The function of above will be specifically explained later.

How to use Lightning/Type-C receiver

First: Plug the Lightning or Type-C receiver into the Lightning or Type-C port of mobile phone, the green light of receiver flashes quickly.

Green light always on
Second: Single press the power button of mic, it is turned on successfully when green light is on.

Green light on ------- Power button
**Last:** Green light of receiver always stays on, and then the microphone works when opening phone camera to make a video recording or opening live streaming Apps to make a Live show.

------- Green light flashes quickly -------
Special Notes:

For the number @, if the mobile phone is in low battery during live streaming, the external power supply directly charges the mobile phone through the Type-C port of the receiver.
How to use 3.5mm receiver

Step 1: Insert the 3.5mm receiver into the corresponding port of the device, then press the power button on the receiver. Once done, the green light will start flashing.

Green light flashes
Step 2: Press the power button of the microphone to turn it on, and the green light will start flash. Then the microphone will automatically pair with the receiver, and the green light will stay on to indicate a successful pairing.

Green light on
Power button

Step 3: Turn on the device, the microphone will work directly.

About UI
