

GLOBALTM INDUSTRIAL

**Trailer Stabilizing
Quick Stand
Model #: 298721**

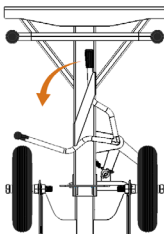

100,000 Lb Capacity

DO NOT OVERLOAD

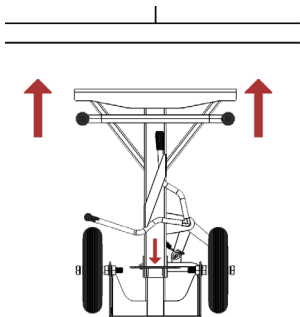

Secure and chock wheel of trailer.

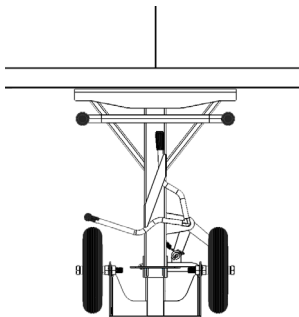

Place the stand in the center of the stabilizing stand.

Place light weight on foot stand.
Rotate the handle counter clock-
wise to disengage the pin and
allow the stand height to change.

Allow the stand to rise to the
height of the trailer. Replace the
pin in the nearest hole. The trailer
is now stabilized.

To remove the stand, remove the
pin and press down on the foot
stand to lower the stand. Once
stand is lowered, replace pin. Pull
and roll the stand out of the way
before moving the trailer.
