Pearl Glue

A traditional pearl glue, derived from animal protein. A glue of low colour and odour which dissolves readily.

Instructions:

- To prepare for use, add 1 part of glue to 1.5 parts cold water whilst agitating.
- Leave to soak for approximately 1 hour and then dissolve by warming.
- At no time during dissolving period (or in use) should the temperature exceed 1300F (550C) or serious degradation and therefore loss of adhesion properties may occur.

First Aid and Handling

General information	Move affected person to fresh air and keep warm and at
	rest in a position comfortable for breathing.

Inhalation No specific recommendations.

Ingestion Rinse mouth thoroughly with water. Give plenty of water to

drink. Keep affected person under observation. Get medical

attention if any discomfort continues.

Skin contact Wash skin thoroughly with soap and water.

Eye contactRinse immediately with plenty of water. Continue to rinse

for at least 10 minutes.

NB: The information supplied is, to the best of knowledge, true and accurate, but recommendations or suggestions made are without guarantee since the conditions of use are beyond our control.
