Product Overview

Description

The NVS-10350020CS is a Ceiling Speaker with built-in 70V/100V transformer. The transmission takes place in a high-voltage, low-current environment. Low-current mode allows for longer transmission distances and parallel connections of many loudspeakers. The built-in 6.5" speaker driver has a wide frequency response of 60-18,000Hz, and the multiple terminals of 10W and 20W may be used for a variety of events with different area sizes and background noises. It is made of high-quality engineering plastic, which assure a long-term durability and never out of shape and the will not color fade. It is an ideal choice for places such as hotel, school, office and factory where background music and paging is needed.
