

CRITIKON™ Blood Pressure Cuff Adapters and Connectors

Total solutions for non-invasive blood pressure

GE Healthcare's connection system is simple and easy to implement.

GE Healthcare provides cost-effective standardization and inventory management solutions. By standardizing blood pressure (BP) connection systems, you create a universal connection to allow the same type of BP cuff connection to work on a wide variety of non-invasive blood pressure devices. By consolidating all of your BP cuff purchases to one vendor, your Purchasing Department will have fewer purchase orders and invoices. And a single point of contact for BP cuffs is created, providing you with a dedicated implementation team.

Products included in this catalog are not made with natural rubber latex.
