For Android
If you cannot find the file with Android, there are two methods you can print.
(open the file in Messenger.) The first one "Download official version". If finishing,
open the shipping printer - choosefile, you can find the file. The second one
"Other apps", click it. And then tap the "Shipping Printer" by Pic18 -Pic 21, and
then continue to pic 1 to pic 8 as page 2 and page 3 showed.

⚠ Note:

If you can not connect Bluetooth in Pic 3 of page 2 , pls make sure your "Location Service" and "Tracking" on by Pic 22-Pic 23 . And then follow pic 1 to pic8 as page 1,2,3 showed.
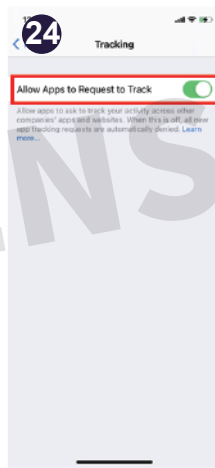

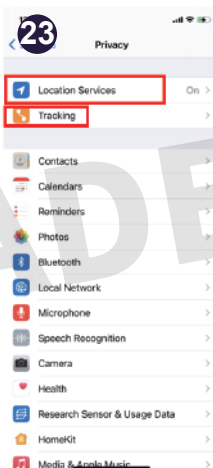

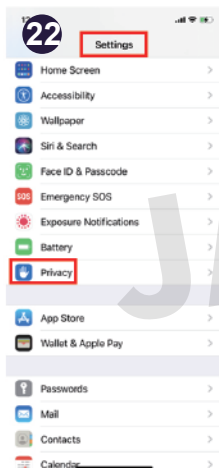

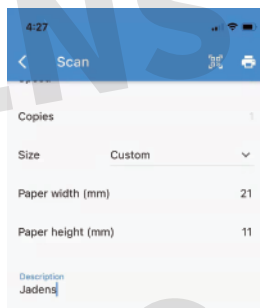

More features.
Scan and print small bar code.
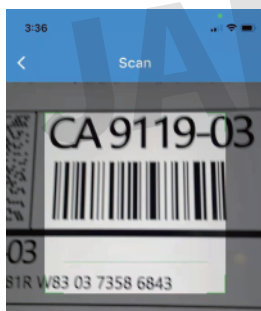

Scan the barcode

Edit the file
(Please customize the size according
to the label size you are printing.)

⚠️ **Note:**
1. Please print PDF file but not picture. The quality of print PDF is better than photo. If you have to use photo, you should use the high-quality picture.

2. The iPad device may not be compatible with the printer, it is better to use the mobile phone Bluetooth to print.
