - ASHRAE Class A2: 10 °C - 35 °C (50 °F - 95 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 300-m (984-ft) increase in altitude
 - Non-operating: 5 °C - 45 °C (41 °F - 113 °F)
 - Storage: -40 °C - +60 °C (-40 °F - 140 °F)
- Maximum altitude: 3,050 m (10,000 ft)
- Humidity:
 - Operating:
 - ASHRAE Class A4: 8% - 90% (non-condensing); maximum dew point: 24 °C (75 °F)
 - ASHRAE Class A3: 8% - 85% (non-condensing); maximum dew point: 24 °C (75 °F)
 - ASHRAE Class A2: 8% - 80% (non-condensing); maximum dew point: 21 °C (70 °F)
 - Storage: 8% - 90% (non-condensing)
- Electrical:
 - 100 - 127 (nominal) V AC; 50 Hz / 60 Hz
 - 200 - 240 (nominal) V AC; 50 Hz / 60 Hz
 - 180 - 300 V DC (supported in China only)
- Acoustics (maximum configuration, operating): 6.2 bels
- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 12 kg - 22 kg: 50 G for 152 in./sec velocity change across 6 surfaces
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces

The following table lists the maximum system power load, rated inlet current, and system heat output based on the power supply and source voltage.

Table 20. Rated system power, inlet current, and system heat output

Power supply	Source voltage	Maximum power load per system (two power supplies)	Rated current per inlet	System heat output
550 W Platinum	100 - 127 V AC	722 W	6.2 A	2463 BTU/hour
	200 - 240 V AC	704 W	3 A	2402 BTU/hour
	180 - 300 V DC	702 W	2.5 A	2395 BTU/hour

Regulatory compliance

The ThinkAgile HX Certified Nodes conform to the following regulations:

- United States FCC Part 15, Class A
- Canada ICES-003/NMB-03, Class A
- UL/CSA 60950-1
- Mexico NOM-019
- Argentina IEC60950-1
- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 22, Class A
- China CCC GB4943.1, GB9254 Class A, GB17625.1
- Taiwan BSMI CNS13438, Class A; CNS14336-1
- Korea KN22, Class A; KN24
- Russia/GOST ME01; IEC-60950-1; GOST R 51318.22, 51318.24, 51317.3.2, and 51317.3.3
- IEC 60950-1 (CB Certificate and CB Test Report)
- Europe CE Mark (EN55022 Class A, EN60950-1, EN55024, EN61000-3-2, EN61000-3-3)
- CISPR 22, Class A
- Germany TUV-GS (EN60950-1/IEC60950-1, EK1-ITB2000)
- Reduction of Hazardous Substances (ROHS)
- Energy Star 2.1

Warranty and support

The ThinkAgile HX Certified Nodes can be configured with a one- (PRC only), three-, four, or five-year hardware warranty and various levels of service coverage with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

The base warranty provides 9x5 Next Business Day response with parts delivered. Lenovo's additional support services provide a sophisticated, unified support structure for a customer's data center, with an experience consistently ranked number one in customer satisfaction worldwide.

The following Lenovo support services are available for selection:

- **Warranty service level upgrades (Preconfigured Support)** are available to meet the on-site response time targets that match the criticality of customer's systems:
 - 1 (PRC only), 3, 4, or 5 years of service coverage.
 - 1-year or 2-year post-warranty extensions.
 - **Foundation Service:** 9x5 service coverage with next business day onsite response, with optional YourDrive YourData.
 - **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select regions), bundled with YourDrive YourData.
 - **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select regions), bundled with YourDrive YourData.
- **Managed Services**
Lenovo Managed Services provide continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of a customer's data center using state of the art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware and operating system device driver levels, and software as needed. Lenovo will also maintain records of latest patches, critical updates, and firmware levels, to ensure customer's systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

A Lenovo Technical Account Manager helps customers optimize operations of their data centers based on a deep understanding of customer's business. Customers gain direct access to a Lenovo TAM, who serves as their single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. Also, a TAM helps proactively make service recommendations and manage service relationship with Lenovo to make certain that customer's needs are met.

- **Enterprise Software Support**

Lenovo Enterprise Software Support is an additional support service that provides customers with software support on Microsoft, Red Hat, SUSE, and VMWare applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product compatibility and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures that customer's data is always under their control, regardless of the number of drives that are installed in their Lenovo server. In the unlikely event of a drive failure, customers retain possession of their drive while Lenovo replaces the failed drive part. Customer's data stays safely on customer premises, in their hands. The YourDrive YourData service can be purchased in convenient bundles with Foundation, Essential, or Advanced services.

- **Health Check**

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that customer systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Some regions might have different warranty terms and conditions than the standard warranty. This is due to local business practices or laws in the specific region. Local service teams can assist in explaining region-specific terms when needed. Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo support services are region-specific. Not all support services are available in every region. For information about Lenovo support services that are available in a specific region, refer to the following resources:

- Service part numbers in Data Center Solution Configurator (DCSC):
<http://dcsc.lenovo.com/#/services>
- Lenovo Services Availability Locator
<https://lenovolocator.com/>

For service definitions, region-specific details, and service limitations, refer to the following documents:

- Lenovo Statement of Limited Warranty for Infrastructure Solutions Group (ISG) Servers and System Storage
<http://pcsupport.lenovo.com/us/en/solutions/ht503310>
- Lenovo Data Center Services Agreement
<http://support.lenovo.com/us/en/solutions/ht116628>

Deployment services

The following optional Lenovo Professional Services are available for the ThinkAgile HX Certified Nodes to get customers up and running quickly:

- Basic Hardware Installation Services
 - Unpacking and inspecting the systems
 - Installing options and mounting the systems in a rack cabinet
 - Connecting the systems to electrical power and network
 - Checking and updating firmware to the latest levels
 - Verifying operations
 - Disposal of the packaging materials (within the customer site)
- Nutanix deployment services - Base (per node)
 - Conducting remote preparation and planning
 - Verifying firmware versions and performing firmware updates, if needed
 - Installing and configuring hypervisor and Nutanix controller VM
 - Creating Nutanix cluster

Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary. Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk. Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.
