## MCIM22SV 27 Lb Countertop Ice Maker

---

## Product Information

**Model:** MCIM22W MCIM22B MCIM22ST MCIM22R  
MCIM22SV

**Product Description:** This product is an ice maker.

### Unit Dimensions (Inches):

- **Width:** 9.5 inches
- **Height:** 12.9 inches
- **Depth:** 14.1 inches

**Net Weight:** 17.8 lbs.

---

## Product Usage Instructions

---

### Ice Maker Troubleshooting:

If the ice maker doesn't stop or if ice cubes obstruct the sensor, move the unit to an area without sunlight.

If the ice basket is full or the ice shovel is stuck, follow these steps:

1. Stop the ice maker.
2. Fill water in the unit.
3. Press the power button again to restart the unit.

If the ice indicator light is on and you want to remove ice from the basket, either continuously press the Select button for 5 seconds or remove the ice blocking the ice shovel. If the issue persists, consult a certified technician.

If the ice making cycle takes too long, follow these steps:

1. Stop the ice maker.
2. Wait for the ice blocks to melt.
3. Select the small ice size option.
4. Restart the ice maker.

---

### **Ice Storage Recommendations:**

Leaving ice in the appliance for an extended period of time may result in the appliance recycling the ice by melting it down and making a new batch. To avoid this, transfer ready-made ice to another container and store it in a cooler or freezer.

---

### **Possible Issues:**

If the ambient temperature or water temperature in the inner tank is too high, or if there is refrigerant liquid leakage or a blocked pipe in the cooling system, consult a qualified technician for assistance.
