FIGURE C

Change The PIN Code (FIGURE B)

1. Default PIN is "0000", press "0000" and press "*" to test if the password is set as default. If yes move to step 2. If no, follow the **"Factory Reset The Keypad To Default Password"** above.
2. To change the PIN number, you need to press and hold the "#" key until you hear a long beep, wait until beep sound end (FIG. B - STEP 1). Press "0000" and "*" then wait for beep sound end (FIG. B - STEP 2). Press your new PIN from 4 digits to 8 digits (for example "1234" or "12345678") and press "*" and wait for beep sound end. Repeat the new PIN one more time (FIG. B - STEP 3). Now your new PIN number is updated.

Connect The Keypad To The Gate Operator (FIGURE C)

1. Press and hold the "#" key until you hear a long beep, wait until beep sound end (FIG. C - STEP 1).
2. Press "1234" (your new PIN number) and "*", wait until beep sound end (FIG. C - STEP 2)
3. Press "#" then press and hold the remote control (FIG.C - STEP 3), you should here a long beep if successed.
