

## How do I set my headset as the default audio device on my Mac computer?

You must manually define the setting for the default audio device on your Mac computer. Follow these steps:

1. On the Mac home screen, select the **Apple** logo at the top left.

2. Select **System Preferences**.

3. Select **Sound**.

4. On the **Output** tab, select your Jabra device.

5. On the **Input** tab, select your Jabra device.
