Wireless speaker

Philips Wireless Home System 120W max, Works with Ambilight TVs, Sustainable Muirhead leather

TAFS1/37

Highlights

Natural Fidelio sound

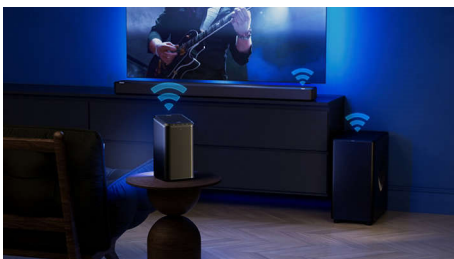

The Fidelio FS1 speaker brings music and movies alive with sparkling highs, warm midrange frequencies, and rich bass. A down-firing woofer and twin passive radiators add real depth to every beat and every score. It's perfect for small- to medium-sized rooms.

Head-turning looks

This sleek wireless FS1 speaker looks great on its own, and even better in a Fidelio home-theater setup. The FS1 is wrapped in an acoustically transparent metal grille, and its bevel is trimmed in anthracite Muirhead leather. It matches the Fidelio FB1 soundbar and FW1 subwoofer beautifully.

Philips Wireless Home System

You can sync multiple FS1 speakers to enjoy superb multi-room sound. Pair with a

compatible Philips TV* for more cinematic sound and better vocals, or connect two speakers to a Fidelio FB1 soundbar to create a true 7.1.4 surround-sound setup. Add a Fidelio FW1 subwoofer to deepen the bass.

Pair for stereo

Just one of these wireless speakers fills a small-to-medium room with rich, detailed sound. Pair a second Fidelio FS1 speaker in the same room, and you'll get incredibly immersive stereo. Jazz, rock, EDM, or the latest episodes in your pod feed—enjoy even clearer sound with a real sense of space.

Intelligent pairing

Good things happen when this Fidelio speaker pairs with a Philips soundbar or subwoofer, another FS1 speaker, or a Philips TV*. The speaker recognizes what it's paired with and automatically adjusts its performance, freeing paired components to add more richness and detail to the mix.

Fidelio sound for streaming

Whether you're streaming directly from Spotify, or accessing hi-res albums on Tidal, this speaker brings it all to life. If you're streaming higher-than-CD-quality files, Critical Listening mode lets you allocate bandwidth to a single FS1 speaker so that no detail is lost.

Ambilight on board

This speaker doesn't just do music—it does Ambilight too. For movies, you can set the speaker to sync with the Ambilight on your Philips TV. Lounge Mode turns the FS1 into a colorful static light, perfect for dinner parties or a good book. Follow Music creates a lightshow that pulses to the beat.

Connects with voice assistants

With Wi-Fi, Bluetooth, Chromecast, and Apple AirPlay 2 compatibility—all your devices are covered. Stream how you like. Control the speaker using Alexa, the Google Assistant, or Siri. Turn the music up. Skip tracks. All completely hands-free.

Philips Sound app

Philips Sound app—regular updates for the best experience
