1. Introduction

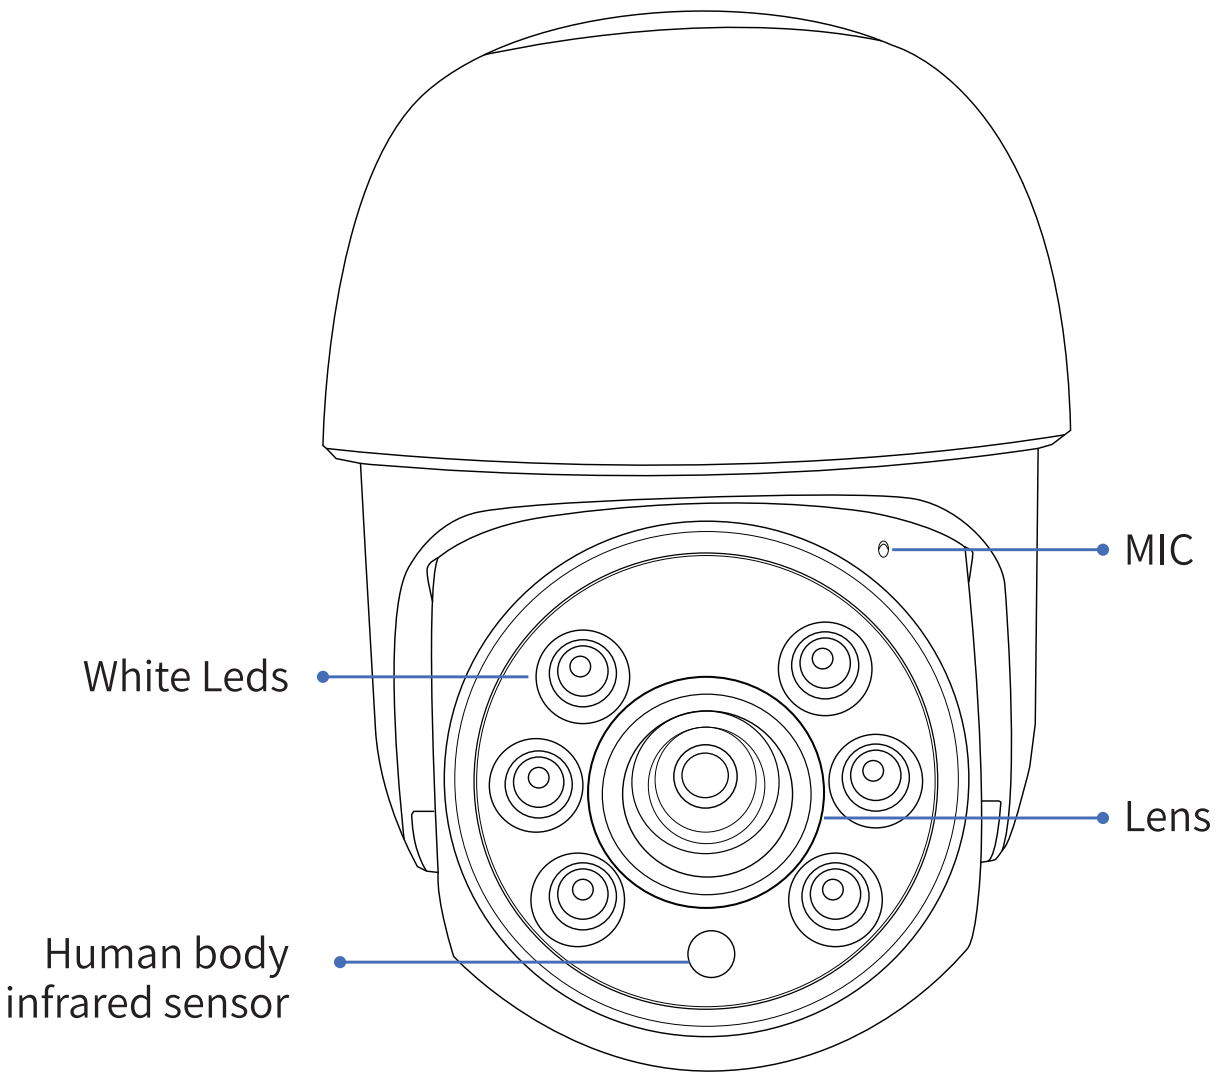
1.1 Product features

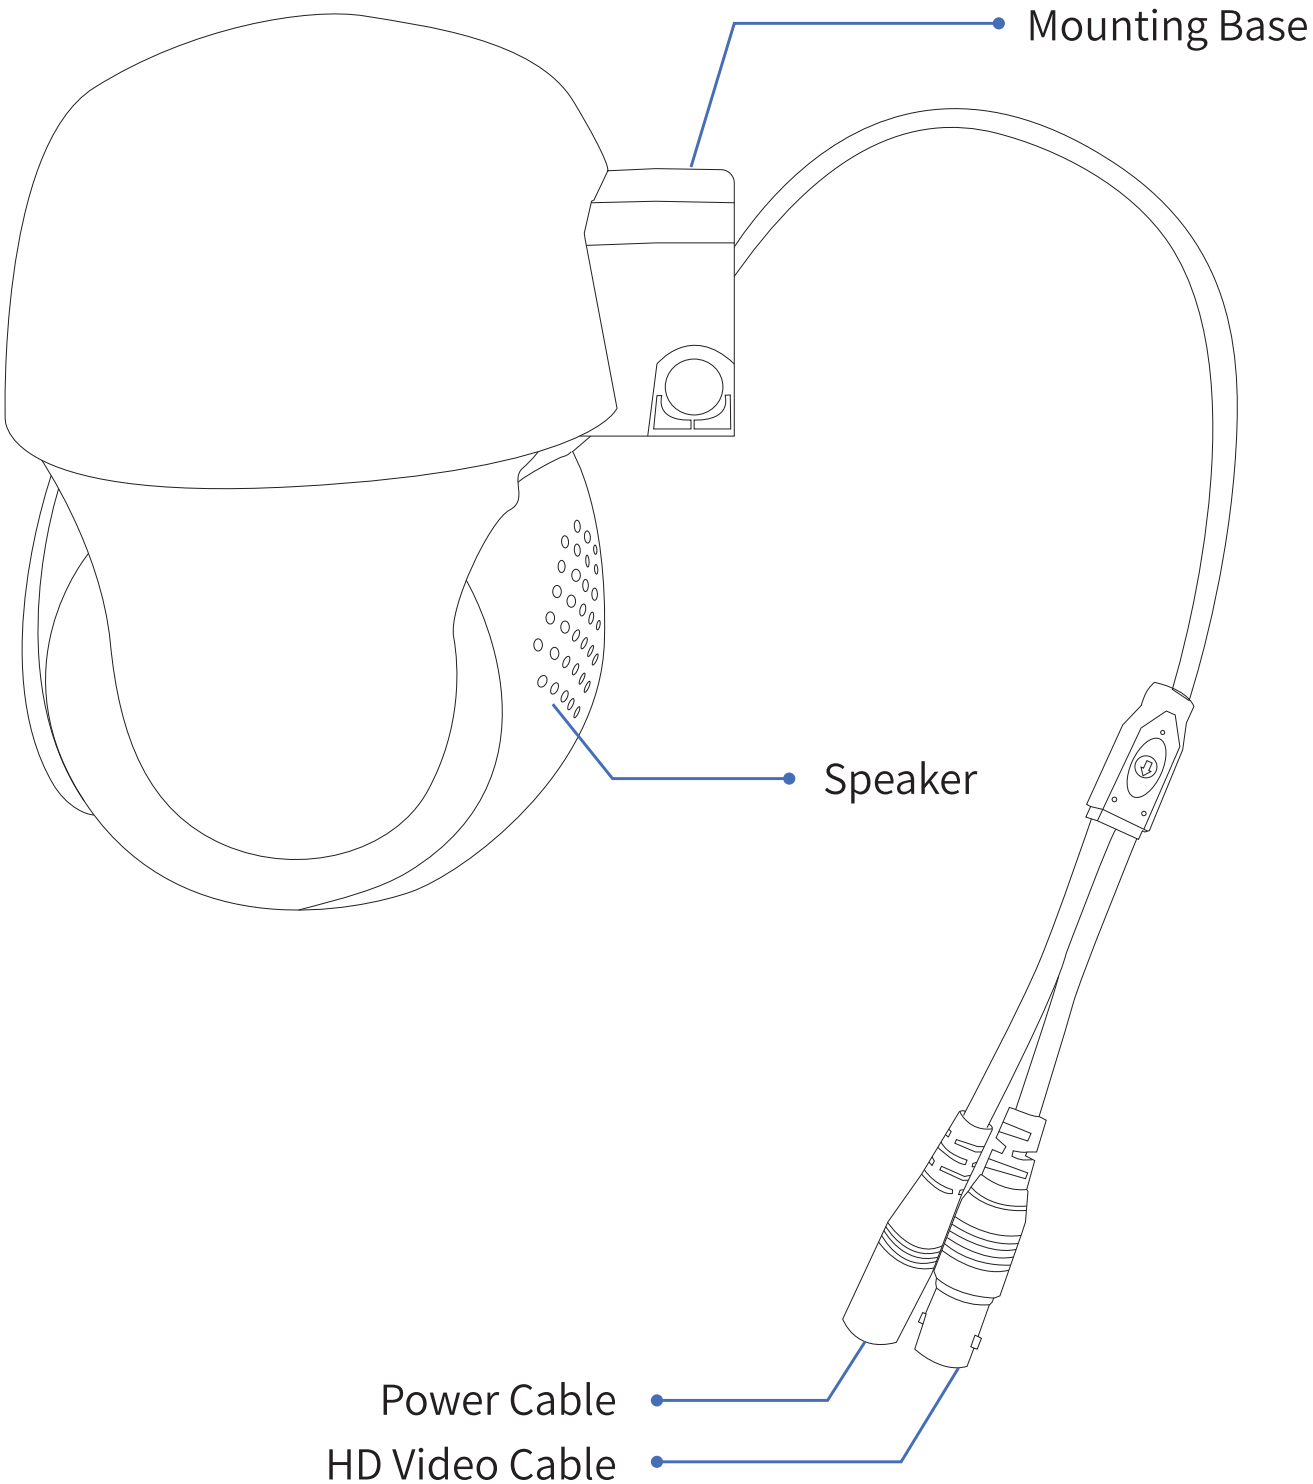
This series of cameras adopt new generation sensor with high sensitivity and advanced circuit design technology.It features high resolution,low image distortion and low noise,etc,which makes it suitable for surveillance system and image processing system.

- High performance CMOS sensor and high resolution bring high-quality image
- Low illumination
- Control camera pan and tilt in DVR and APP (The DVR must support coaxial control)

1.2 Product Overview

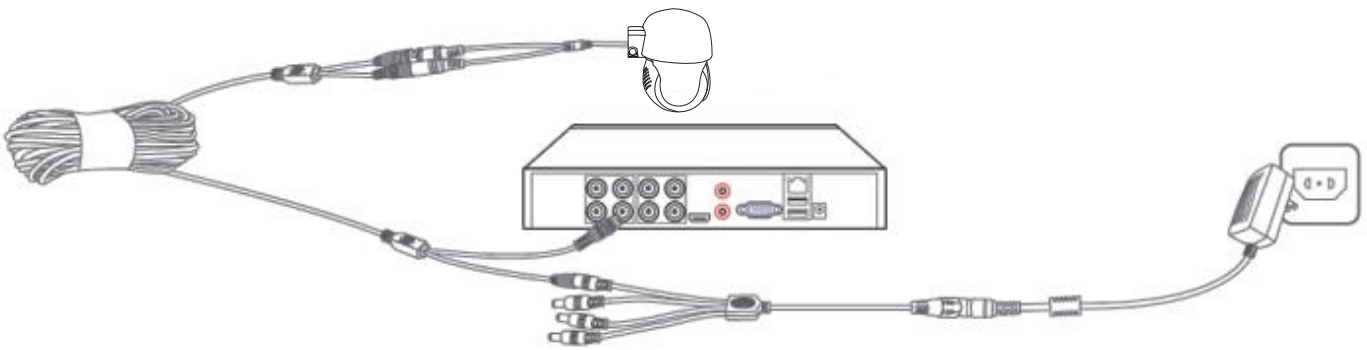
Camera Type : PT Mini Dome Camera





Mounting Base
Speaker
Power Cable
HD Video Cable

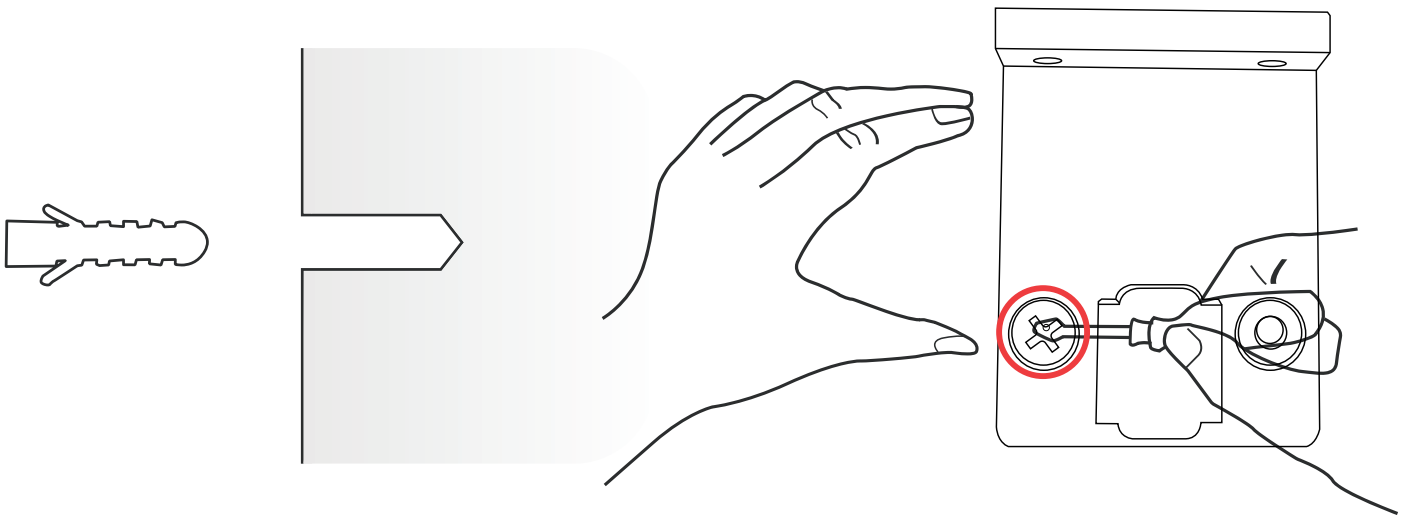
1.2.1 Connections

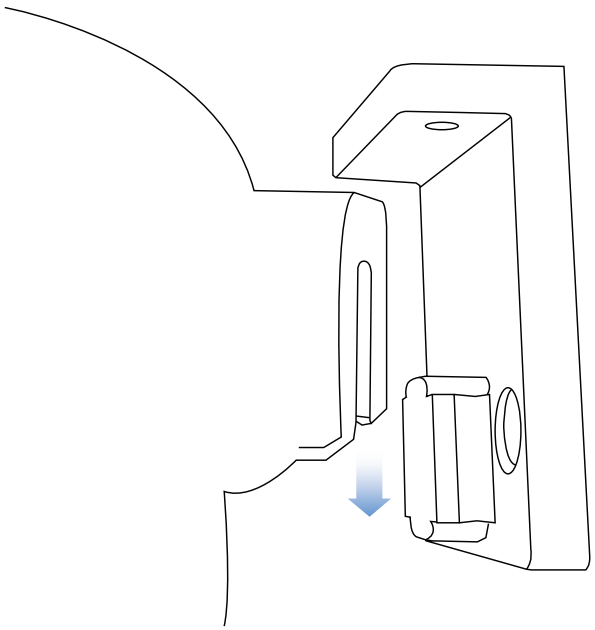


Please try to connect camera and DVR to test and set camera video before installing the camera, This process is only for connection. Please prepare the DVR, the power adapter and the video cable in advance.

1.2.2 Camera installation

1) Drill the screw holes in the wall according to the camera location sticker
2) Hammer the supplied plastic expansion bolt into the screw holes.
3) Fix the camera mount to the wall with supplied screws.
4) Insert the camera into the camera bracket
5) Connect the camera and the video/power cable.





1.3 Add to the DVR/XVR

1.3.1. Add to Hiseeu YS XVR

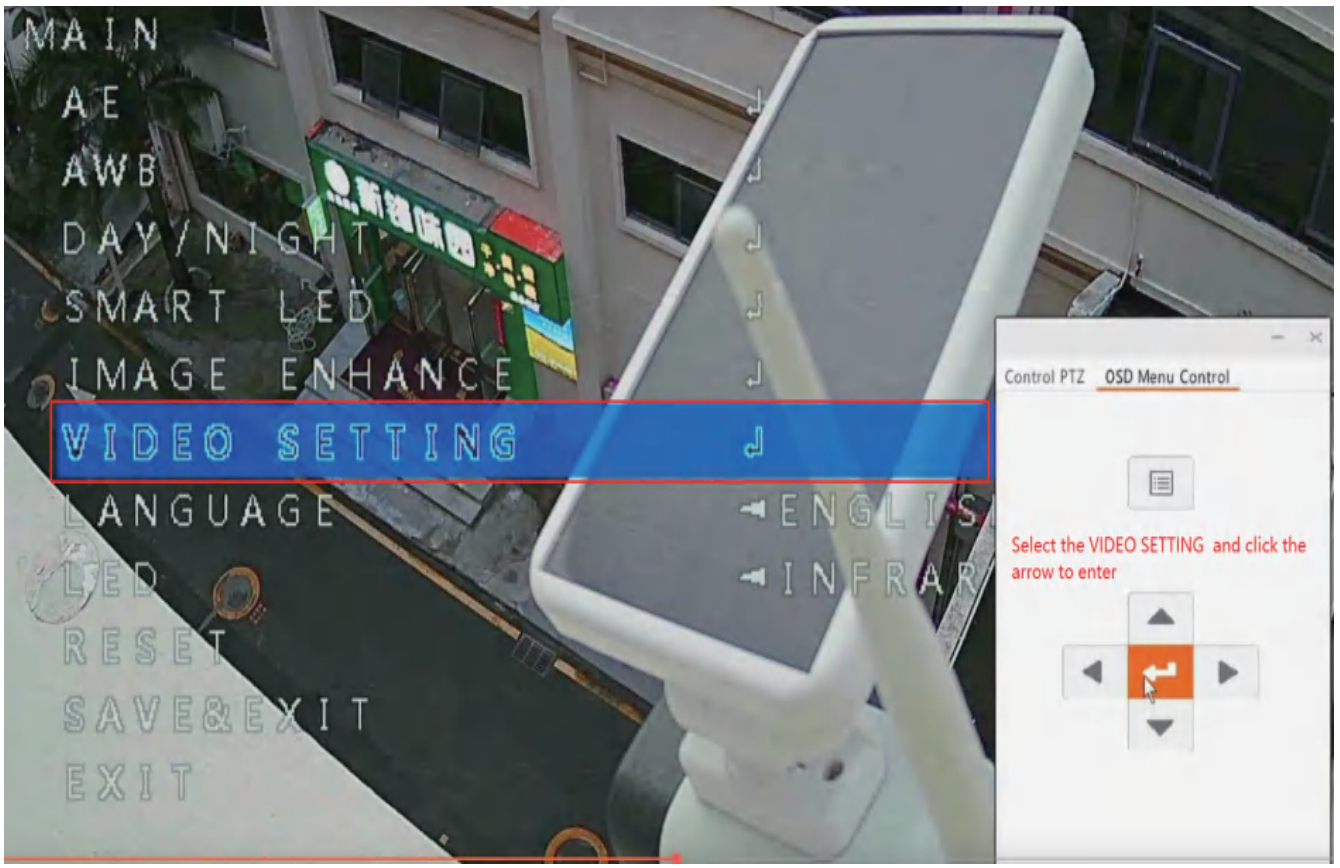
Please note that The factory setting of our PT camera's **VIDEO SETTING** is **AHD mode**, however, this product can only have one-way audio function in TVI mode in Hiseeu's XVR, so we have to change the **VIDEO SETTING** to TVI mode first.

Move the mouse and click the **“Control PTZ”**

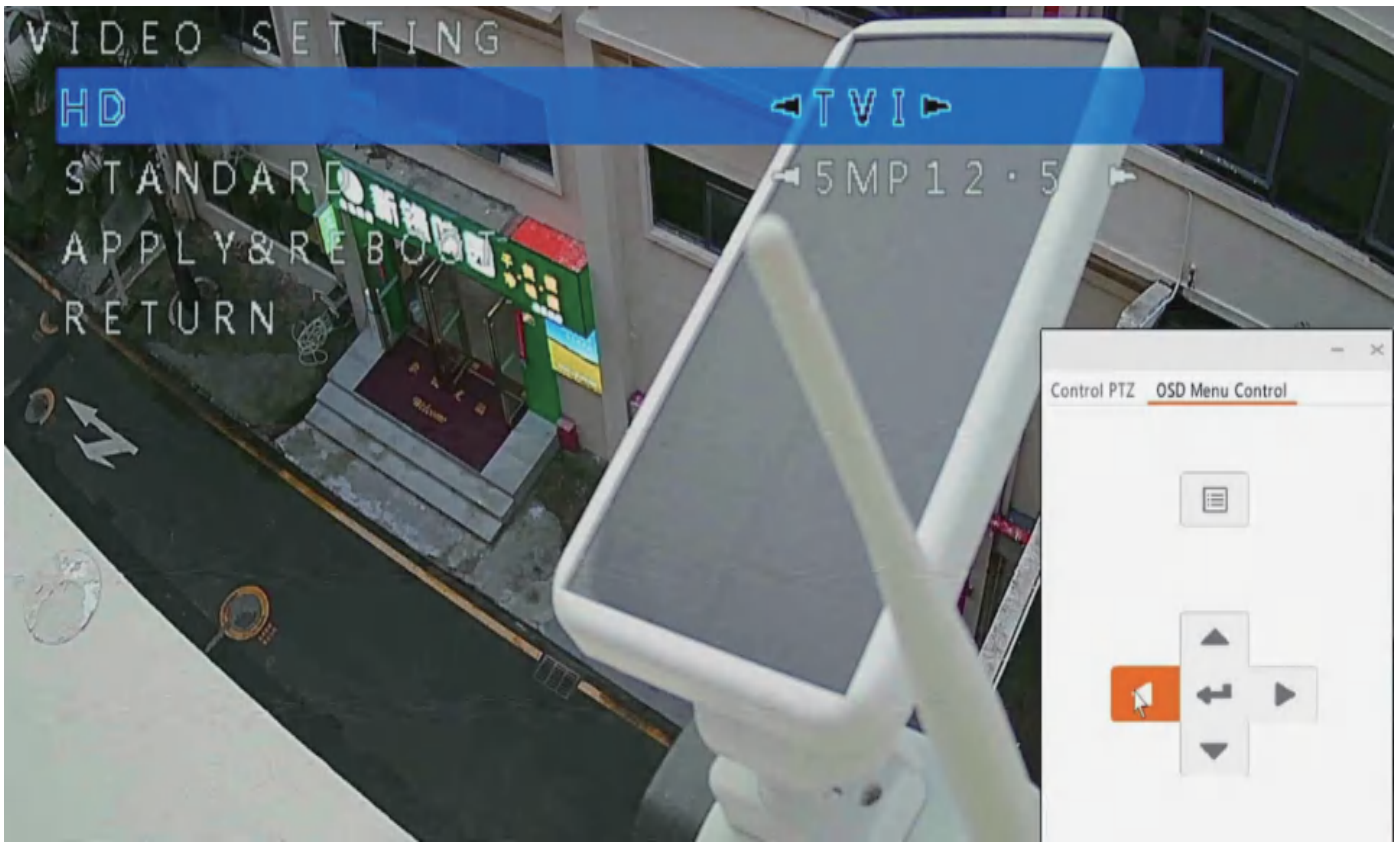
1. Click the **OSD Menu Control** , then click the arrows to the Menu
Then click the icon to select the **VIDEO SETTING**

Control PTZ
OSD Menu Control
1.click the OSD Menu Control
2.Click the icon to the Menu
3.click the icon to select the Main

3. Select the **VIDEO SETTING** and click the arrow to enter.



4. Then Select the “ **TVI** ” on the HD, then click the **RETURN** and the **EXIT** back to the Version



5. Finally Turn Audio On

1.3.2 Add to other brand DVR

If the connection is good, the video does not display properly, you need to change your **VIDEO SETTING** to **AHD** mode. Then it can output the picture normally. If you have questions about this procedure, you can contact your DVR seller, or contact us. We will definitely solve it for you.
