

DPI & Report Rate

- (1) "Press the DPI button" to switch the DPI value. The default setting values of the four DPI levels of this machine are: 1000/1400/1800/2400 (sensor3212).
- (2) When the DPI is switched, there will be a corresponding number of light flashes to indicate: the first level will flash green once, ... the second level will flash twice, the third level will display 3 times, and the fourth level will display 4 times.
- (3) "Press and hold L+R" to switch the report rate. The report rate will be switched in sequence (1000/500/250/125). The corresponding green light will flash once to indicate that the switch is valid. This function is only valid in 2.4G mode and USB mode. The Bluetooth mouse is fixed at 133HZ and cannot be switched.
- PAIR button description
- (1) In BT mode, "press the PAIR button" to select BT channel BT0/BT1. The two BT channels can be set with different lighting effects to distinguish them.
- (2) In 2.4G and BLE modes, "press and hold the PAIR button for 2 seconds" to enter the pairing state.
- In BT mode, the blue (BT0) or green (BT1) light flashes quickly to indicate that the connection is established.
- In 2.4G mode, the red light flashes quickly to indicate that the connection is established.
- After the connection is established, if the signal is not good, the corresponding indicator light will flash slowly to indicate that the connection is established.
- Lighting operation instructions
- (1) Press and hold "DPI" for 2 seconds to switch the lighting effects. There are 15 lighting effects, which are as follows:
- Static: (1) Red (2) Green (3) Blue (4) Purple (5) Logo Red (6) Logo Green (7) Logo Blue (8) Logo Purple
- Dynamic: (9) Streaming (10) Breathing (11) Fantasy Color (12) Horse Racing (13) Logo Horse Racing (14) Logo Streaming (15) Logo Breathing.
- (2) The lighting effects of BT0, BT1, 2.4G, and USB modes can be set by the user separately, and the setting options will be automatically loaded at startup.
- (3) Press and hold "L+R+M" for 2 seconds to turn the light on/off.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
