Functions and features

See figure 1 – Icons functions

Product	Item No.	Features	Construction design
CI4 AC	10.805	4CH pushbutton inputs	Installation housing mini (INS UP)

Intended use

PushButton interface with 4 inputs for PushButtons connected to mains voltage potential to control 4 Casambi functions.

- Only approved for dry indoor use
- Mini installation housing for dry interiors for installation or mounting in walls, ceilings or other cavities
- Operation is only allowed on 1 phase

Installation

See figure 2 – Housing dimensions and connections

NOTE – Even if the device has tiny dimensions, a deep installation box (>60 mm) is highly recommended. Depending on which push-button is used, up to 30 mm of the available space must be deducted.

Connections – mains powered

See figure 3 – Block diagram

DANGER – All wiring and pushbuttons must be insulated for maximum supply voltage. Ensure the appropriate contact protection after installation. All pushbuttons of the well-known switch manufacturers are suitable. DO NOT connect mains (L) to COM/1/2/3/4. Ignoring leads to the destruction of the device.

L	Input Voltage 230V AC	1	PushButton input 1

N	Neutral conductor / COM	3	PushButton input 3
		4	PushButton input 4

Initial operation

5.1 Add to a Casambi network

See figure 4 – Screenshot „Add to my network“ First you need to add the device to a Casambi network. Therefore the following steps are required:

1. Open the Casambi app and select a network
2. Click on devices nearby
3. Add found CI4 AC to a network

5.2 PushButton configuration in Casambi

See figure 5 – Screenshot „Configure switches (pushbuttons)“ As soon as the device is added into a Casambi network, the buttons can be configured with functions. Therefore the following steps are required:

1. Open Casambi App and click on „... More“
2. Open item „Switches“
3. Select CI4 AC
4. Now you can link the buttons with functions
