Master Airbrush SYNCHKG044368 Multi-Purpose Airbrushing System Kit

Launch Date: November 20, 2023

Price: \$79.99

Introduction

The Master Airbrush SYNCHKG044368 Multi-Purpose Airbrushing System Kit is an easy-to-use airbrush set that can be used for many things, such as fine art, car touch-ups, cake decorating, and more. It comes with the powerful G22 Dual-Action Airbrush, which has a 0.3mm fluid tip and makes it easy to create detailed patterns and smooth finishes. When used with the Master Airbrush C16-B Mini Compressor, this kit gives you reliable, steady airflow with pressure sets that you can change. Because it is small and light, it's great for both new and experienced artists who need a portable airbrushing answer for their projects. With its gravity-feed fluid cup and ergonomic form, the airbrush makes it easier to control the flow of paint for fine work. You can work without being interrupted because it's quiet and simple to use, whether you're at home, in a workshop, or on the go. This kit is great for people who want to try airbrushing because it comes with a lot of different tools and is easy to set up.

Specifications

Feature	Details
Brand	Master Airbrush
Voltage	110 Volts, 12 Volts
Recommended Uses	Spraying
Power Source	Corded Electric
Noise Level	65 dB
Special Features	Portable, Lightweight
Included Components	User Manual, Nozzles
Item Weight	2.84 Pounds
Maximum Power	0.25 Horsepower
Color	Black
Material	Metal
Style	Portable
Air Flow Capacity	10.5 LPM
Motor Horsepower	0.25 Horsepower
Compatible Hose Diameter	0.13 Inches
Model Name	G22
Hose Length	6 Feet
Manufacturer	Master Airbrush
UPC	803614047535, 848849073621
Package Dimensions	9.17 x 8.43 x 4.96 inches
Item Model Number	SYNCHKG044368
Is Discontinued	No

HOW-TO
GUIDE

6 FT
AIR HOSE

- Master Airbrush Dual-Action Gravity Feed Airbrush (0.3 mm nozzle).
- High-performance mini air compressor with adjustable pressure control.
- 6-foot braided air hose.
- 1/3 oz. gravity fluid cup.
- Airbrush holder for convenience.
- Instruction manual.
- Free How-To-Airbrush guide booklet.

Features

1. Airbrush with two actions

- Users can get precise control over the Model G22 Dual-Action Gravity Feed Airbrush by controlling both the airflow and the paint flow at the same time.

MASTER
PERFORMANCE
MULTI-PURPOSE

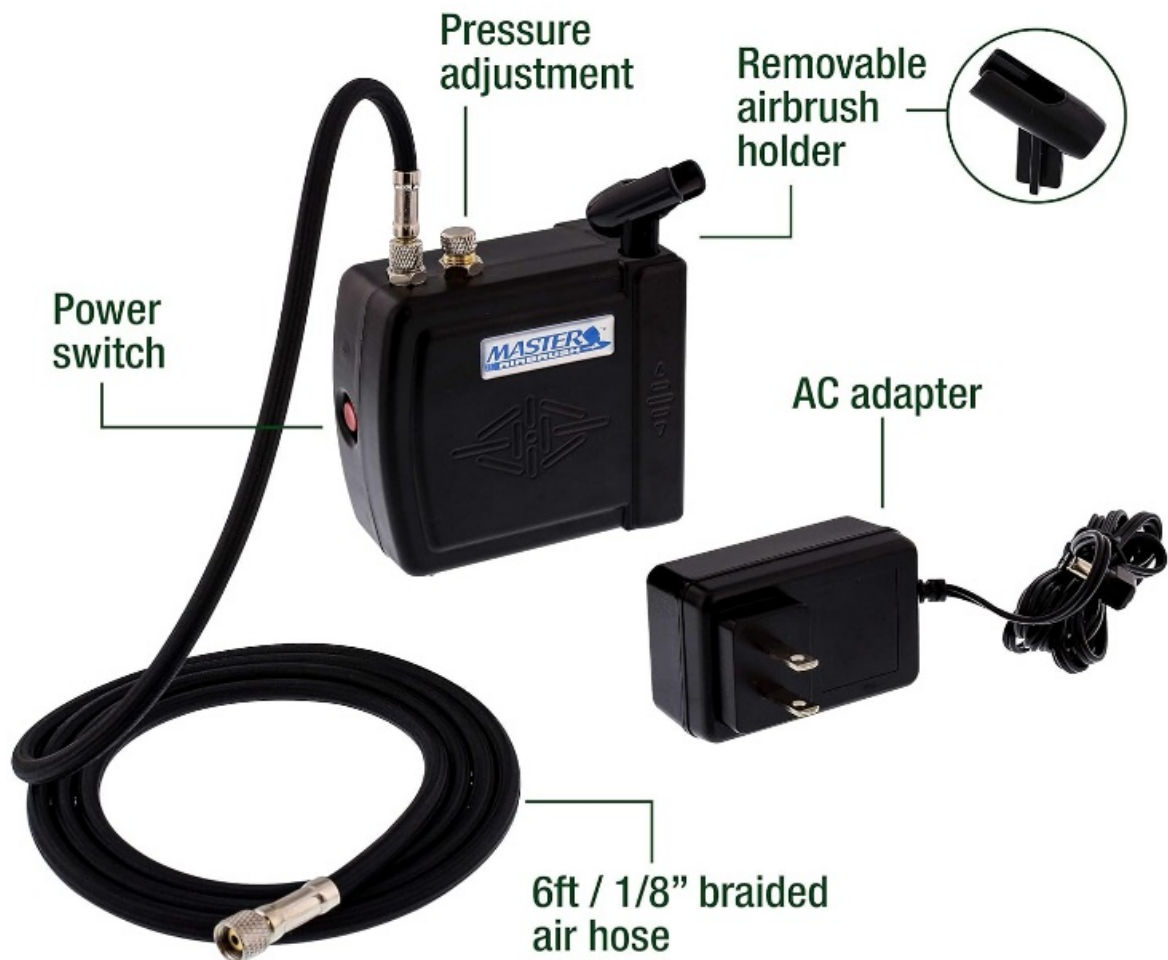

MODEL G22

0.3 mm Fluid Tip Set

- It has a 1/3 oz. gravity fluid cup and a 0.3 mm fluid tip, so it's easy to use for both smooth and detailed patterns.
- You can make fine lines as thin as 1-1½ inches with this airbrush, which is great for both small and big projects.
- It works with a lot of different paint spray media, from thinned-out low-viscosity inks to high-viscosity paints.

2. Mini compressor with a lot of power (Model C16-B)

- The C16-B Black Mini Air Compressor is small, easy to carry, and made to be useful.
- Automatically turns on and off: stops when the airbrush trigger is let go (at 25 PSI) and starts up again when the trigger is pressed (15 PSI).
- Offers constant “air-on-demand” performance for easy use.
- The airbrush stays safe when it’s not in use thanks to a built-in stand.
- It gives off a maximum of 25 PSI of air pressure, which makes sure that air flows smoothly for many projects.

3. Easy to carry and light

- The compressor’s lightweight (less than 2 pounds) makes them easy to move around and store.
- Its small size (2" H x 4.25" W x 4.25" L) makes it easy to store in workshops or take with you when you travel.

4. Used in Many Situations

This method can be used for many different types of airbrushing tasks, such as:

- **Crafts and hobbies:** Great for painting models and other art projects.
- **Automotive Graphics:** Detail your car like a pro with these graphics.
- **Decorating a cake:** Use paints that are safe for food to make works of art that you can eat.
- **Temporary Tattoos:** It’s easy to make complicated body art.
- **Art on the nails:** For salon-quality results, add detailed images to your nails.
- **Fine art:** best for experienced artists who need exact and flexible tools.

5. Operation in silence

Low noise levels mean that there is little disturbance. It’s great for use at home, in a studio, or in the school.

6. Built to last

- Made with good materials to make sure it works well for a long time.

- The spray and compressor are built to last and keep working perfectly even after regular use.

7. Design that's easy for beginners

- The kit comes with a How-To-Airbrush Manual & Guide Booklet that makes setting up easier and teaches basic airbrushing skills to newbies.
- It's great for both new and experienced users, so it can be used as both a starting kit and a professional system.

8. Master System for Performance

- It has a three-part head system that is perfectly matched. The needle cap, the nozzle cap, and the fluid tip make up this system.
- The ergonomic shape of the trigger makes it easy to use for long periods.
- It works with many spray and color media, such as low-viscosity paints and high-viscosity materials.

9. Connectivity and add-ons

- It comes with a braided 6-foot airline with 1/8" BSP fittings so that you can connect the airbrush and compressor reliably and flexibly.
- Extra airbrush holder that can be taken off for extra convenience while using.

10. Feel free to buy

Backed by the well-known Master Airbrush name, it guarantees a smooth experience and consistent results every time.

Usage

Setup:

- Connect the airbrush to the compressor using the braided air hose.
- Fill the airbrush's gravity cup with the desired paint or medium.
- Adjust the compressor pressure to the recommended level based on your application.

Operation:

- Press down the trigger for airflow and pull back for paint flow.
- Use light and steady movements to achieve even coating or detailing.

Post-Use Cleaning:

- Empty the paint cup and rinse with an appropriate cleaning solution.
- Clean the nozzle and needle to avoid clogs and ensure smooth operation.

Care and Maintenance

1. **Regular Cleaning:** Always clean the airbrush after each use to prevent residue buildup.
2. **Lubrication:** Periodically lubricate the needle and other moving parts for smooth performance.
3. **Check Air Hose:** Inspect the hose for cracks or leaks and replace it if needed.
4. **Storage:** Store the airbrush and compressor in a cool, dry place to protect it from moisture.
5. **Avoid Overheating:** Do not run the compressor for extended periods to prevent overheating.

Troubleshooting

Problem	Possible Cause	Solution
Airbrush not spraying paint	Clogged nozzle or dried paint	Clean the nozzle with the provided cleaning tools or a cleaning solution.
Uneven paint flow	Incorrect pressure or clogged needle	Adjust the pressure and clean the needle thoroughly.
Compressor not starting	Power cord not connected or overheated unit	Check the power connection or allow the compressor to cool before restarting.
Air leaks from the hose	Damaged or loose air hose connection	Replace the hose or tighten the connections securely.
Paint splattering	Incorrect thinning of paint	Use the proper paint-to-thinner ratio for smooth application.

Pros and Cons

Pros	Cons
Portable and lightweight	Requires careful maintenance
Dual-action feature allows precise control	Initial learning curve for beginners
Versatile for multiple applications	May need additional accessories for some uses

Warranty

The Master Airbrush SYNCHKG044368 comes with a limited warranty covering manufacturing defects. Please refer to the warranty policy included in your purchase for detailed information.

FAQs

<p>What is the Master Airbrush SYNCHKG044368 Multi-Purpose Airbrushing System Kit designed for?</p> <p>The Master Airbrush SYNCHKG044368 kit is designed for various airbrushing applications such as fine art, automotive touch-ups, cake decorating, temporary tattoos, and more.</p>
