# SAFETY & WARNINGS

Ensure to read all warnings and instructions in this user guide prior to first use. Retain this user guide for future reference.

- This PC contains small batteries for the CMOS on the motherboard. If the batteries require replacement, do not attempt to replace them yourself. Contact [help.Kogan.com](https://www.kogan.com/help) for assistance.
- The ideal working temperature of this PC is 10–35°C with a relative humidity of 30–80%.
- Do not repeatedly turn on and turn off the PC in a short period of time as this may cause damage to the internals.
- Do not allow food, water, or any other liquids to come into contact with the PC.
- Do not cover the fans on the PC as this may lead to lower performance and overheating.
- Do not expose the PC to strong lights or direct sunlight.
- Do not place the PC near strong magnetic fields.
- Do not use this PC in high altitudes (3000 metres above sea level and higher).
- Do not use this PC in highly humid or tropical areas.
- If there is a sudden power outage whilst the PC was in use, this may cause damage to the hard drive. When the power is reconnected, ensure to run a scan on the hard drive to check for any errors that may have occurred.
- When connecting the PC with a cable, do not forcibly pull on the cable to unplug it from the PC.
- Unplug and store the PC if it will not be used for an extended period.
