Camera

i Do not block the sensors.

Mounting Base

Get the EZVIZ App

- Connect your mobile phone to Wi-Fi using your 2.4GHz network (suggested).
- Download and install the EZVIZ app by searching “EZVIZ” in the App Store or Google Play™.
- Launch the app and register an EZVIZ user account.

i If you have already used the app, please make sure that it is the latest version. To find out if an update is available, go to the app store and search for EZVIZ.

Setup

Follow the steps to set your peephole:

1. Install your peephole and power on.
2. Log in to your EZVIZ app user account.
3. Connect your peephole to the Internet.
4. Add your peephole to your EZVIZ account.

Installation

1. Install the Micro SD Card (Optional)

- Insert the micro SD card (sold separately) into the card slot as shown in the figure below.

- In the EZVIZ app, tap the **Storage Status** in the Device Settings interface to check the SD card status.
- If the memory card status displays as **Uninitialized**, tap to initialize it. The status will then change to **Normal** and it can store videos.

2. Install the peephole

If you already have a peephole, install the device in the same place. If not, please drill a hole of diameter about 16.5mm (no more than 45mm) and about 145cm distance from the ground to have a good viewing effect.

1

Measure the door's thickness and select the appropriate screws.

Thickness	Screw
35 to 60mm	 
60 to 85mm	 
85 to 105mm	 

2

Turn the screws into the back of camera.

3

Tear off the release paper.

4

Pass screws and wire through the door. You can roll up the paper to help.

5

Adjust camera's position and push it close to the door gently.

6

Pass screws and wire through the mounting base.

7

Adjust the mounting base's position and tighten the screw.

8

Connect the panel with the camera's wire.

9

Put the panel into the mounting base.

10

Hold the dismantle button until the panel is well buckled.

11

Installation complete.

Power on

1 Hold the power button for 3 seconds to power on the panel.

2 Tap the Home button to choose your language and press the Power button to confirm.

Add to EZVIZ App

- Log in the EZVIZ app.
- On the Home screen, tap "+" on the upper-right corner to go to the scan QR code page.
- Scan the QR code.
- Follow the EZVIZ app wizard to finish Wi-Fi configuration.

If you failed to get the QR code or want to reconfigure Wi-Fi, please hold the Home button for 5 seconds to reset and repeat the steps above.

Charge the Panel

Connect the panel with the power outlet via power adapter (5V 2A, sold separately).

- i** You can also take off the panel to charge by holding the dismantle button to remove it from the mounting base. Please disconnect the wire carefully.

Restore to Factory Settings

When the device is normally running, press the Home button for 5 seconds and confirm to restore the device to factory settings.

Live View

i The app interface may be different due to version update, and the interface of the app you installed on your phone shall prevail.

Launch the EZVIZ app, tap **Live View** button, you can view and listen to a live feed, take snapshots, record videos, and choose video definition as needed.

i Swipe left and right across the screen to see more icons.

Icon	Description
	Share. Share your device.
	Settings. View or change the device settings.
	Snapshot. Take a snapshot.
	Record. Manually start/stop recording.
	Speak. Start using talk and listen.
	Definition. Select video resolution from Ultra HD, Hi-Def or Standard.
	Call Log. View call logs.
	Multi-screen Live. Tap to select live view window layout.

i Please refer to the actual interface for specific information.

Settings

In the settings page, you can set the parameters of the device.

Parameter	Description
Name	Customize the name of your device.
Working Mode	• User Mode: Customize parameters like detection sensitivity and loitering duration • Performance Mode: Under this mode, the device performance will be improved, but the power consumption will be increased. • Power Saving Mode: Adjust the sensitivity and other parameters to extend battery life. • Super Power-saving: Sleep Mode is on. Active live view can wake up the camera. • Configure Working Mode: Customize the working mode in different periods.
Intelligent Detection	You can customize the detection notification by changing the value of detection sensitivity. The higher sensitivity is, the easier people farther to the device can be detected. • Basic Detection(Required) • PIR Infrared Detection: Higher sensitivity, farther detectable distance. • Advanced Detection • Loitering detection: when enabled, if people keep loitering around the doorway for longer than the period you have set up, alarms will be triggered. This function is used to avoid loitering.  Devices will alert based on the selected mode, including device-side alerts and App-side message notifications.
Notification	You can set the notification from the device-side and app-side.
Audio	When disabled, both live view and record videos will not have audio.
Image	• Auto(Recommended): Auto-Switch Day/Night Mode. • Day and Night Switch Sensitivity. • Enforcing Day Mode: IR mode stays off • Enforcing Night Mode: IR mode stays on, with clear images in dark environment.
Light	When disabled, the doorbell indicator will be off.
Battery	You can see the battery capacity.
Cloud Storage	You can subscribe and manage the cloud storage.
Record List	You can see the device storage status, include cloud storage and memory card.
Security Settings	• Video Encryption: When enabled, your videos will be encrypted. • Change Encryption Password: You can change your password.
Network	• You can see the Wi-Fi that the device has connected to, and you can tap to change to another Wi-Fi. • Static DNS: If enabled, you can customize the DNS address. • Wi-Fi Sleep Mode: You can choose the Wi-Fi Sleep mode. • Low Power Mode • Ultra-Low Power Mode
Device Information	You can see the device information here.
Share the Device	Enter an email address or phone number to invite and grant device permissions to a family member or guest.
Delete Device	Tap to delete the camera from your EZVIZ account.

1. Use Amazon Alexa

These instructions will enable you to control your EZVIZ devices with Amazon Alexa. If you run into any difficulties during the process, please refer to **Troubleshooting**.

Before you start, make sure that:

1. EZVIZ devices are connected to the EZVIZ app.
2. In the EZVIZ app, turn off the "Image Encryption" in the Device Settings page.
3. You have an Alexa-enabled device (i.e Echo Spot, Echo-Show, All-new Echo-Show, Fire TV (all generations), Fire TV stick (second generation only), or Fire TV Edition smart TVs).
4. The Amazon Alexa app is already installed on your smart device, and you have created an account.

To Control EZVIZ devices with Amazon Alexa:

1. Open the Alexa app and select "Skills and Games" from the menu.
2. On the Skills and Games screen, search for "EZVIZ", and you will find "EZVIZ" skills.
3. Select your EZVIZ device's skill, then tap **ENABLE TO USE**.
4. Enter your EZVIZ username and password, and tap **Sign in**.
5. Tap the **Authorize** button to authorize Alexa to access your EZVIZ account, so that Alexa can control your EZVIZ devices.
6. You will see "EZVIZ has been successfully linked", then tap **DISCOVER DEVICES** to allow Alexa to discover all your EZVIZ devices.
7. Go back to Alexa app menu and select "Devices", and under devices you will see all your EZVIZ devices.

Voice Command

Discover a new smart device via the "Smart Home" menu in the Alexa app or the Alexa Voice Control function. Once the device is found, you can control it with your voice. Speak simple commands to Alexa.

-  Your device's name for example: "show xxxx camera," can be changed in the EZVIZ app. Each time you change the name of the device, you will need to discover the device again to update the name.

Troubleshooting

What should I do if Alexa fails to discover my device?

Check if there are any Internet connecting problems.

Try to restart the smart device and re-discover the device on Alexa.

Why the device's status is "Offline" on Alexa?

Your device might have been disconnected from the network. Restart the smart device and re-discover on Alexa.

Check if your router is connected to the Internet and try again.

-  For details about countries where Amazon Alexa is available, see Amazon Alexa's official website.

2. Use Google Assistant

With the Google Assistant, you can activate your EZVIZ device and watch live by speaking Google Assistant voice commands.

The following devices and apps are required:

1. A functional EZVIZ app.
2. In the EZVIZ app, turn off the "Image Encryption" and turn on the "Audio" in the Device Settings page.
3. A TV with functional Chromecast connecting to it.
4. The Google Assistant app on your phone.

To get started, follow the steps below:

1. Set up the EZVIZ device and make sure it works properly on the app.
2. Download the Google Home app from the App Store or Google Play Store™ and log into your Google account.
3. On the Myhome screen, tap "+" on the upper-left corner, and select "Set up device" from the menu list to go to the Set up interface.

4. Tap **Works with Google**, and search for "EZVIZ", where you will find "EZVIZ" skills.
5. Enter your EZVIZ username and password, and tap **Sign in**.
6. Tap the **Authorize** button to authorize Google to access your EZVIZ account, so that Google can control your EZVIZ devices.
7. Tap **Return to app**.
8. Follow the above steps to complete the authorization. When synchronization is completed, EZVIZ service will be listed under your list of services. To see a list of compatible devices under your EZVIZ account, tap on the EZVIZ service icon.
9. Now try some commands. Use the name of the camera that you created when you set up the system.

Users can manage devices as a single entity or in a group. Adding devices to a room allows users to control a group of devices at the same time using one command.
