# Infinite Scroll Magento 2

The Infinite Scroll Magento 2 Extension by Elsner Technologies enhances the browsing experience by automatically loading products on catalog pages as customers scroll down, eliminating the need for traditional pagination. This extension supports AJAX-based loading, customizable navigation, and secure code to improve user engagement, reduce bounce rates, and boost conversions. It is compatible with all Magento themes and ideal for stores with large product catalogs.

Installation

1. **Download**: Purchase the Infinite Scroll Magento 2 Extension from Elsner Technologies.

2. **Upload**: Unzip the downloaded file and upload it to app/code/Elsnertech/InfiniteScroll in your Magento 2 root directory.

3. **Run Commands**:

- php bin/magento setup:upgrade

- php bin/magento setup:di:compile

- php bin/magento cache:clean

4. **Verify**: Check **Stores > Configuration > Catalog > Infinite Scroll** in the Magento Admin Panel to confirm the extension is installed.

Configuration

Access settings via Stores > Configuration > Catalog > Infinite Scroll.

General Settings

- Enable: Select Yes to activate or No to disable the extension.

- Scroll Type: Choose Automatic to load products as users scroll or Manual to display a "Load More" button.

- Loading Text: Set the text displayed during product loading (e.g., "Loading More Products…").

- End Page Message: Enter a message to display when no more products are available (e.g., "No More Products to Load").

Display Settings

- Navigation Bar: Enable a customizable navigation bar to show page numbers or dots for scroll position.

- Back to Top Button: Enable to display a "Back to Top" button for easy navigation.

- Button Style: Customize the color and text of the "Load More" and "Back to Top" buttons to match your store's theme.

- Loading Icon: Upload a custom GIF or select a default icon for loading animations.

Advanced Settings

- **Debug Mode**: Select **Yes** to enable logs in var/log/elsner_infinitescroll.log for troubleshooting.

- **Exclude Categories**: Select specific categories to disable Infinite Scroll if needed.

- **Save**: Click **Save Config** and refresh caches in **System > Cache Management**.
