

manuals.plus

Search

manuals.plus is a collection of user manuals, instruction guides, data-sheets, and specifications for electronics products. We are adding new manuals to our collection daily, making an easily searchable database of electronics resources.

Typically, reference sheets for devices contain specifications, reset instructions, and basic usage help. Some instructions expand on this further to provide repair and maintenance tips, others may be a reduced set of 'quick start tips' – essential things you need to know to get up and running with a device.

User manuals are traditionally provided in a PDF format, but this format can be difficult to use on a mobile device or with a low-bandwidth connection. Manuals.plus tediously transcribes many of these PDF documents into regular web-pages so that users can better read them on their device of choice. This makes many documents more screen-reader accessible and searchable vs the traditional format. In addition to the transcribed post, you will also find a link to the original file at the bottom of each post under 'references' – these can be downloaded for later and opened with your favorite web-browser or PDF viewer such as Adobe Acrobat.
