The Falcon difference

Safety, security and uncompromising value

At Falcon, we know that every product you sell not only has to meet local building codes, but also your expectations for performance and quality. We take your expectations seriously, and that's why we build our locks to deliver durability, convenience and unmatched value. After all, we've built our reputation on the same standards that you have – providing quality products at a reasonable price delivered on time. It's the way we do business and it's what makes Falcon locks a powerful choice no matter what your project.

RU/RW Series

Extra heavy-duty preassembled
unit locks

When you need to replace an existing notched-style lock and get up to code on ADA accessibility the Falcon RU/RW Series is a perfect fit. Designed specifically for retrofitting older and historical buildings, this unique lock combines old-fashioned styling with modern strength, security and convenience. Falcon RU/RW Series locks have an interchangeable core that can be removed for quick, easy re-keying. Our interchangeable cores are compatible with SFIC products from other manufacturers. And they're backed by one of the best names in the business.

Features

Deadlocks have full 1"
latches standard

Trim is solid, bar
stock brass

PressureRelease™

disengages when
locked to protect
internal mechanisms

Retrofit locks

The RU Series from Falcon is designed to retrofit existing unit locks manufactured by Falcon (Weiser), Corbin Russwin and Yale. It exceeds ANSI Grade 1 specifications and is UL/ULC listed. Incorporates Falcon's vandal resistant PressureRelease™ trim to prevent damage to internal mechanism. Installs with minimal rework to existing doors while preserving door and frame for cost effective project planning. Falcon's RU Series satisfies all ADA easy access requirements.

Features and benefits

Features include:

- Vandal resistant PressureRelease™ outside lever disengages when locked to prevent damage to internal mechanism.
- 3 lever designs.
- Complements Falcon's "family" of lever designs.
- "Power Spring™" in rose trim prevents lever sag.
- 12 commercial lock functions.
- 6 standard finishes: 605, 606, 612, 613, 625, 626.
- No exposed mounting screws.
- Solid bar stock deadlocking feature prevents latch binding and lock failure due to poor door alignment.
- Exceeds 800,000 cycle ANSI Grade 1 requirement.
- Meets or exceeds all other ANSI A156.2 rigorous Grade 1 specifications for key-in-lever products.

Benefits include:

- Preserves existing facility doors and frames.
- Preserves original architectural design without adapter plate or add-ons.
- Easy installation with minimal door modifications.
- Features a 4" square rose which covers existing mounting holes, most paint lines and required door rework.
- Complies with ADA easy access requirements.
- UL/ULC listed for 3 Hour A Label doors.
- Strikes available to match existing frame preparation.
- Reuse existing facility cylinders and key system.
- Non-handed chassis and field reversible trim and latch bolt for easy stocking and lower inventory cost.
- Key removable outside lever for easy cylinder replacement.
- Outside lever secured by a spring-loaded retainer. Retainer cannot be depressed when locks have been locked. Inside lever secured by a set screw. Levers have heavy-duty steel individual return springs in order to prevent lever sag.

RU Series specifications

Retrofit locksets shall be Falcon lock RU Series or equal and meet the following requirements:

- Exceeds ANSI A156.2 Grade1 key-in-lever specifications.
- Available with Falcon standard or interchangeable core cylinders in 6 and 7-pin configuration.
- Interchangeable core levers are non-removable with core installed.
- Available with some 6-pin competitor's keyways.
- Accepts interchangeable (removable) cores and standard 6-pin cylinders from the following manufacturers: Arrow, Assa, Best, Corbin Russwin (except Master-Ring), Medeco, Sargent, Schlage and Yale.
- PressureRelease™ (clutchable) outside lever.
- Heavy duty, solid levers are 5" long and have no inserts.
- No exposed mounting screws.
- Installs with 10-32 through-bolt screws with thread sealant for extra security and resistance to vibrating loose.
- Standard lock is for 1 3/4" thick doors. Also available for 2" and 2 1/4" thick doors.
- 2 3/4" backset only.
- ANSI strike standard.
- Optional OEM strikes available.

Levers

Levers are solid pressure cast zinc, finished to match mating parts. Roses are wrought brass or bronze, and are installed over pressure cast through-bolted rose inserts. Levers are secured by a spring-loaded retainer. Retainer cannot be depressed when locks have been locked.

Functions

To order Falcon lock RU Series locksets, please consult page 12 for ordering information and assistance.

 Indicates interchangeable core available.

Catalog number	Function	Description
RU101		Passage/closet latchset—Latch bolt by levers at all times.
RU301		Privacy lock—Latch bolt by levers. Outside lever locked by push button in inside lever. Rotating inside lever or closing door releases push button. Emergency release in outside lever unlocks door.
RU381	 	Entry/restroom lock—Deadlocking latch bolt by levers except when outside lever is locked by key inside, then by key outside. Inside lever is always locked.
RU411	 	Asylum lock—Deadlocking latch bolt by key from either side at all times. Both levers inoperable.
RU501	 	Entry lock—Push button locking. Button on inside locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.
RU511	 	Entry/office lock—Turn/push button locking. Pushing and turning button locks outside lever requiring use of key until button is manually unlocked. Push button locking. Pushing button locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.
RU521	 	Office lock—Turn button locking. Turning button locks outside lever requiring use of key until button is manually unlocked. Inside lever always free. Deadlocking latch bolt.
RU561	 	Classroom lock—Deadlocking latch bolt by levers. Outside lever is locked by key in outside lever. Inside lever is always free.
RU571	 	Dormitory lock—Deadlocking latch bolt by levers except when locked by push button in inside lever. Key in outside lever locks or unlocks lever and releases button. Closing door releases push button. Inside lever always free.
RU581	 	Storeroom lock—Deadlocking latch bolt by lever inside or key outside. Outside lever is inoperable. Inside lever always free.
RU851	 	Storeroom (electrified-fail safe)—Latch bolt operated by lever from either side except when outer lever is electrically locked. When outer lever is locked (inoperable), latch bolt retracted by key in cylinder outside dead locking latch bolt. 24V/DC .185AMPS.
RU881	 	Storeroom (electrified-fail secure)—Deadlocking latch bolt operated by lever inside at all times. Outside lever inoperable until electrically unlocked, then latch bolt from either side. When outside lever is inoperable, latch bolt retracted by key in cylinder outside.

Interchangeable cores

The Falcon Lock RU Series accepts the following manufacturers' interchangeable cores:

Interchangeable cores*

- Falcon
- Best
- Peaks (Kaba)
- Schlage
- Arrow
- Corbin Russwin
- Primus (Schlage)
- Yale - 32 Series
- Assa
- Sargent
- Medeco

* Locks must be modified for some cylinders. Be sure to specify manufacturer when ordering.

Interchangeable cores

Catalog number	Description
C606	For use in all RU Series I/C keyed locks – 6-pin (cover style)
C607	For use in all RU Series I/C keyed locks – 7-pin (cover style)
CB806	For use in all RU Series I/C keyed locks – 6-pin (cap style)
CB807	For use in all RU Series I/C keyed locks – 7-pin (cap style)

Note: Specify finish: 606 or 626. Specify keyway: "A" (standard or other keyway)

Standard cylinders

The Falcon Lock RU Series accepts the following manufacturers' 6-pin cylinders:

Standard 6-pin cylinders*

- Falcon
- Corbin Russwin
- Medeco
- Sargent
- Yale - Monolock - unit lock
- Arrow
- Peaks
- Schlage
- Assa
- Lori
- Primus (Schlage)
- Yale

*Locks must be modified for some cylinders. Be sure to specify manufacturer when ordering.

How to order

RU Series

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 8 each RU locksets in the 521 Office function, D (Dane) trim design, 626 finish, 1 ³/₄" latch height, 4 ⁷/₈" ANSI strike, less cylinder, prepared for Russwin I/C core with 2 ³/₄" backset latch, to accommodate doors 1 ³/₄" thick.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select catalog number. All catalog numbers shown in this catalog indicate 2 ³/₄" backset only. For thicker doors consult factory.
- **Trim design:** Indicate letter of lever design.
 - Example: A=Avalon; D=Dane; Q=Quantum.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). For split finishes, the outside is designated first, then the inside (605 x 625).
- **Latches:** 2 ³/₄" backset only.
- **Strikes:** 4 ⁷/₈" X 1 ¹/₄" ANSI standard. Optional retrofit strikes available: ³/₄", 4 ³/₁₆" and 4 ⁵/₃₂". See page 13 for more details.
- **Cylinder type:** Locks are furnished with Falcon's standard cylinder unless otherwise specified. See page 8 for details. When ordered "less cylinder" it is necessary to indicate which competitor's standard cylinder or I/C core the lockset must be prepared for.
 - Example: Less cylinder - Prepared for Russwin I/C core and whether the cylinder is 6 or 7 pin.
- **Door hand:** Specify hand RH/LH or RHR/LHR so latch may be assembled to outer trim properly. Field reversible.
- **Keying detail:** We suggest using the standard terms developed by the Door & Hardware Institute.
 - Example: AA1 - Grand master keyed, master keyed, change key 1.
- **Keyways:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available. See page 10.

8	RU521	D	626	1 ³ / ₄ "	Std	RHR	Less cylinder	Prepare for Russwin I/C core

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors. Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

Trim finishes chart

Retrofit re-lever kits

Falcon Lock's mortise lock "Re-lever kits" are a quick, cost-effective solution to meeting ADA requirements. The Retrofit re-lever kit allows installation of our top quality levers without removing the locking unit. Retrofits most manufacturer's mortise knob locks—even older style cast versions—with a high quality Falcon lever in ten minutes or less.

Three easy steps:

Step 1
Remove knob trim and cylinder.

Step 2
Insert spindle from kit into hub.
Place enclosed template over
spindle and drill (4) holes.

Step 3
Insert spindles in hubs and springs
in both levers. Position outer trim on
door, then through-bolt inner trim.
Reinstall cylinder, if necessary.

Falcon offers:

1. RW Series—Consists of a wrought, Napa style escutcheon with four mounting posts and die cast levers. Because the levers are die cast, the trim may be used on UL listed openings. Levers available: Avalon, Dane or Quantum.

How to order

Retrofit re-lever kits

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 12 each RW leversets for use in the passage function, D (Dane) trim design, 626 finish, right hand door.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select catalog number from below.
- **Trim design:** Indicate letter of lever design.
 - Example: A=Avalon; D=Dane; Q=Quantum.
- **Finish:** Specify ANSI finish number from below.
- **Function:** Specify current lock function for Retrofit.
- **Door hand:** Specify right hand or left hand.

How to order example

T Series

Grade 1, extra heavy-duty
cylindrical lever locks

Simply put, the Falcon T Series lock is the most versatile lockset in the industry. This extra heavy duty lock can accept any manufacturer's cylinder, and the cylinder can easily be removed for quick, easy re-keying. Redesigned with a compression spring behind the cylinder, the T Series is now stronger than ever and lever sag has been virtually eliminated. This adaptable lock is well suited to either new construction or retrofit use in buildings as varied as multi-family, retail, institutional and government/military.

Features

Cylindrical locks

Features

Door thickness: 1 ³/₄" to 2 ¹/₈" standard. Thin door adapter kit (A30775-000-00) available for doors thinner than 1 ³/₄", please specify door thickness.

Backset: 2 ³/₄" standard. 2 ³/₈" also available. Link (A22161-005-10) available for 5" backset.

Mechanism: Parts constructed of brass or cold formed steel, zinc plated and dichromated for rust resistance. Springs are stainless steel.

Attachment: Lock chassis secured to door by threaded mounting nuts. Completely preassembled outer trim and inner spindle assembly are through-bolted over chassis using (2) 10-32 screws. Adding rose and lever to inner spindle assembly completes installation.

Handing: Locks are non-handed.

Cylinders: Drilled with 6-pin chambers, pinned in 5. Pinning in 6 chambers available when specified, at no cost. 7-pin cylinders also available. Cylinder assemblies removable to rekey. Also available with 6 or 7-pin interchangeable core cylinders. Cylinder housings and plugs machined from solid brass. Springs are phosphor bronze. Two nickel silver keys furnished standard. Interchangeable core design is available for small format (SFIC) and large format for most manufacturers, see page 8.

Keyways: "G" keyway standard on conventional cylinders. "A" keyway standard on I/C core cylinders. Also available with some optional keyways.

Trim: Roses are heavy wrought brass or bronze, installed over pressure cast rose inserts which are through-bolted through door. Levers are pressure cast (solid levers—no inserts) material finished to match mating parts.

Latches: ⁹/₁₆" bolt projection, UL listed with latch faceplates 2 ¹/₄" x 1 ¹/₈" with square corners standard. ³/₄" projection, UL listed latch with 2 ³/₄" backset also available. Adjustable front standard. See page 10 for optional latches.

Strikes: 4 ⁷/₈" x 1 ¹/₄" ANSI strike with curved lip to meet ANSI A115.2 door frame preparation standard. Consult page 11 for other available strike sizes and configurations.

Screws: Furnished with combination screws for use in wood or metal doors and frames.

Electrified functions: Available in 24 VDC .185 AMP.

ANSI/BHMA: Meets ANSI/BHMA A156.2, Series 4000, Grade 1.

UL: 3 hour A label.

T Series specifications

Key-in-lever cylindrical locksets shall be Falcon lock T Series or equal and meet the following requirements:

- All locks shall meet the new ANSI/BHMA A156.2, Series 4000, Grade 1 for key-in-lever locksets.
- Locksets shall be UL Listed (3 hour A Label).
- Locksets shall be provided standard with Pressure Release™ feature. When outside lever is locked, it is not rigid but will move freely without operating the latch bolt.
- Lever trim shall have individual heavy-duty compression springs behind rose for lever return and to prevent lever sag. Trim shall be through-bolted with two (2) 10-32 screws coated with thread sealant to provide strength and resistance to loosening. Inner and outer trim shall "bottom out" to prevent door collapse. Roses shall be minimum of 3 ¹/₂" diameter.
- All lever designs shall be solid and meet the federal ADA and state disability requirements. Inside levers shall be attached by Allen-head set screw to prevent tampering or vandalism.
- Locksets shall adjust to fit door thickness from 1 ³/₄" to 2 ¹/₈".
- All locksets shall be non-handed and not require field disassembly for re-handing.
- Preparation for door must be non-handed. Acceptable manufacturer: Falcon lock

Levers

Levers are solid pressure cast zinc, finished to match mating parts. Roses are wrought brass or bronze installed over steel throughbolted rose inserts. Pressure Release™ levers are standard. Levers are secured by a spring-loaded retainer. Retainer cannot be depressed when locks have been locked.

Abrasive coated levers

All levers are available with abrasive coating along the length of the lever to identify entrances to hazardous areas to the handicapped. To order add: "with abrasive coated outer lever" in detail section of order.

High performance compression springs

Falcon T series locks feature our high performance compression springs. This newly designed spring far exceeds ANSI/BHMA requirements for cycle tests, and ensures the most robust support for levers. Unlike typical torsion springs that can break at the bend points, this new design will provide years of reliable service even in high-use applications. A retrofit kit is available to outfit your existing T series locks with this new, more robust spring design.

Machined steel lever spindle carries high levels of torque and shear. This spindle is re-used when upgrading existing locks to the new design.

Heavy-duty case zinc rose insert accommodates the new style spring. This insert is replaced when upgrading to the new design.

New stamped steel torque plates hold the springs in place and transfer the spring energy to the spindle and lever assembly.

Stainless steel compression springs replace steel torsion springs, providing the most reliable and robust method of supporting levers.

New retaining ring holds the assembly together.

Functions

To order Falcon T Series locksets, please consult page 29 for ordering information and assistance.

 Indicates interchangeable core available.

Catalog number	Function	Description	ANSI no. & grade
T101		Passage/closet latchset—Latch bolt by levers at all times.	F75-1
T301		Privacy lock—Latch bolt by levers. Outside lever locked by push button in inside lever. Rotating inside lever or closing door releases push button. Emergency release in outside lever unlocks door.	F76-1
T351		Closet lock—Deadlocking latch bolt by turn knob inside or lever outside except when outside lever is locked by key.	
T381		Classroom security lock—Deadlocking latch bolt by levers from either side except when outside lever is locked by key from inside. Outside key only retracts latch. Outside lever is locked and unlocked only by inside key.	F88-1
T411		Asylum lock—Deadlocking latch bolt operated by key in lever from either side. Both levers always inoperable.	F87-1
T501		Entry lock—Push button locking. Button on inside locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.	F82-1
T511		Entry/office lock—Turn/push button locking. Pushing and turning button locks outside lever requiring use of key until button is manually unlocked. Push button locking. Pushing button locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.	F109-1
T521		Office lock—Turn button locking. Turning button locks outside lever requiring use of key until button is manually unlocked. Inside lever always free. Deadlocking latch bolt.	F81-1
T561		Classroom lock—Deadlocking latch bolt by levers. Outside lever is locked by key in outside lever. Inside lever is always free.	F84-1
T571		Dormitory lock - Deadlocking latch bolt by levers except when locked by push button in inside lever. Key in outside lever locks or unlocks outside lever and releases button. Closing door releases push button. Inside lever always free.	F90-1
T581		Storeroom lock—Deadlocking latch bolt by lever inside or key outside. Outside lever is inoperable. Inside lever always free.	F86-1
T851		Storeroom (electrified – fail safe)—Inside Lever Always Free. Latch bolt operated by lever from either side except when outer lever is electrically locked. When outer lever is locked (inoperable), latch bolt retracted by key in cylinder outside. 24 volt DC .185 Amps, continuous duty.	
T881		Storeroom (electrified – fail secure)—Inside lever always free. Deadlocking latch bolt operated by lever inside at all times. Outside lever inoperable until electrically unlocked, then latch bolt from either side. When outside lever is inoperable latch bolt retracted by key in cylinder outside. 24 volt DC .185 Amps, continuous duty..	
T12		Dummy trim—Single trim-surface mounted rigid lever.	

Cylinders

The Falcon T Series accepts the following competitors standard 6-pin cylinders and interchangeable cores:

Standard 6-pin cylinders*

- Arrow
- Assa
- Corbin Russwin
- Lori
- Medeco
- Primus (Schlage)
- Sargent
- Schlage
- Yale

I/C removable cores*

- Arrow
- Best
- Corbin Russwin
- Medeco Keymark
- Medeco 32 Series
- Peaks (Kaba)
- Primus (Schlage)
- Sargent
- Schlage
- Yale

*Locks must be modified for some cylinders. Be sure to specify manufacturer when ordering.

Construction keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost pin system” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

“Disposable construction” interchangeable cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

Locks with “Lost pin system”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

Construction key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin. consists of one construction pin and a shallow hole in the side of the plug.

Master key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

Locks with Blockokey® cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

How to order locks with Blockokey® cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.

Example: 72 Each B511 D 626 1AA-72AA (Blockokey)

How locks with Blockokey® cylinders are used

Project key—KB531

Lock cylinder is operated by the special “project key.” The last two pins in the cylinder are held inoperative by the key block.

Removal tool—KB536

The special “project key” is canceled out by removal of the key block. A key block removal tool is furnished with the Master keys for the locks. Simply push the removal tool into the keyway, then withdraw it to remove the block. Thereafter, the “project key” will no longer operate the lock cylinder.

Change or master key—KB578

Cylinder is now only operable by the regular change key or Master key.

How to order

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 12 each T locksets in the 571 Dormitory function, D (Dane) trim design in a 626 (satin chrome) finish, with 2 3/4" backset latch, to accommodate doors 1 3/4" thick.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select function number, cylinder type, and latch style from tables in this section.
- **Trim design:** Indicate letter of lever design required.
– Example: AVA=Avalon; DAN=Dane; QUA=Quantum.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). For split finishes, the outside is designated first, then the inside (605 x 625).
- **Latches:** 2 3/4" backset is standard. Adjustable front standard. A Grade 2 latch with a 1" faceplate in 2 3/8" and 2 3/4" backset also available. See page 10. All latches are UL listed 3 Hour.
- **Strikes:** 4 7/8" x 1 1/4" ANSI standard. Optional T-strike or full lip strike available. See page 11.
- **Cylinder type:** 6 pin is standard. For 7-pin add PD7 to product catalog numbers (eg. T501PD7 QUA).
- **Keying detail:** We suggest using the standard terms developed by DHI (Door and Hardware Institute) or ALOA (Associated Locksmiths of America Inc).
– Example: AA1 - Grand Master keyed, Master keyed, change key 1.
- **Interchangeable core:** To order product capable of accepting an interchangeable core, add suffices from the keying table to the function number, preceding the latch style.
– Example: T511JD will be supplied with a FSIC prepped lever to accept a competitor full size interchangeable core.
- **Keyways:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available. See current pricebook.
- **Additional keys:** Note the total number of keys required.
- **Large bow keys:** Add—"with large bow keys."

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances, and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

X Series

Grade 1, heavy-duty cylindrical knob locks

When you need a tough, reliable lock that can also withstand the corrosive conditions of a marine environment you need a Falcon X Series lock with our XC construction. The XC option provides a stainless steel and nonferrous constructed chassis that, when paired with stainless steel trim, provides a Grade 1 lock that is resistant to corrosion when exposed to moisture and salt. This full knob line features an interchangeable core that can be removed for quick, easy re-keying. Our interchangeable cores are compatible with SFIC products from other manufacturers. And they're backed by one of the best names in the business.

Features

Cylindrical locks

Features

Door thickness: 1 ³/₈" to 1 ⁷/₈" doors. Locks for thicker doors also available. Consult factory.

Backset: 2 ³/₄" standard. 2 ³/₈" also available.

Mechanism: Parts constructed of brass or cold formed steel, zinc plated and dichromated for rust resistance. Springs are stainless steel. XC Series available with all internal parts of stainless steel or other nonferrous materials.

Attachment: Locks secured to door by threaded collars. Inner collar tightened by special wrench furnished with each lock. Outer rose contains locking plate to prevent unauthorized removal.

Handing: Specify hand of door when ordering. Field reversible.

Cylinders: Drilled with 6-pin chambers, pinned in 5. Pinning in 6 chambers available when specified, at no cost. 7-pin cylinders available in Hana design. Cylinder assemblies removable to rekey or change hand of lock. Also available with 6 or 7-pin interchangeable core cylinders—Elite and Troy designs. Cylinder housings and plugs machined from solid brass. Springs are phosphor bronze. Two nickel silver keys furnished standard. See page 8.

Keyways: "G" keyway standard on standard cylinders. "A" keyway standard on I/C core cylinders. Also available with other keyways and some competitor keyways. See pages 9-10.

Trim: Roses are heavy wrought brass, bronze or stainless steel, installed over wrought steel reinforcing plates. Knobs are brass, bronze or stainless steel secured by a steel knob retainer which cannot be depressed when lock has been locked. See individual designs on pages 5-6 for details.

Latches: ⁹/₁₆" bolt projection, UL Listed for A-label applications. Standard latch faceplates 2 ¹/₄" x 1 ¹/₈" with square corners to accommodate beveled or flat front doors. ³/₄" projection, UL Listed latch with 2 ³/₄" backset also available.

Strikes: 47/8" x 1 1/4" ANSI strike with curved lip to meet ANSI A115.2 standard door frame preparation standard. Consult Options and Accessories section for other strike sizes and configurations.

Screws: Furnished with combination wood/machine screws for use in wood or metal doors and frames.

ANSI/BHMA: Meets ANSI/BHMA A156.2, Series 4000, Grade 1.

UL: 3 hour A label.

X Series specifications

Key-in-knob cylindrical locksets shall be Falcon Lock X Series or equal and meet the following requirements:

- All locksets and latchsets shall meet Grade 1 requirements of ANSI/BHMA 156.2, Series 4000.
- Locksets and latchsets shall be UL Listed for use on 3 hour A label doors.
- Locksets and latchsets shall have 3 ¹/₄" diameter round roses.
- Knobs shall be .050" minimum thickness. keyway standard on I/C core cylinders. Also available with other keyways and some competitor keyways. See pages 9-10.
- There shall be no exposed screws on trim.
- Locksets and latchsets shall have threaded collars for easy door thickness adjustment on both sides of lock.
- Cylinders shall have a minimum of 6 active pin chambers and shall be furnished with 2 nickel silver keys.
- Locksets shall have 6-pin (or 7-pin) interchangeable cores.

Knob designs

Knobs and roses

Knobs and roses are wrought brass, bronze or stainless steel (Troy) installed over steel or nonferrous reinforcing plates. Knobs are secured by a spring-loaded retainer. Retainer cannot be depressed when locks have been locked.

Abrasive coated knobs

All trim is available with abrasive coating around the circumference of the knob to identify entrances to hazardous areas to the handicapped. To order, add: "with abrasive coated outer knob" in detail section of order.

Knurled knobs

All heavy duty knobs are available knurled to identify entrances to hazardous areas for the handicapped. To order add: "with knurled knob" (outer or inner) in detail section of order.

Functions

To order Falcon T Series locksets, please consult page 29 for ordering information and assistance.

 Indicates interchangeable core available.

Catalog number	Function	Description	ANSI No. & Grade
X101		Passage/closet latchset—Latch bolt by knobs at all times.	F75-1
X301		Privacy lock—Latch bolt by knobs. Outside knob locked by push button in inside knob. Rotating inside knob or closing door releases push button. Emergency release in outside knob. Emergency Release Tool 001423-001-30.	F76-1
X411		Asylum lock—Deadlocking latch bolt by key from either side. Both knobs rigid.	F87-1
X501		Entry lock—Push button locking. Button on inside locks outside knob until unlocked by key or by rotating inside knob.	F82-1
X511		Entry/office lock—Turn/push button locking. Pushing and turning button locks outside knob requiring use of key until button is manually unlocked. Push button locking. Pushing button locks outside knob until unlocked by key or by turning inside knob.	F109-1
X521		Office lock—Turn button locking. Turning button locks outside knob requiring use of key until button is manually unlocked. Inside knob always free.	F81-1
X561		Classroom lock—Deadlocking latch bolt by knobs. Outside knob is locked by key in outside knob. Inside knob is always free.	F84-1
X571		Dormitory lock—Deadlocking latch bolt by knobs except when locked by push button in inside knob. Key in outside knob locks or unlocks outside knob and releases button. Closing door releases push button. Inside knob always free.	F90-1
X581		Storeroom lock—Deadlocking latch bolt by inside knob or key outside. Outside knob rigid.	F86-1
X12		Dummy trim—Single trim—surface mounted.

Construction keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost pin system” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

“Disposable construction” interchangeable cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

Locks with “Lost pin system”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

Construction key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin. Consists of one construction pin and a shallow hole in the side of the plug.

Master key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

Locks with Blockokey® cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

How to order locks with Blockokey® cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.

Example: 72 Each B511 D 626 1AA-72AA (Blockokey)

How locks with Blockokey® cylinders are used

Project key—KB531

Lock cylinder is operated by the special “project key.” The last two pins in the cylinder are held inoperative by the key block.

Removal tool—KB536

The special “project key” is canceled out by removal of the key block. A key block removal tool is furnished with the Master keys for the locks. Simply push the removal tool into the keyway, then withdraw it to remove the block. Thereafter, the “project key” will no longer operate the lock cylinder.

Change or master key—KB578

Cylinder is now only operable by the regular change key or Master key.

All effort has been made to make this information comprehensive. Since no two products are exactly alike, this data represents those products which are similar. This information was obtained from trade services and is not guaranteed nor meant to represent any product as equal to any other product.

How to order

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 20 each X locksets in the 301 Privacy function, EG (Elite-Gala) trim design in a 626 (satin chrome) finish, with 2 3/4" backset latch, to accommodate doors 1 3/4" thick.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select function number, cylinder type, and latch style from tables in this section.
- **Trim design:** Indicate letter of knob/rose design. EG = Elite/Gala; HY = Hana/York. Outside design always proceeds inside design on split designs.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). Outside finish always precedes inside finish on split finishes (605 x 625).
- **Latches:** 2 3/4" backset is standard. 2 3/8" backset available. All latches are UL listed 3-hour A label.
- **Strikes:** 4 7/8" x 1 1/4" ANSI standard. Optional T-strike or full lip strike available. See page 12.
- **Cylinder type:** 6-pin standard. For 7 pin add PD7 to product catalog numbers (eg. X511PD7 HAN). 7 pin conventional cylinders are available in Hana knob style only.
- **Door hand:** Locks are field reversible. Please specify handing on all keyed locks so that cylinders can be assembled in the upright position.
- **Keying detail:** We suggest using the standard terms developed by DHI (Door and Hardware Institute).
 - Example: AA1 - Grand Master keyed, Master keyed, change key 1.
- **Interchangeable core:** To order product capable of accepting an interchangeable core, add suffices from the keying table to the function number, preceding the latch style.
 - Example: X511HD will be supplied with SFIC keyed construction core.
- **Keyways:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available.
- **Additional keys:** Note the total number of keys required.
- **Large bow keys:** Add—"with large bow keys."

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances, and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

B Series

Grade 2, medium-duty cylindrical lever locks

When you need a tough, reliable lock for a government/military, retail, industrial or multi-family project, you need a Falcon B Series lock. Our full line of Grade 2 locksets are a perfect replacement for existing locks, or a smart spec in new construction. With upgraded finishes these locks deliver style as well as strength. Falcon B Series locks feature an interchangeable core that can be removed for quick, easy re-keying, and are compatible with SFIC products from other manufacturers. Most important, they're backed by one of the best names in the business.

Features

Heavy wrought brass or bronze roses over steel through-bolted rose inserts

UL Listed 1 1/2 hour

Cylinder housings and plugs machined from solid brass

Brass or cold-formed steel construction with zinc dichromate plating for rust resistance

Cylindrical locks

Features

Door thickness: 1 $\frac{3}{8}$ " to 2" standard.

Backset: 2 $\frac{3}{4}$ " standard. 2 $\frac{3}{8}$ " also available.

Mechanism: Parts constructed of brass or cold formed steel, zinc plated and dichromated for rust resistance. Springs are stainless steel.

Attachment: Lock chassis secured to door by two screws which pass through a steel rose insert inside and thread directly into the outer rose mounting assembly.

Handing: Locks are non-handed.

Cylinders: Drilled with 6-pin chambers, pinned in 5. Pinning in 6 chambers available when specified, at no cost. Cylinder assemblies removable to rekey. Also available with 6 or 7-pin interchangeable core cylinders. Cylinder housings and plugs machined from solid brass. Springs are phosphor bronze. Two nickel silver keys furnished standard.

Competitor cylinders: The B Series accepts these standard 6-pin cylinders: Assa, Kaba, Lori, Medeco, Primus and Schlage.

Keyways: "G" keyway standard on standard cylinders. "A" keyway standard on I/C core cylinders. Also available with some optional keyways. See page 9.

Trim: Roses are 3 $\frac{1}{2}$ " diameter, heavy wrought brass or bronze, installed over steel rose inserts which are through-bolted through door. Levers are pressure cast zinc (solid levers no inserts) material finished to match mating parts.

Latches: $\frac{1}{2}$ " bolt projection. UL (3-hour, A Label) listed. Latches have self-adjusting fronts to accommodate beveled or flat doors. 2 $\frac{3}{8}$ " backset with 2 $\frac{1}{4}$ " x 1" latchfaces, 2 $\frac{3}{4}$ " backset with 2 $\frac{1}{4}$ " x 1 $\frac{1}{8}$ " latchfaces. Deadlocking latches have a solid round bar stock DL bar preventing latch jamming and/or lock outs.

Strikes: 4 $\frac{7}{8}$ " x 1 $\frac{1}{4}$ " ANSI strike with curved lip to meet ANSI A115.2 door frame preparation standard. Consult Options and Accessories section for other available strike size and configurations.

Screws: Furnished with combination screws for use in wood or metal doors and frames.

ANSI/BHMA: Exceeds ANSI/BHMA A156.2, Series 4000, Grade 2.

UL: 3 hour, A label.

B Series specifications

Key-in-lever cylindrical locksets shall be Falcon B Series or equal and meet the following requirements:

- All locks shall meet the new ANSI/BHMA A156.2, Series 4000, Grade 2 test requirements for key-in-lever locksets.
- Locksets shall be UL Listed 3-hour, A Label.
- Lever trim shall have individual heavy-duty springs for lever return and to prevent lever sag. Trim shall be through-bolted with screws coated with thread sealant to provide strength and resistance to loosening.
- Roses shall be 3 $\frac{1}{2}$ " diameter.
- All lever designs shall be solid (no inserts) and meet the federal ADA and state disability requirements.
- Locksets shall adjust to fit door thickness from 1 $\frac{3}{8}$ " to 2".
- All locksets shall be non-handed and not require field disassembly for re-handing.
- Preparation for door must be non-handed. Acceptable manufacturer: Falcon lock

Lever designs

Levers

Levers are solid pressure cast zinc, finished to match mating parts. Roses are wrought brass or bronze installed over steel through-bolted rose inserts. Levers are secured by a spring-loaded retainer. Retainer in keyed lever cannot be depressed without key.

D
Dane

Q
Quantum

Abrasive strip levers

All levers are available with an abrasive strip along the inside length of the lever to identify entrances that may be hazardous to the handicapped. To order, change trim designation to: 6DA (Dane) or 6QU (Quantum) in trim section of order. Not available on 613 finish as abrasive strip will not hold.

Functions

To order Falcon B Series locksets, please consult page 29 for ordering information and assistance.

 Indicates interchangeable core available.

Catalog number	Function	Description	ANSI number & grade
B101		Passage/closet latchset—Latch bolt by levers at all times.	F75-2
B161		Communicating/exit latch—Deadlocking latch bolt by inside lever. Non-removable blank plate outside.	
B301		Privacy lock—Latch bolt by levers. Outside lever locked by push button in inside lever. Rotating inside lever or closing door releases push button. Emergency release in outside lever unlocks door.	F76-2
B341	 	Connecting room/exit lock—Deadlocking latch bolt by inside lever except when locked by key. Non-removable blank plate outside ($2\frac{2}{32}$ " projection).	
B501	 	Entry lock—Push button locking. Button on inside locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.	F82-2
B511	 	Entry/office lock—Turn/push button locking. Pushing and turning button locks outside lever requiring use of key until button is manually unlocked. Push button locking. Pushing button locks outside lever until unlocked by key or by rotating inside lever. Inside lever always free. Deadlocking latch bolt.	F109-2
B561	 	Classroom lock—Deadlocking latch bolt by levers. Outside lever is locked by key in outside lever. Inside lever is always free.	F84-2
B581	 	Storeroom lock—Deadlocking latch bolt by lever inside or key outside. Outside lever is rigid. Inside lever is always free.	F86-2
B611	 	Assisted living lock—Deadlocking latch bolt by levers except when locked by push button on inside lever. Key in outside lever locks or unlocks outside lever and releases button. Closing door releases push button. Inside lever is always free.	
B12		Dummy trim—Single trim. Surface mounted rigid lever.

012191-003-70
1/2" deep. May be used with
any 2 ³/₄" high (T) strike.

Construction keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost pin system” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

“Disposable construction” interchangeable cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

Locks with “Lost pin system”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

Construction key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin.

Master key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

Locks with Blockokey® cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

How to order locks with Blockokey® cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.

Example: 72 Each B511 D 626 1AA-72AA (Blockokey)

MProject key—KB531

Lock cylinder is operated by the special “project key.” The last two pins in the cylinder are held inoperative by the key block.

MProject Key—KB531

The special “project key” is canceled out by removal of the key block. A key block removal tool is furnished with the Master keys for the locks. Simply push the removal tool into the keyway, then withdraw it to remove the block. Thereafter, the “project key” will no longer operate the lock cylinder.

Change or master key—KB578

Cylinder is now only operable by the regular change key or Master key.

How to order

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 12 each B locksets in the 301 Privacy function, D (Dane) trim design in 626 (satin chrome) finish, with 2 3/4" backset latch, to accommodate doors 1 3/4" thick.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select catalog number.
- **Trim design:** Indicate letter of lever design.
 - Example: D=Dane; Q=Quantum.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). For split finishes, the outside is designated first, then the inside (605 x 625).
- **Latches:** 2 3/4" backset standard. 2 3/8" backset available. All latches are UL Listed 1 1/2 hour B Label.
- **Strikes:** 4 7/8" X 1 1/4" ANSI standard. Optional T-strike or full lip strike available. See page 7.
- **Cylinder type:** For 6-pin, add 6-pin.
- **Keying detail:** We suggest using the standard terms developed by A.H.C. (Architectural Hardware Consultants).
 - Example: AA1 - Grand master keyed, master keyed, change key 1.
- **Interchangeable core:** To order product capable of accepting an interchangeable core, add "FIC" (for interchangeable core). To order product with an interchangeable core, add "WIC" (with interchangeable core).
- **Keyways:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available. See page 7.
- **Additional keys:** Note the total number of keys required. Large bow keys: Add—"with large bow keys."

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

W Series

Grade 2, medium-duty cylindrical
lever and knob locks

Whether your application is government/military, retail, industrial or multi-family, there's a W Series lock that fits perfectly. In two popular lever and two popular knob styles Falcon can match most commercial door trim. The Falcon W Series locks feature conventional cylinders and small format interchangeable cores that are compatible with SFIC products from other manufacturers. Our conventional cylinders are available in all Falcon conventional key sections as well as Schlage C keyway, which we now masterkey across the complete Falcon product line. If quality product at a value price is what you are looking for, the Falcon W Series is the lock for you. And they're backed by one of the best names in the business, Allegion.

Features

Cylindrical lever and knob locks

Features and specifications

W Series standard rose

Door thickness: 1³/₈" to 1³/₄" standard.

Backset: 2³/₄" standard; 2³/₈" also available.

Mechanism: Parts constructed of brass or cold-formed steel, zinc plated and dichromated for rust resistance. Springs are stainless steel.

Attachment: Lock chassis secured to door by two screws which pass through a steel rose insert inside and thread directly into the outer rose-mounting assembly, and two screws that screw into the chassis assembly.

Handing: Locks are non-handed.

Cylinder: Pinning in six chambers. Cylinder assemblies removable to re-key. Also available with 6- or 7-pin interchangeable core cylinders. Cylinder housings and plugs machined from solid brass. Springs are stainless steel. Two nickel silver keys furnished standard.

Competitor cylinder: The W Series accepts standard 6-pin cylinders available from Falcon, as well as Schlage, Corbin-Russwin, Yale and Sargent.

Keyways: "G" keyway standard on Falcon standard cylinders. "A" keyway standard on I/C core cylinders. Also available with some optional keyways. Schlage "C" keyway also available on standard cylinders, includes master key. Master keying available on all Falcon and Schlage "C" keyways.

Trim: Roses are heavy wrought brass or bronze, installed over steel rose inserts which are through-bolted through door. Levers are pressure-cast zinc (solid levers-no-inserts) finished to match mating parts.

Latches: 1/2" bolt projection made of stainless steel and UL listed for 3-hour door assemblies. Latches have self-adjusting fronts to accommodate beveled or flat doors. 2³/₈" backset with 1" x 2 1/4" latch faces or 2³/₄" backset with 1 1/8" x 2 1/4" latch faces.

Strikes: 4 7/8" x 1 1/4" ANSI strike with curved lip to meet ANSI A115.2 door frame preparation standard. Consult Options and Accessories section for other available strikes, sizes and configurations.

Screws: Furnished with combination screws for use in wood or metal doors and frames.

ANSI/BHMA: Meets ANSI/BHMA A156.2, Series 4000, Grade 2.

UL: 3-hour A label.

W Series small rose

Door thickness: 1³/₈" to 1³/₄" standard.

Backset: 2³/₈", 2³/₄" standard.

Mechanism: Parts constructed of brass or cold-formed steel, zinc plated and dichromated for rust resistance. Springs are stainless steel.

Attachment: Lock chassis secured to door by two screws which pass through a steel rose insert inside and thread directly into the outer rose-mounting assembly, and two screws that screw into the chassis assembly.

Handing: Locks are non-handed.

Cylinder: Pinning in six chambers. Cylinder assemblies removable to re-key. Also available with 6- or 7-pin interchangeable core cylinders. Cylinder housings and plugs machined from solid brass. Springs are stainless steel. Two nickel silver keys furnished standard.

Competitor cylinder: The W Series accepts standard 6-pin cylinders available from Falcon, as well as Schlage, Corbin-Russwin, Yale and Sargent.

Keyways: "G" keyway standard on Falcon standard cylinders. "A" keyway standard on I/C core cylinders. Also available with some optional keyways. Schlage "C" keyway also available on standard cylinders, includes master key. Master keying available on all Falcon and Schlage "C" keyways.

Trim: Roses are heavy wrought brass or bronze, installed over steel rose inserts which are through-bolted through door. Levers are pressure-cast zinc (solid levers-no-inserts) finished to match mating parts.

Latches: 1/2" bolt projection made of stainless steel and UL listed for 3-hour door assemblies. Latches have self-adjusting fronts to accommodate beveled or flat doors. 2³/₄" backset with 1 1/8" x 2 1/4" latch faces.

Strikes: 4 7/8" x 1 1/4" ANSI strike with curved lip to meet ANSI A115.2 door frame preparation standard. Consult Options and Accessories section for other available strikes, sizes and configurations.

Screws: Furnished with combination screws for use in wood or metal doors and frames.

ANSI/BHMA: Meets ANSI/BHMA A156.2, Series 4000, Grade 2.

UL: 3-hour A label.

Cylindrical lever and knob locks

Features and specifications (continued)

W Series specifications

Key-in-lever cylindrical locksets shall be Falcon W Series or equal and meet the following requirements:

- All locks shall meet ANSI/BHMA A156.2, Series 4000, Grade 2 test requirements for key-in-lever locksets.
- Locksets shall be UL Listed 3-hour, A Label.
- Lever trim shall have individual heavy-duty springs for lever return and to prevent lever sag. Trim shall be through-bolted.
- All lever designs shall be solid (no inserts) and meet the federal ADA and state disability requirements.
- Locksets shall adjust to fit door thickness from $1\frac{3}{8}"$ to $1\frac{3}{4}"$.
- All locksets shall be non-handed and not require field disassembly for re-handing.
- Preparation for door must be non-handed. Acceptable manufacturer: Falcon lock

Door templating

W Series standard rose

W Series small rose

Lever designs

Levers

Levers are solid pressure cast zinc, finished to match mating parts. Roses are wrought brass or bronze installed over steel through-bolted rose inserts. A spring-loaded retainer secures levers. Secure side retainer cannot be depressed without a key that operates the lock.

Construction keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost pin system” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

“Disposable construction” interchangeable cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

Locks with “Lost pin system”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

Construction key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin.

Master key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

Locks with Blockokey® cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

How to order locks with Blockokey® cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.

Example: 72 W511PD DAN 626 RH 30-209 30-149 1AA-72AA (Blockokey)

Project key—KB531

Operation of the lock cylinder is by the special “project key.” The last two pins in the cylinder are inoperative because of the “key block” mechanism.

Removal tool — KB536

The “project key” no longer operates the cylinder when the “key block” mechanism is removed. A key block removal tool comes with the master keys for the locks. Push the removal tool into the keyway and then withdraw it to remove the block. Thereafter the project key will no longer operate the lock cylinder.

Change or master key—KB578

Cylinder is now only operable by the regular change key or Master key.

All effort has been made to make this information comprehensive. Since no two products are exactly alike, this data represents those products which are similar. This information was obtained from trade services and is not guaranteed nor meant to represent any product as equal to any other product.

How to order

For correct ordering and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example to the right shows an order for 12 each W locksets in the 581 storeroom function, QUA (Quantum) trim design in a 626 (satin chrome) finish, with a 2 3/4" backset latch, to accommodate doors 1 3/4" thick.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select function number, cylinder type, and latch style from tables in this section.
- **Trim design:** Indicate letter of lever design. DAN = Dane; QUA = Quantum; ELI = Elite; HAN = Hana. If Falcon W Series small rose is required, specify SR = Small Rose. Outside design always proceeds inside design on split designs. If adding an abrasive lever option, add 6 to design code (example 6DAN).
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). Outside finish always precedes inside finish on split finishes (605 x 625).
- **Latches:** 2 3/4" backset is standard. 2 3/8" backset available. All latches are UL listed 3-hour A label.
- **Strikes:** 4 7/8" x 1 1/4" ANSI standard. For other options, see page 12.
- **Cylinder type:** 6-pin.
- **Keying detail:** We suggest using the standard terms developed by DHI (Door and Hardware Institute) or ALOA (Associated Locksmiths of America).
 - Example: AA1 - Grand Master keyed, Master keyed, change key 1.
- **Interchangeable core:** To order product capable of accepting an interchangeable core, add suffices from the keying table to the function number, preceding the latch style.
 - Example: W511HD will be supplied with SFIC keyed construction core.
- **Keyways:** "G" is standard on regular cylinders. "A" is standard on interchangeable cores. Other keyways available. See page 9.
- **Additional keys:** Note the total number of keys required.
- **Large bow keys:** Add—"with large bow keys" under additional details.

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances, and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

Auxiliary locks

Deadlocks and deadbolts

Deadbolt locks provide an extra measure of protection against break-in when used as a supplement to an existing lockset. In applications ranging from military and government projects to multi-family housing, retail and restaurants, Falcon deadbolts deliver superior performance and the flexibility of multiple keying systems. Our full line of Grade 1 and 2 auxiliary locks feature interchangeable cores that are compatible with SFIC products from other manufacturers. And they're backed by Allegion, the best name in the business.

Features

*Grade 1 - High strength steel - powdered
Grade 2 - Zinc

D100 Series

Grade 1, heavy-duty deadlocks

Features

Door thickness: $1\frac{3}{8}"$ to $1\frac{3}{4}"$ Up to $2\frac{1}{4}"$ door thickness also available.

Backsets: $2\frac{3}{8}"$ - $2\frac{3}{4}"$ adjustable deadbolt.

Attachment: Locks are solidly attached to the door by $\frac{1}{4}"$ heat-treated steel bolts. These bolts pass through a steel plate (D111, D121 and D141) or the inner cylinder housing (D131) and thread directly into the back of the outer cylinder housing.

A permanent cap is inserted over the inside cylinder (D131) making the bolts nearly impossible to remove.

Handing: Non-handed. May be used on right hand or left hand doors swinging in or out.

Cylinders: Furnished with solid brass plug and housing, drilled with 6-pin chambers, pinned in 5 unless otherwise specified. Also available with 7-pin cylinders. Available with 6 or 7-pin interchangeable cores. Furnished with two (2) nickel silver keys standard.

Keyways: "G" keyway standard on conventional cylinders. "A" keyway standard on I/C core cylinders. Also available with some optional keyways.

Exposed trim: Wrought brass or bronze reinforced with steel insert.

Deadbolts: Deadbolt locks are furnished with deadbolts which have a full 1" projection. Housed within the deadbolt is a free-turning, $\frac{1}{4}"$ thick, hardened steel, saw-resistant roller. Furnished standard with $2\frac{3}{8}"$ - $2\frac{3}{4}"$ adjustable backset and $1\frac{1}{8}"$ x $2\frac{1}{4}"$ faceplate. Optional 1" x $2\frac{1}{4}"$ faceplate. Consult Options and Accessories section for other optional faceplates. D100 bolt is high strength steel.

Strikes: $2\frac{3}{4}"$ x $1\frac{1}{8}"$ lipless strike standard. ANSI 4 $\frac{7}{8}"$ x $1\frac{1}{4}"$ lipless, $2\frac{1}{4}"$ full lip strikes, a $2\frac{3}{4}"$ x $1\frac{1}{8}"$ T-strike or a security strike are available. Consult options and accessories section.

Screws: Furnished with wood/machine screws for use on wood or metal doors or frames.

ANSI/BHMA Standard: A156.5, 2001, Grade 1.

H Series

Interconnected locks

Features

Door thickness: 1³/₈" to 1³/₄".

Backset: 2³/₄" standard, 2³/₈" also available.

Attachment: Outer trims secured to the door by thru-bolts through a steel plate on the inside of the door. Inside escutcheon conceals mounting screws.

Handing: Specify hand of door when ordering. Field reversible.

Cylinders: "G" keyway standard. Drilled in 6 chambers, pinned in 5. Pinning in 6 chambers available when specified. Also available with 6 or 7-pin interchangeable core cylinders in H101 function only.

Trim: Roses are wrought brass, bronze or stainless steel, installed over wrought steel reinforcing plates. Knobs are brass, bronze or stainless steel secured by steel knob retainer which cannot be depressed when lock has been locked.

Latches: 1/2" projection, deadbolt has 1" projection with 1/4" hardened steel security roller. 2³/₄" backset with 2¹/₄" x 1¹/₈" latchface. 2³/₈" backset with 2¹/₄" x 1" latchface. Other latchfaces available.

Strikes: (1) 2³/₄" x 1¹/₈" T-strike and (1) 2³/₄" x 1¹/₈" lipless strike.

Mechanism: Cold formed steel, zinc plated and dichromated for rust resistance.

Certification: UL Listed 1¹/₂ Hour B Label. Lever-style trim complies with Title 19, California State Fire Marshal and all ADA and barrier-free codes.

Trim design dimensions

Trim design	Knob or lever	Rose diameter	Projection
H	2 ¹ / ₈ "	3"	2 ³ / ₄ "
E	2"	3"	2 ³ / ₄ "
D	4"	3"	2 ¹ / ₂ "

K900 Series

Padlocks

A pin tumbler padlock manufactured from solid bar stock brass, with chrome-plated, case-hardened steel shackle. The entire cylinder assembly is removable for easier rekeying or quick cylinder change. Note: Key is removable in locked position. Padlocks with longer shackles (2" or 6") available when specified. 1" shackle is standard.

Cylinders: Furnished with solid brass plug and housing, drilled with 6-pin chambers, pinned in 5 unless otherwise specified. Also available with 7-pin cylinder. Furnished with two (2) nickel silver keys standard.

Keyways: "G" keyway standard on standard cylinders.

Interchangeable core (SFIC) padlocks, branded Schlage, are also available. See pricebook for details.

955 Deadlocking type padlock

Catalog number	Function	Description	ANSI no.
H101		Entry single locking—Latch bolt operated by knob or lever from either side. Rotating turn from inside or key from outside extends dead bolt. Dead bolt and latch bolt retract by rotating inside knob or lever.	F94
H451		Hotel/motel lock—Deadlocking latch bolt operated by key outside or rotating inside knob/lever. Outside knob/lever rigid. Rotating turn from inside or emergency key outside extends dead bolt. Both deadbolt and deadlocking latch bolt retract by rotating inside knob/lever. Depressing spanner button in inside knob/lever operates visual indicator shutting out all keys except emergency key. Rotation of inside spanner button provides lockout feature. Levers are available only on the inside trim of this function.	F100
H461		Hotel/motel lock—Deadlocking latch bolt operated by key outside or rotating inside knob/lever. Outside knob/lever rigid. Rotating turn from inside extends dead bolt and changes visual message on outside from vacant to occupied. Both deadbolt and deadlocking latch bolt retract by rotating inside knob/lever. Depressing spanner button in inside knob/lever operates visual indicator shutting out all keys except emergency key. Rotation of inside spanner button provides lockout feature. Levers are available only on the inside trim of this function.	F101
H511		Entry double locking—Dead bolt thrown or retracted by key in upper lock from outside or by inside turn. Deadlocking latch retracted by key in outer knob/lever when locked by pushing button in inner knob. Outer knob/lever may be fixed in locked position by rotating button. Dead bolt and latch bolt retracted by rotating inside knob/lever. Levers are available only on the inside trim of this function.	F96/97

Options and accessories

H Series deadbolts - 1" projection, standard

Standard deadbolts for H Series locks are non-UL listed.
Available in $2\frac{3}{8}$ " or $2\frac{3}{4}$ " backsets.

Unless otherwise specified, we furnish a $2\frac{1}{4}$ " x 1" x square- corner faceplate on $2\frac{3}{8}$ " backset deadbolts and $2\frac{1}{4}$ " x $1\frac{1}{8}$ " x square corner on $2\frac{3}{4}$ " backset deadbolts.

*Optional UL deadbolt available, except on drive-in deadbolts.

Options and accessories

(continued)

Dust boxes

B500-622

Metal dustbox reinforcer for 10-094 strike.

Mounted samples

Individual mounted lock samples are available in auxiliary locks. Mounted locks are fully operative, thus demonstrating their individual features. Light and portable, they may be easily carried for on-site demonstrations.

945 Standard cylinder cam lock

Cam lock for cabinet doors up to $\frac{3}{4}$ " thick. Large cam measures $1\frac{1}{2}$ " center-to-end. Provided with two cam drivers to allow for rigid cam or lazy cam operation. Lock is field-reversible for right hand or left hand doors.

Lazy action operation:

1. Key rotates cam 90° .
2. Set screw limits cam rotation to 90°
3. Key removable in locked or unlocked position.

C945 SFIC (less core) cam lock

Cylinders: Furnished with solid brass plug and housing drilled with 6-pin chambers, pinned in 5 unless otherwise specified. Available with 6- or 7-pin interchangeable cores. Furnished with two (2) nickel silver keys standard.

Keyways: "G" keyways standard on standard cylinders. "A" keyway standard on I/C core cylinders.

Rigid driver operation:

1. Key rotates cam 360° .
2. Set screw limits cam rotation if required.
3. Key removable in locked position only.

How to order

For correct ordering, and to ensure no delays in processing of your order, the following descriptive data should be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 20 each D locksets in the 141 Entry function, in a 626 (satin chrome) finish, to accommodate doors 1 3/4" thick with AA1- AA20 keying.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select function number.
- **Cylinder type:** P = conventional cylinder, L=prepped for conventional cylinder, but less cylinder, B=prepped for SFIC, but less cylinder, BB=with Best style capped core, BDC=with disposable construction core, G=with Falcon slide cap core, H=with keyed construction core.
- **Bolt type:** D for deadbolt.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). Outside finish always precedes inside finish on split finishes (605 x 625).
- **Latches:** 2 3/4" backset is standard. 2 3/8" backset available. All latches are UL listed 3-hour A label.
- **Strikes:** 4 7/8" x 1 1/4" ANSI standard. For other options, see page 12.
- **Cylinder type:** 6-pin.
- **Latch:** 2 3/8" - 2 3/4" universal backset - standard.
- **Strike:** 2 3/4" x 1 1/8" lipless standard. Optional ANSI, T-strike, full lip strikes or security strike available.
- **Cylinder type:** For 6-pin, add 6-pin. For 7-pin, add 7-pin. 7-pin conventional cylinder is not available on the H Series.
- **Door hand:** Not required. All other locks are fully reversible.
- **Keying detail:** We suggest using the standard terms developed by the A.H.C. (Architectural Hardware Consultants).
 - Example: AA1 - Grand Master keyed, Master keyed, change key 1.
- **Interchangeable core:** Specify for 6 or 7 pin if ordering prepped for interchangeable core (SFIC). BD6 or BD7, GD6 or GD7, BB6 or BB7.
- **Keyways:** "G" is standard on regular cylinders. "A" is standard on interchangeable cores. Other keyways available. Please consult factory.
- **Additional keys:** Note the total number of keys required.
- **Large bow keys:** Add—"with large bow keys" under additional details.

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances, and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

Trim finishes chart

Description	ANSI No.	Available on
Bright brass	605	All trim
Satin brass	606	All trim
Oil rubbed bronze	613	All trim
Bright chrome	625	All trim
Satin chrome	626	All trim

Note: Consult price book for finish availability by product.

MA Series

Grade 1 mortise lever and knob locks

Deadbolt locks provide an extra measure of protection against break-in when used as a supplement to an existing lockset. In applications ranging from military and government projects to multi-family housing, retail and restaurants, Falcon deadbolts deliver superior performance and the flexibility of multiple keying systems. Our full line of Grade 1 and 2 auxiliary locks feature interchangeable cores that are compatible with SFIC products from other manufacturers. And they're backed by Allegion, the best name in the business.

Features

*Excludes MA551

**For 605, 606, 613, 625 and 626

Mortise locks

Lock features

Door thickness: Standard accommodates thickness of 1³/₈" to 2¹/₂".

Backset: 2³/₄" only.

Case: Cold formed steel, zinc dichromate plated, .090" thick. Optional lead wrapping available.

Hubs: Hardened steel.

Handing: Right hand is standard; left hand optional. Reversible in the field.

Cylinders: Solid brass cylinder and plug. 5, 6 or 7-pin are available on standard cylinders. 6 or 7-pin are available on interchangeable core cylinder. Furnished with two nickel silver keys standard

Keyways: "G" keyway standard on standard cylinder. "A" keyway standard on I/C cylinder. See price book for optional keyways

Bind resistant trim: Heavy-duty through-bolted inserts clamp the trim on the door assuring proper alignment. Provided with 8-32 screws for strength and thread sealant to prevent loosening.

Latch bolt: Two-piece stainless steel, mechanical anti-friction bolt. ³/₄" projection.

Dead bolt: 1" throw, stainless steel with two 1³/₁₆" diameter hardened steel, free-turning, saw-resistant roller.

Faceplates: (armored front) 1¹/₄" x 8" brass or stainless steel adjustable for door bevel. Reinforced by heavy gauge steel with stabilizing ribs.

Strike: Brass or stainless steel. Meets ANSI A115.1 for frame preparation. Strike is non-handed.

Electrified functions: Available in 12 or 24 VDC.

ANSI/BHMA: Meets ANSI/BHMA 156.13, Series 1000.

UL: 3 hour A label.

Falcon mortise lock specifications

- Provide mortise locksets that comply with ANSI A156.13, Series 1000, Operational Grade 1 and Security Grade 1 with all standard trims and conventional mortise cylinders.
- Locksets comply with UL10B - neutral pressure and UL10C/UBC 7-2 - positive pressure testing requirements. All locks shall be UL listed for 3 hour fire door.
- Lock case shall be non-handed, reversible without opening the lock case, and shall be manufactured of zinc dichromate plated steel. Lock case shall be interchangeable for knob or lever applications without modifying the chassis, and shall be constructed with a screw configuration that limits access to operating parts.
- Latchbolt shall be 2-piece anti-friction type manufactured from stainless steel, with a standard 2³/₄" backset, a full ³/₄" throw and be field reversible. Deadbolt shall have 1" throw and shall be constructed of stainless steel, incorporating two ³/₁₆" diameter security roller pins.
- All trim shall be cast, forged, or wrought and through bolted with thread patch coated screws. Lever trim to have individual heavy duty springs for lever return, and independent rotation in both directions. Return to door style levers meets the ¹/₂" California State Fire Marshall requirement.
- Spindles to be independent, designed to 'break-away' at a maximum of 480 in./lbs. to prevent damage to the lock chassis.
- Provide standard non-handed curved lip strikes.
- Cylinders to be secured by a dual retainer. Acceptable manufacturer: Falcon Lock

Options and accessories

Trim options

Abrasive coated knobs and levers

All knobs and levers are available with abrasive coating to identify entrances to hazardous areas to the handicapped.

Knurled levers

Levers are available knurled to identify entrances to hazardous areas to the handicapped.

Lead wrapping

MA Series locksets and latchsets are available with lead-wrapping for use on X-ray room doors (or similar situations).

Trim packages

Both knob and lever trim packages are available to allow complete replacement of inner and outer trim on any lock function. Packages include inside and outside trim, spindle and mounting screws. Please see current price book for more details.

Strikes

Manufactured from heavy gauge brass or stainless steel. Meets ANSI Standard A115.1 for frame preparation. Strikes are available with various lip lengths.

Thumb turn/threaded cylinders (sold separately)

Standard thumb turn threaded cylinders for dead bolt operation of MA Series locks may be used in lieu of surface mounted thumb turns. Furnished with A09894-1 cam. Available in length indicated and all MA Series finishes.

Catalog number	Length
973	1 1/8" RH (turns counter-clockwise)
974	1 1/8" LH (turns clockwise)

Functions

To order Falcon MA Series locksets, please consult page 17 for ordering information and assistance.

 Indicates interchangeable core available.

Catalog number	ANSI	Function outside/inside	Name	Description
MA101	F 01		Passage or closet latch	Latch bolt operated by knob/lever from either side at all times.
MA161	F 31		Exit or connecting lock	Latch bolt operated by knob/lever from inside. No trim outside. Auxiliary dead latch.
MA301	F 02		Privacy, bedroom/bath	Latch bolt operated by knob/lever from either side. Dead bolt operated by turn from inside and by emergency release from outside.
MA311	F 19		Privacy, bedroom/bath	Latch bolt operated by knob/lever from either side. Dead bolt operated by turn from inside and emergency release from outside. Operating inside knob/lever retracts both bolts.
MA321	F 22		Privacy, bedroom/bath	Latch bolt operated by knob/lever from either side except when outside knob/lever is locked by inside turn. Operating inside knob/lever, closing door or operating outside emergency release unlocks outside knob/lever.
MA371	F 14	 	Store door lock	Latch bolt operated by knob/lever from either side. Dead bolt operated by key from either side.
MA381	F 09	 	Apartment, exit	Latch bolt operated by knob/lever from either side, except when outside knob/lever is locked by key from inside. When outside knob/lever is locked, latch bolt is retracted by key from outside or by operating inside lever. Auxiliary dead latch.
MA411	F 30	 	Asylum or institutional lock	Latch bolt operated by key from either side. Both knobs/levers always inoperative. Auxiliary dead latch.
MA431	F 34	 	Classroom security with deadbolt	Latch bolt operated by knob/lever from either side except when outside knob/lever is locked from inside or outside by key. Dead bolt retracted by key from inside or outside. Operating inside knob/lever retracts both bolts and unlocks outside. Latch bolt dead locked when dead bolt is thrown.

Functions

(continued)

 Indicates interchangeable core available.

Catalog number	ANSI	Function outside/inside	Name	Description
MA441	F 32		Classroom security lock	Latch bolt operated by knob/lever from either side except when outside knob/lever is locked from inside or outside by key. When outside knob/lever is locked, latch bolt is retracted by key from inside or outside or by operating inside knob/lever. Auxiliary dead latch.
MA451	F 15		Hotel guest lock	Latch bolt operated by key from outside or by operating inside knob/lever. Outside knob/lever is always inoperative. Dead bolt projected by turn from inside and all keys except emergency key are shut out. Operating inside knob/lever retracts both bolts. Auxiliary dead latch.
MA521	F 04		Entry/office lock	Latch bolt operated by knob/lever from either side except when outside knob/lever is made inoperative by buttons in face. When outside knob/lever is locked, latch bolt is retracted by key from outside or by operating inside knob/lever. Auxiliary dead latch. Outside knob/lever is unlocked by button on face.
MA531	F 12/ F 20		Apartment corridor door lock	Latch bolt operated by knob/lever from either side, except when outside knob/lever is made inoperative by buttons in face. Dead bolt operated by key outside or turn inside. Key outside operates both bolts. Operating inside knob/lever retracts both bolts and outside remains locked. Latch bolt is deadlocked when outside knob/lever is made inoperative or when the dead bolt is projected. When dead bolt is retracted, knob/lever is unlocked by buttons in face.
MA541	F 21		Room door lock	Latch bolt operated by knob/lever from either side. Dead bolt operated by key from outside or turn from inside.
MA551	F 06		Holdback lock	Latch bolt operated by lever from either side except when outside lever is locked from outside by key. Latch bolt can be locked in a retracted position by key. When outside lever is locked, latch bolt is retracted by key from outside or by operating inside lever unless latch bolt has been locked in a retracted position. Auxiliary dead latch. Note: Chassis is handed. To activate the Holdback Function – from the unlocked position rotate the outside lever/knob to retract the latchbolt. Rotate key 360°. Release lever/knob. To release Holdback Function, rotate key 360° clockwise.
MA561	F 05		Classroom lock	Latch bolt operated by knob/lever from either side except when outside knob/lever is locked from outside by key. When outside knob/lever is locked, latch bolt is retracted by key from outside, or by operating inside knob/lever. Auxiliary dead latch deadlocks latchbolt when door is closed. Inside knob/lever always free for immediate exit.
MA571	F 13		Dormitory or exit lock	Latch bolt operated by knob/lever from either side. Dead bolt projected by key from outside and turn from inside. Operating inside knob/lever retracts both bolts and unlocks outside.
MA581	F 07		Storeroom lock	Latch bolt operated by key from outside or by operating inside knob/lever. Outside knob/lever is always inoperative. Auxiliary dead latch.

 Indicates interchangeable core available.

Catalog number	ANSI	Function outside/inside	Name	Description
MA621	F 08/ F 10	 	Front door apartment corridor	Latch bolt is operated by knob/lever from either side, except when outside knob/lever is made inoperative by buttons in face. Dead bolt is operated by turn inside. Key outside operates both bolts. Outside knob/lever is unlocked by button on face.
MA641	NA	 	Dormitory lock	Latch bolt by knob/lever inside and key outside. Inside knob/lever free. Outside knob/lever rigid. Deadbolt by key outside or T-turn inside. Rotating inside knob/lever retracts both bolts. Deadlocking latch.
MA851	NA	 	Storeroom-fail safe (EL - 12 & 24 VDC)	Latch bolt operated by knob/lever from either side except when outer knob/lever is electrically locked. When outer knob/lever is locked, latch bolt retracted by key in cylinder outside. Deadlocking latch.
MA881	NA	 	Storeroom-fail secure (EU - 12 & 24 VDC)	Latch bolt operated by knob/lever from inside except when outer knob/lever is electrically unlocked, then latch bolt from either side. When locked, key in cylinder outside retracts latch bolt. Deadlocking latch.
MA911	F 29	 	Classroom dead lock	Key from outside operates dead bolt. Turn from inside retracts but does not project dead bolt.
MA921	F 18	 	Dead lock	Dead bolt operated by key from outside only.
MA931	F 16	 	Dead lock	Dead bolt operated by key from either side.
MA941	F 17	 	Dead lock	Dead bolt operated by key from outside and by turn from inside.
MA12	NA	 	Single dummy	Single dummy trim
MA18	NA	 	Double dummy	Double dummy trim

Interchangeable cores

Mortise cylinders

All Falcon MA Series keyed locks are available with mortise cylinders that will accept Falcon small format interchangeable cores (SFIC) as well as some other manufacturers' SFIC. Interchangeable core cylinders are available in 6- or 7-pin configurations, for increased security by quick change of keying. Interchangeable core cylinders allow the capability of immediately changing the keying on any door without the necessity of disassembling the lock. The core is removed by use of a special "control" key. Rotating the key to the right and gently pulling will disengage the core from the housing. The replacement core is then inserted and the control key rotated to the left to "lock" the core in place and the control key is removed.

To order: Falcon mortise locks with interchangeable cores, add "G" 6- or 7-pin in detail area of order.
To order: Falcon mortise locks for interchangeable core, less core (SFIC), add "B" 6- or 7-pin in detail area of order.

Special hotel/motel cylinders furnished with cam A12667-007-00.

Note: To order the cylinder housing only, order by listing catalog number for required length and cam number as indicated in the chart. Also specify finish and pin condition.

Example: No. C987 with A12667-003-00, 626, for 7-pin interchangeable core.

Standard cylinders

Mortise cylinders

Only the finest materials are used in the manufacture of our cylinders. Modern equipment and gauging ensure consistent, reliable production of our entire line of cylinders. We offer a full and complete line of spacer rings, cylinder guards and spring washers, as well as numerous cams to fulfill the requirements of most applications. Standard mortise cylinders are furnished as 5- or 6-pin as standard. 7-pin cylinders are available. All keyed cylinders are supplied with two nickel silver keys.

Cylinder guards

Falcon offers two different types of cylinder guards in various thicknesses to work with sectional or escutcheon trim, different door ranges and various cylinder lengths. Our standard cylinder, 985, is 1 1/8" long. The factory will furnish the correct cam(s) and cylinder guard for the function and door thickness specified. The A08790 and A08794 cylinder guards in bar stock brass are available to accommodate different cylinder lengths and door thicknesses as shown.

All effort has been made to make this information comprehensive. Since no two products are exactly alike, this data represents those products which are similar. This information was obtained from trade services and is not guaranteed nor meant to represent any product as equal to any other product.

Construction keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost pin system” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

“Disposable construction” interchangeable cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

Locks with “Lost pin system”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

Construction key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin.

Master key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

Locks with Blockokey® cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

How to order locks with Blockokey® cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.

Example: 72 Each B511 D 626 1AA-72AA (Blockokey)

Project key—KB531

Lock cylinder is operated by the special “project key.” The last two pins in the cylinder are held inoperative by the key block.

Removal tool – KB536

The special “project key” is canceled out by removal of the key block. A key block removal tool is furnished with the Master keys for the locks. Simply push the removal tool into the keyway, then withdraw it to remove the block. Thereafter, the “project key” will no longer operate the lock cylinder.

Change or master key—KB578

Cylinder is now only operable by the regular change key or Master key.

How to order

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 16 each MA locksets in the 521 Entry function, DG (Dane-Gala) trim design in a 626 (satin chrome) finish, 8 RH (right hand) and 8 LH (left hand) to accommodate doors 1 3/4" thick with AA1-AA16 keying.

- **Quantity:** Indicate the quantity required.
- **Catalog number:** Select catalog number.
- **Trim design:** Indicate letter of knob or lever design followed by letter of rose or escutcheon design.
 - Example: DG-D for Dane lever followed by G for Gala rose.
- **Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). Outside finish always precedes inside finish on split finishes (605 x 625).
- **Latches:** Two-piece mechanical anti-friction standard. All catalog numbers shown in this catalog indicate 2 3/4" backset.
- **Strikes:** 4 7/8" x 1 1/4" x 1 5/16" lip-to-center with curved lip standard. Optional strikes with shorter or longer lip lengths available.
- **Cylinder type:** For 6-pin, add 6-pin. For 7-pin, add 7-pin.
- **Door hand:** See chart.
- **Keying detail:** We suggest using the standard terms developed by the A.H.C. (consult factory).
 - Example: AA1 - Grand Master keyed, Master keyed, change key 1.
- **Interchangeable core:** To order product capable of accepting an interchangeable core, add "B" less SFIC (for interchangeable core). To order product with an interchangeable core, add "SFIC" (with interchangeable core).
 - Example: "G" with Falcon SFIC core.
- **Keyways:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available. See price book.
- **Additional keys:** Note the total number of keys required.
- **Large bow keys:** Add—"with large bow keys".

Qty.	Catalog number	Trim design	Finish	Latch	Strike	Cylinder	Door hand				Detail
							RH	LH	RHR	LHR	
8	MA521P	DG	626	Std	Std	6-pin	X				AA1-AA8 1 3/4" DR
8	MA521P	DG	626	Std	Std	6-pin		X			AA9-AA16 1 3/4" DR

Finishes

The latest in modern techniques and equipment are used to apply the highest quality finish. Extra steps assure durable, consistent finishes and long useful life.

Although we apply the finest available protective plating and/or enamel coating to the surface of our products, these finishes have limitations and in time may deteriorate either from exposure to weather, pollution, perspiration, extremes

of climate, frequency of use or other factors.

Deterioration of these finishes is, therefore, not a defect, but a normal process which is unavoidable. Our company cannot accept responsibility for finish deterioration in these circumstances, and therefore the finishes cannot be guaranteed. These products will not be refinished or replaced under our warranty should deterioration of finishes occur.

Trim finishes chart

Description	ANSI No.	Available on
Bright brass	605	All trim
Satin brass	606	All trim
Oil rubbed bronze	613	All trim
Bright chrome	625	All trim
Satin chrome	626	All trim
Satin stainless steel	630	All trim
