3. Except the accessory accessories, can not put any other accessories or Insulation accessories on the lighting
4. Can not install extra bulbs.
5. The lighting will getting hot after turning on, please caution.
6. The lighting should be installed on non conductive surface.

Installation Directions

Step1 Use plank to find the suitable holes for installing the lighting on the mixed soil ceiling

Step2 Make holes with a hole punch, then put the expansion bolt inside

Step 3 install the plank smoothly, then put the flat gasket and spring shim on the expansion bolt, then screw tie.

Step 4 connect to the home use Power Cord and earth wire

Note:

1. If the ceiling is made of wood, there is no need to make holes with hole punch.
2. This lighting can not installed on plaster ceiling!
3. After installed, should try test some stuff which 4 times heavier than this lighting.

Description of remote control and lamp body matching

The wall switches on the light

(note: it will be finished within 3 seconds after the light is on.) press the number 1 key on the remote control to turn on, and the light will blink 3 times. Indicates that the match is successful, and the function on other keys can be used normally.

Warm tips: the lamp body and the remote control have been matched well when they are manufactured. After power is installed, the function buttons on the remote control can be used directly
