Keyboard Driver

- To download the Keyboard Driver, open your browser and visit the official website at www.magegee.com. Navigate to the SUPPORT–DRIVERS section and select the Captain72 driver for download. If you need the Driver User Guide, follow the same steps and download the Captain72 instruction manual from the SUPPORT–DRIVERS section.
- Before using the driver, you need to go through several setup steps. First, set the language preferences by selecting "Language" in the driver settings. Next, perform the N-key calibration by clicking "Start Calibration" and pressing each key individually until all keys show a successful calibration (usually indicated by a green light). For custom function settings, you can adjust the key stroke length by using "Main-Stroke setting," "Trip Settings," or "Custom Mode," depending on your preferences. Once all configurations are complete, ensure that the changes take effect by clicking "Save," "Confirm," or similar buttons.
- For web-based driver options, after downloading and installing the driver, visit https://qmk.top/ for additional settings and customizations.
- **Note:** The MAGEGEE dedicated driver provides advanced custom functions. However, after multiple modifications, users may not be able to reset the default functions manually. To revert all settings, click "Reset" in the right corner of the driver page.
