

VNS4400

WIRELESS ALERT SYSTEM

Automated Alerts for Emergency Situations

Wireless Monitoring, Alerts Anywhere, Easy Setup

The Visiplex VNS4400 Wireless SMS Gateway is a compact and reliable wireless alert system designed to monitor multiple wall-mounted and wearable panic buttons, instantly notifying staff when immediate assistance is required.

Engineered for seamless integration with the Visiplex series of wireless panic buttons and emergency wall stations, the VNS4400 automatically sends a pre-programmed SMS text message upon activation—alerting administrators and designated personnel with precise details about the emergency and its location.

Beyond SMS alerts, the VNS4400 can simultaneously activate wireless PA speakers, LED message boards, and multi-color beacon lights to provide synchronized audio-visual notifications across the entire facility. This ensures clear, real-time communication when rapid response is critical.

VNS4400 KEY FEATURES

INSTANT SMS ALERTS
Sends automated, pre-programmed SMS messages and audio-visual alerts within seconds

WIRELESS MONITORING
Monitors wireless wall-mounted and wearable panic buttons

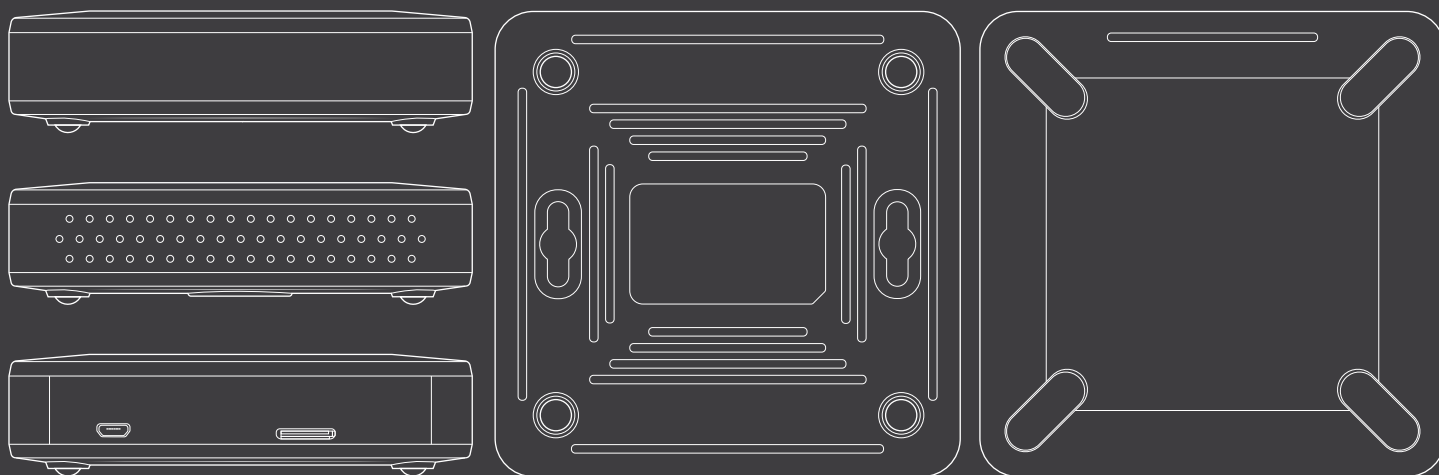

EASY SETUP
An active micro SIM card and USB or AC power source are all that is needed
