Technical Parameters ——

Battery capacity	3.7V 450mAh
Standby current	<12mA
Receiving frequency	433.92MHZ
Receiving sensitivity	-113dbm
Power supply	5V 1A
Ambient temperature	-20℃ to 55℃

Question & Answer ──

Q: Do I need to pair the receiver and transmitter myself?
A: The receiver and transmitter are factory-paired and do not need to be paired yourself.

Q: Vibration and sound is too light/quiet.
A: The volume is fixed, you can adjust the alert mode to vibration + ringing and increase the number of ringing times by adjusting the alert mode to vibration + ringing. For more details, please refer to "Prompt Mode & Prompt Times".

Q: What factors affect the use distance of the pager?
A: Obstacles near the transmitter and receiver can interfere with the signal.Avoid placing them near items like power supplies, TVs, microwaves, or iron doors.

Q: The pager cannot select the menu.
A: Long press the setup button for 5s,enter the menu page,short press the setup button to select next menu,

Q: Unable to pair call buttons.
A: Please refer to "Add Call Buttons" for pairing operation instructions.

Q: Why doesn't the pager system work?
A1: Does the receiver make a sound when pressing the volume button? If not, troubleshoot the receiver.
A2: Does the transmitter light up? If not, replace the battery.
A3: If both are fine, re-do the pairing (see "How to Pair?").
A4: Test the system at its maximum range; out of range, it won't work.
