WIRELESS CHARGING PAD

INSTRUCTIONS

SPECIFICATIONS

Device Case Thickness: up to 1/4"

Temperature Range: 32°F to 113°F

Charge Modes: 5W, 7.5W, 10W with compatible device and power supply

Power Output	Device Requirements	Power Supply
5W	Wireless charging compatible	5V, 2A
7.5W	iPhone 8 or newer	QC 2.0 or better fast charging adapter (9V, 1.67A)
10W	Samsung Galaxy Note 8/S8 plus or other device that supports 10W wireless charging	

SAFETY INFORMATION

1. Use as intended only.
2. Keep metal objects away from charging pad at all times.
3. Keep indoors and dry. Do not expose to water or other liquids..
4. Do not expose to temperatures below 32°F or above 113°F.
5. Do not use as drink coaster.
6. Do not place a device on this item that does not support wireless charging.
7. This product is not a toy. Do not allow children to play with charger.
8. Inspect before every use; do not use if parts are loose, cracked, damaged.
9. Do not open the housing of the charger pad.

OPERATION INSTRUCTIONS

Read the ENTIRE IMPORTANT SAFETY INFORMATION section at the beginning of this document including all text under subheadings there in before set up or use of this product.

1. Connect the USB cable from the inlet on the Charging Pad to a power adapter or another device that can supply USB power. The Indicator will light to indicate power is connected.

Note: The power supply must support fast charging as noted on the facing page if that is desired.

2. Center device on top of Charging Pad. The indicator will show blue while charging.

3. If the indicator does not show blue, make sure that the device is properly centered and is compatible with wireless charging.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device must operate with a minimum distance of 20 cm between the radiator and user body.
