 - Pyrolytic self-cleaning function breaks down food residue for an easy clean

DIMENSIONS

Height	598 mm
Width	596 mm
Depth	565 mm

FEATURES & BENEFITS

- Cook With Confidence**
- Using the large 5" touchscreen interface, you can cook with a favorite method, hero ingredient, cooking function or recipe. Your oven will guide you through the steps, or change the temperature and heat type automatically, depending on your selection.
- Generous Capacity**
- With a generous 85L total capacity, you can create several perfectly cooked dishes at once using multiple shelves. Non-tip, full-extension shelves help to ensure safe removal of hot dishes.

- Exceptional Performance**
- Our unique cooking technologies were developed to help deliver perfect results. ActiveVent ensures optimized moisture levels, while AeroTech™ circulates heat evenly for a consistent temperature.
- Safe And Sound**
- The CoolTouch door of this built-in oven is safe to touch from the outside. Sturdy, fully extendable shelves slide all the way out, reducing the need for you to reach inside.
- Self-Cleaning**
- Pyrolytic self-clean breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. The enamel coated side racks don't need to be removed when using this function.
- Complementary Design**
- Designed to blend seamlessly into the kitchen, this Minimal style oven features subtle textural and tonal contrasts. Available in a black or grey finish to support a considered kitchen design. Pair with a Warming Drawer for the ultimate kitchen solution.

- Multi-Function Flexibility**
- Each function has been tailored, tested and perfected to ensure that no matter what you're cooking, you've got the right heat to match. Purchase our Wireless Temperature Sensor accessory and precisely monitor cooking in real time (accessory sold separately).

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
