## M5STACK U025 Dual-Button Unit

## DESCRIPTION

Dual Button as the name states, has two buttons with different color. If the Button unit is not enough for your application needs, how about double it up to a pair? They share the exact same mechanism, button status can be detected by the input pin status by simply capturing the high/low electrical level. This unit communicates with M5Core through GROVE B port.

## Development Resources

Development resources and additional product information are available from:

- <https://www.m5stack.com/>
- <https://docs.m5stack.com/#/>

## Specification

- GROVE Expander
- Two Lego-compatible holes

## Disposal

Electronic devices are recyclable waste and must not be disposed of in the household waste. At the end of its service life, dispose of the product in accordance with applicable regulatory guidelines. You thus fulfill your statutory obligations and contribute to the protection of the environment.
