EQUINOX INSTALL GUIDE

STW751105 / STW751207

REQUIRED TOOLS:

3/32" Allen Key (Included)
1/8" Allen Key (Included)
Wire Cutter / Stripper

INSTRUCTIONS:

1. To prevent electrical shock, disconnect transformer from electrical supply and make sure power supply is completely off before installation. Fixtures should always be installed by a licensed electrician.
2. Secure the **mount** in the desired location.
3. Remove the 1/2" **adapter** from the tube by loosening the two **set screws** on the bottom and pulling it off (see figure).

If Behind the Mount is Accessible:

4. Screw the 1/2" **adapter** into the **mount** and tighten down firmly by hand.
5. Feed the **fixture lead wire** through the 1/2" **adapter** and connect to the **main supply cable** using **UL listed wire connectors** suitable for the location (see figure).
6. Slide the **tube** back into the 1/2" **adapter** until it fully stops and tighten down the **set screws**.

If Behind the Mount is not Accessible:

4. Pull the **main supply cable** through the **mount** then feed the **fixture lead wire** through the 1/2" **adapter**. Connect the wires using **UL listed wire connectors** suitable for the location.
5. Push the connectors and wires back through the **mount** then screw the 1/2" **adapter** into the **mount** and tighten down firmly by hand.
6. Slide the **tube** back into the 1/2" **adapter** until it fully stops and tighten down the **set screws**.

TIP: Small gauge cable is vulnerable to damage in the landscape; Protect by routing in close proximity to the luminaire or adjacent to concrete slab or similar structure. Do not over tighten.
