Install the Transceiver

1. Wear an ESD-preventive wrist or ankle strap to prevent ESD damage to the transceiver.
2. Insert the transceiver into the slot and firmly press it into place.

3. Remove the protective dust plug from the transceiver.

4. Plug a fiber-optic cable into the transceiver. Note that the transceiver works without any additional configuration.

Remove the Transceiver

1. Wear an ESD-preventive wrist or ankle strap to prevent ESD damage to the transceiver.
2. Disconnect the network fiber-optic cable from the transceiver.

3. Pull the safety latch downwards to release the transceiver, and then pull it out from the slot.

4. Reinstall the protective dust plug in the transceiver's optical bores and place it on antistatic mat or a static shielding bag.

Note:

1. Do not touch the output pins on the transceiver with your hand.
2. Always keep the protective dust plug on the transceiver's optical bores until you are ready to make a connection.

Caution:

DO NOT point or stare directly into the beam or into the optical port of the transceiver when it is operating, as this can injure your eyesight.
