

Exemption sheet for Battery and battery-powered products

What are Dangerous Goods?

A product will be regulated as dangerous good if any of its components are classified as dangerous goods or substances or are otherwise regulated by any official organization that governs safe transport, storage, or handling of goods.

For more information on dangerous goods, please consult the Dangerous Goods Identification Guide in Seller Central Help.

Examples of Dangerous Goods

Important note: This exemption sheet is required and will be accepted only for **products that may** (even if the batteries are not included with the product or if the product is to be plugged-in) or **themselves**. If your product does not belong to that category but is otherwise regulated as dangerous chemicals and/or substances (e.g. cleaners, essential oils, paint related products), please provide (if available) a Dangerous Goods Identification Guide (obtained from your manufacturer) instead of a battery exemption sheet.

This exemption sheet must be **completely filled out** before being submitted: **all cells in red must be filled out** (move to the right). For **complete instructions**, please go to the **Instructions tab of this Exemption Sheet**.

Dangerous Goods

Declaration table for products that need batteries to function or that

Products that need batteries to function are hazardous goods that are **batteries** or contain a battery. You must provide a Safety Data Sheet (to be reviewed and approved by Amazon) to be informed, across all 2 product files.

Aggarwal

The regulations applicable to the information provided must be provided with prior notice. These actions include delays, and disposal of
