**MAGIFT**

**Magift A30 Plus Bluetooth FM Transmitter**

## INTRODUCTION

This Magift A30 Plus Bluetooth FM Transmitter is a flexible car accessory that is meant to make your time behind the wheel more enjoyable and handy. This device uses the newest Bluetooth technology and a sticky car mount to let you make calls without using your hands, stream music wirelessly, and quickly charge your phone. It also has better sound quality and keeps your car's interior clean. Its 15W magnetic fast charging feature is great for keeping your device charged while you're on the go, and the dual microphone system with CVC 8.0 noise reduction makes sure that talks are crystal clear. This FM radio works with the iPhone 16, 15, 14, 13, 12 Pro Max, and more, and it also works perfectly with the sound system in your car. The Magift A30 Plus, which costs **\$23.99**, is the perfect accessory for driving because it looks good and works well. This tool makes your time in the car better, whether you're streaming music, making calls, or using voice commands.

## SPECIFICATIONS

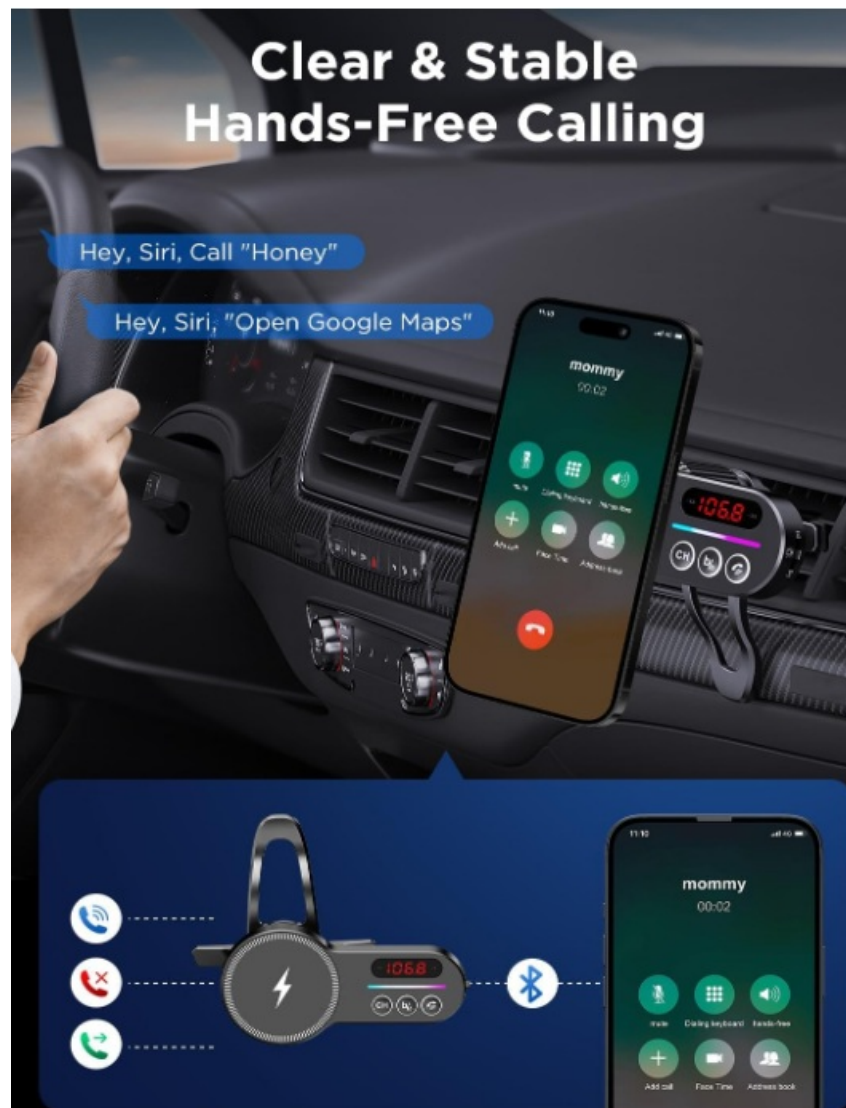

Product Name	Magift A30 Plus Bluetooth FM Transmitter
Price	\$23.99
Special Features	Hands-Free Calls, Bluetooth FM Transmitter, MagSafe Car Mount, Wireless 15W Magnetic Fast Charging, Noise Reduction
Brand	Magift
Connectivity Technology	Bluetooth
Power Source	Battery Powered
Material	Aluminum
Compatibility	iPhone 16, 15, 14, 13, 12 Pro Max, Mini MagSafe cases & all phones with metal rings
Mount Type	Air Vent Mount with Quadruple Locking Design
Charging Support	Wireless 15W Magnetic Fast Charging
Audio Features	Dual-Microphone System with CVC 8.0 Noise Reduction
FM Transmission	Tunes FM Channels, Transmits Audio for Calls, Music, Siri, and Google Assistant
Usage	Hands-Free Calls, Voice Navigation, Music Streaming, Charging
Included Cable	Type-C male to USB-A interface
Recommended Car Charger	Preferably 9V/2A, 12V/1.5A, or 5V/2.1A
Mounting Stability	Secure, Shake-Proof Magnetic Vent Clip
Special Notes	Best experience with MagSafe specialized phone cases, Dual-microphone ensures clear communication even in noisy environments

### WHAT’S IN THE BOX

- Bluetooth FM Transmitter
- User Manual

### FEATURES

- **Three-in-one design:** a Bluetooth FM emitter, a MagSafe car mount, and a magnetic charger are all built into one device to make driving easier.
- **MagSafe Compatibility:** It was made to work with iPhones 16, 15, 14, 13, and 12 Pro Max, and it’s easy to connect using MagSafe technology so you can charge and use your phone without using your hands.
- **Helps with hands-free calls:** It has speakers built in and can make hands-free calls, which makes it safer to use while driving.

- **Streaming music wirelessly:** Use Bluetooth to send your favorite music to your car stereo without using aux cords.

- **15W Magnetic Fast Charging:** It supports fast charging through a strong magnetic mount, so your phone will stay charged on long trips.

- **Noise-Free Conversations:** It has CVC 8.0 noise reduction technology to make sure talks are clear and free of background noise.
- **DriveSafe Car Vent Mount:** This mount is meant to be put on the air vent in your car. It keeps your phone at eye level so you can focus on driving safely.
- **FM Channel Tuning:** This feature lets you tune into any FM radio channel and sends sound wirelessly to your car's sound system.
- **One-Handed Operation:** Makes it easy to use with one hand, so you can quickly and safely place and remove your phone.
- **Wide Compatibility:** It works with all phones that have MagSafe cases and comes with metal rings to make it work with other devices as well.
- Voice instructions for navigation, music, and other things can be used with Siri and Google Assistant. You can do this without taking your hands off the wheel.
- **Universal Air Vent Compatibility:** The device works with all car air vents, so it can be used with a lot of different types of cars.
- **Two microphones:** It has two microphones for better sound quality and to get rid of echo, which makes talks clearer.
- Small and unobtrusive, it fits nicely in the air vent and doesn't get in the way of the driver's view or comfort.
- **Stability:** The magnetic mount stays stable even on bumpy roads thanks to its four-locking system, which keeps your phone from falling.

## SETUP GUIDE

- **Initial Charge:** Connect the Type-C cord that came with the Magift A30 Plus to a USB-A charger (preferably one that puts out 9V/2A or more) and charge it before you use it.
- **Putting the Car Mount Together:** Use the magnetic clip to attach the FM emitter to the air vent in your car. For a good fit, make sure the vent is clean and not blocked by anything.
- **MagSafe Phone Mounting:** To mount your iPhone securely, put it on the transmitter's magnetic pad while it's in a case that works with MagSafe.
- To turn the device on, press and hold the power button until the LED light goes on. This means the device is now turned on.
- **Set up an FM channel:** Tune the radio in your car to a free FM frequency, then use the FM setting button on the Magift A30 Plus to match the same frequency.
- To pair your phone with the transmitter, turn on Bluetooth on your phone, look for the device name, and select it.
- **Set up hands-free:** Let the emitter use your phone's microphone to make calls without using your hands. Make sure you're paired with your phone so everything works smoothly.
- **Setting up the charger:** Put your iPhone on the magnetic mount to charge it wirelessly while you're moving.
- **Setting up Siri or Google Assistant:** To use voice commands, hit the voice assistant button on the transmitter. This will let you control your phone without using your hands.
- When you play songs or podcasts on your phone, the FM transmitter will send them wirelessly to your car.

stereo.

- **Dual Microphone Configuration:** The dual microphone system will work automatically for hands-free talk; you don't need to do anything else to make it work.
- **Changing the Volume:** To change the sound coming from the FM transmitter, use the volume setting on the stereo system in your car.
- To get the best noise cancellation, make sure your phone is within 3 feet of the emitter while you're on the phone.
- **Securing the Transmitter:** If the transmitter isn't stable, make sure the magnetic clip is attached correctly to the air vent.
- **Testing:** Once everything is set up, make sure everything works by testing both the audio and call features.

## CARE & MAINTENANCE

- **frequent Cleaning:** To keep dirt from building up, wipe the transmitter and car mount down with a dry, soft cloth ofrequently
- **Avoid Overcharging:** To keep the battery healthy, remove the device from the charger as soon as it's fully charged, and don't leave it charging for too long.
- **Storage:** Keep the radio out of the way of extreme temperatures by putting it away in a dry, cool place when not in use.
- **Check for Firmware changes:** To make sure your transmitter works at its best and gets new features, check for software changes regularly.
- **Protect from Impact:** Be careful not to drop or hit the radio hard, as this could damage the internal parts.
- **Secure Mounting:** Make sure the magnetic car mount is always firmly attached to the air vent so it doesn't come off by accident.
- **Take Off the Case for the Best Charging :** When using the MagSafe charging feature, take off any thick phone cases to get the fastest and most efficient charging.
- **Avoid Extreme Temperatures:** Do not put the transmitter in full sunlight or when it is freezing outside. These temperatures can damage the circuits inside.
- **Watch the Charging Cable:** Look at the charging cable for damage or fraying, and repair it right away to avoid an electrical accident.
- **Use the Right Voltage:** To keep your device from breaking, make sure that the USB port in your car gives off the right amount of power (9V/2A or higher is best).
- **Disengage When Not in Use:** To make the emitter last longer, take it off the air vent when you're not using it and store it safely.
- **Maintain Audio Settings:** Make sure the radio works well with your car's sound system by adjusting the audio settings in your car.
- **Stay Away from Interference:** Keep the FM transmitter away from things like big metal items that could mess up the tone.
- **Keep the firmware up to date:** To get new features and the best performance from your Bluetooth FM emitter, make sure the firmware is always up to date.
- **Check for Blockages:** To keep a strong link and stable charging, make sure there are no blocks between your phone and the transmitter.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
No audio through the car speakers	FM transmitter not connected to car stereo properly	Ensure the FM transmitter is tuned to the correct FM channel.
Poor sound quality	Interference from other FM signals	Change FM channels or use the aux cable for a direct connection.
Device not charging	The charger not providing enough power	Use a higher-power car charger (preferably 9V/2 A).
Unable to connect to Bluetooth	Bluetooth pairing issue	Ensure Bluetooth is enabled on both the transmitter and the phone.
Magnetic mount not holding the phone	Weak magnet or incompatible phone case	Use a MagSafe-compatible case for a stronger hold.
No voice during calls	CVC noise reduction failure	Reconnect the Bluetooth connection or restart the transmitter.
The transmitter falls off the air vent	Loose mounting clip	Check if the clip is securely attached to the air vent.
Distorted call quality	Poor connection or signal interference	Ensure minimal interference from other electronic devices.
Cannot pair the second device in TX mode	No available pairing slots for additional devices	Double-click the M key to enable the second pairing.
No sound after pairing	Incorrect audio output mode	Ensure audio is set to FM or Bluetooth on your car stereo.
Charging port not working	Loose USB-C connection	Ensure the USB-C cable is properly connected to the device.
Audio delay in TX mode	Bluetooth latency	Ensure both devices support aptX low latency codec.
FM signal drops intermittently	Poor FM reception or interference from nearby stations	Switch to a different FM channel to avoid interference.
Charging slow while using the transmitter	Overuse of multiple features simultaneously	Disconnect extra devices or reduce the use of additional features while charging.
Magnetic mount not rotating smoothly	Dirty or obstructed vent or magnetic mount	Clean the vent and magnetic area for smooth rotation.

## PROS & CONS

### Pros:

- **Hands-Free Calls:** Enjoy safer driving with hands-free calling via Bluetooth.
- **MagSafe Car Mount:** Convenient magnetic mounting ensures easy phone placement and removal.
- **Superior Sound Quality:** CVC 8.0 noise reduction technology ensures clear and crisp communication.
- **Wireless Fast Charging:** The 15W fast charging capability ensures your phone stays powered.
- **Wide Compatibility:** Works with a variety of devices, including iPhones and other Bluetooth-enabled smartphones.

## Cons:

- **Limited Charger Compatibility:** Best used with a car charger of at least 9V/2A for optimal performance.
- **Non-MagSafe Cases:** These may not work as efficiently with non-MagSafe phone cases.
- **Limited Range:** FM transmission range may be affected by local radio interference.
- **Requires A/C Vent:** Mounting only works with compatible air vents in your vehicle.
- **Price Point:** Slightly higher than some standard Bluetooth FM transmitters.

## WARRANTY

The Magift A30 Plus Bluetooth FM Transmitter comes with a **1-year limited warranty** from the manufacturer, which covers defects in materials or workmanship. The warranty ensures that the product is free from manufacturing defects under normal usage. Should you experience any issues, customer support is available to assist with troubleshooting or product replacement.

## FREQUENTLY ASKED QUESTIONS

What is the Magift A30 Plus Bluetooth FM Transmitter?

The Magift A30 Plus Bluetooth FM Transmitter is a 3-in-1 car accessory that functions as a MagSafe car mount, Bluetooth FM transmitter, and wireless magnetic charger for iPhones 12 to 16 series, providing hands-free calls and voice navigation.

How much does the Magift A30 Plus Bluetooth FM Transmitter cost?

The Magift A30 Plus Bluetooth FM Transmitter is priced at \$23.99, offering a versatile and affordable solution for Bluetooth connectivity, hands-free calling, and phone mounting in your car.

What special features does the Magift A30 Plus Bluetooth FM Transmitter offer?

The Magift A30 Plus Bluetooth FM Transmitter features hands-free calls, Bluetooth FM transmission, and magnetic charging for iPhones. It supports Siri and Google Assistant, providing an all-in-one solution for your driving experience.

How does the magnetic mount in the Magift A30 Plus work?

The Magift A30 Plus Bluetooth FM Transmitter uses a super-strong magnetic attachment that secures your iPhone to the car mount, ensuring stability during your drive. The shake-proof vent clip adds further stability to the mount.

How does the Magift A30 Plus Bluetooth FM Transmitter improve safety?

The Magift A30 Plus Bluetooth FM Transmitter is designed to be mounted on the air vents, placing it closer to your eye level for easier access, making it safer than other adapters that plug directly into the car's socket. This setup reduces distractions.

Does the Magift A30 Plus Bluetooth FM Transmitter support charging while in use?

the Magift A30 Plus Bluetooth FM Transmitter supports wireless charging via MagSafe for iPhones. It ensures that your phone stays powered while you enjoy music, use navigation, or make hands-free calls.

What kind of audio quality can I expect from the Magift A30 Plus Bluetooth FM Transmitter?

The Magift A30 Plus Bluetooth FM Transmitter offers exceptional audio quality with its dual-microphone system and CVC 8.0 noise reduction technology, ensuring clear and uninterrupted calls even in noisy environments.

How do I control the Magift A30 Plus Bluetooth FM Transmitter while driving?

The Magift A30 Plus Bluetooth FM Transmitter features one-handed control, thanks to its magnetic mount and stable positioning on the air vent, allowing you to manage calls, music, and navigation with ease while driving.

Can the Magift A30 Plus Bluetooth FM Transmitter pair with multiple devices?

The Magift A30 Plus Bluetooth FM Transmitter supports Bluetooth pairing with multiple devices, making it easy to switch between your smartphone and other Bluetooth-enabled devices without hassle.

How is the Magift A30 Plus Bluetooth FM Transmitter powered?

The Magift A30 Plus Bluetooth FM Transmitter is battery-powered and requires a car charger with at least 1A of output, with the recommended outputs being 9V/2A, 12V/1.5A, or 5V/2.1A for optimal charging performance.

Does the Magift A30 Plus Bluetooth FM Transmitter support Android devices?

While the Magift A30 Plus Bluetooth FM Transmitter is designed with iPhone 16 to 12 models in mind, it is also compatible with Android devices that support Bluetooth, allowing you to use the transmitter for music, calls, and navigation.

What accessories are included with the Magift A30 Plus Bluetooth FM Transmitter?

The Magift A30 Plus Bluetooth FM Transmitter comes with metal rings for attaching the device to phones that don't have MagSafe compatibility, ensuring secure mounting and charging across different phone models.

Why isn't my Magift A30 Plus Bluetooth FM Transmitter powering on?

Ensure that the Magift A30 Plus Bluetooth FM Transmitter is properly connected to the car's 12V power outlet (cigarette lighter). If the transmitter still doesn't power on, check if the fuse in your car's power socket is intact or try a different power outlet.

Why is my Magift A30 Plus Bluetooth FM Transmitter not pairing with my phone?

To pair your phone with the Magift A30 Plus Bluetooth FM Transmitter, ensure that the transmitter is in Bluetooth pairing mode. Press and hold the Bluetooth button until the LED flashes rapidly, then select Magift A30 Plus in your phone's Bluetooth settings.

Why can't I hear sound from the Magift A30 Plus Bluetooth FM Transmitter through my car speakers?

If no sound is coming through your car speakers, ensure that the Magift A30 Plus Bluetooth FM Transmitter is tuned to the correct FM frequency. Both the transmitter and your car radio should be set to the same frequency. Also, make sure the volume is turned up on both the transmitter and your car radio.

Why is there static noise when using the Magift A30 Plus Bluetooth FM Transmitter?

Static noise can occur due to FM interference or a weak signal. Try changing the FM frequency on the Magift A30 Plus Bluetooth FM Transmitter and your car radio. Also, ensure that you're in an area with

minimal radio interference from other stations.
