OPERATION INSTRUCTIONS

COOKING RICE

1. Measure the desired amount of rice with the measuring cup included. Rinse the rice several times until the water in the bowl shows relatively clear.
 - One cup of rice weight 0.16 L.
 - DO NOT wash the rice in the cooking pot. If the pot is used to wash rice, the fluorine resin coating may be damaged, or the bottom may be deformed, which will result in poor conduction because it contacts with heating plate improperly.
2. Put the rice in the cooking pot and add water to the level which corresponds to the measure of rice used.
 - The line in the pot is the water line. The right line corresponds to liters of water, the left line corresponds to the cup markings for rice.
 - The water line in the pot is a standard, it can be adjusted according to your preferences.
 - Add an extra cup of water when cooking 3 cups of surasiático rice to obtain the best performance.
 - NEVER add water above the maximum level.
3. Dry the water from the outside pot, install the pot into the cooker, turn it slightly from left to right, ensure that the pot contacts with the heating plate properly, level the rice inside the pot.
4. Press down "Cooking" switch. The rice cooker will start cooking. The "Cooking" indicator light will turn on after connecting to an electrical outlet.
You must push down the "Cooking" switch to start cooking.
If the switch is not pushed, the "Keep Warm" indicator will light up after 1 -2 minutes, and the cooker will be in keep warm function.

OPERATION INSTRUCTIONS

5. At the end of cooking, the "Cooking" switch will pop up and a click will be heard. At the same time, the cooking indicator will turn off and the keep warm indicator will go on.
- After the cooking cycle ends, keep the lid closed for about 15 minutes. This allows the rice to be fully cooked and steamed, making it more fluffy and tasty.
 - After the rice is steamed, be sure to open the outer lid and stir the rice well. The cooked rice can be served immediately or kept warm automatically.

7. Disconnect before serving.
8. Only use the spoon included. Do not use a metal spoon, to avoid scratching the anti-stick coating.

CLEANING AND MAINTENANCE

1. Wash the cooking pot in warm and soapy water using a sponger or cloth and rise with water properly, then wipe dry with cloth. Do not clean with abrasive brushes to avoid damaging the non-stick coating.
2. Rice grains or other residues may stick on the heating plate. To ensure a proper contact with the cooking pot, rub the grains or residue away from the heating plate with sandpaper (No. 320), then wipe it with cloth again.

PRECAUTIONS

1. The power cord must be plugged into the wall outlet with earthing.
2. Always unplug when not in use or without cooking pot.
3. Do not place on a wet surface or its operation will be affected.
4. To avoid deformation, do not operate with hard objects, or heat the pot in another oven or stove. Do not use any other container instead of pot to cook.
5. Do not cover with a cloth. This may distort and discolor the lid.
6. The steam vent is very hot during cooking. Keep your face and hands away from the lid and the steam outlet.
7. To avoid electric shock, do not immerse cord, plug or appliance in water or other liquid, and do not spill liquids on electrical parts.
8. Replace the power cord with the manufacturer when it is damaged.
