## Product Description

Maono PD400X USB/XLR dynamic microphone offers great convenience to users who need to use it on a PC/Mac or on traditional audio equipment. The dual outputs design saves investment in gears for podcasters, streamers and other creators who prefers flexible setups. PD400x has a classic broadcast microphone look and feel, but it is packed with state-of-the-art audio technologies that supercharge the content-creating experiences. The unique 3-in-1 smart knob offers controls on microphone gain, headphone volume, and monitor mix, delivering a simple and intuitive user experience. More advanced audio processing features are available in PC/Mac Maono Link software. Software and firmware updates will bring new features and enhanced performance.

## Product Features

- Cardioid polar pattern
- Monitor mix control
- Headphone volume control
- High sensitivity
- Companion software
- Mic gain control
