	Back: 13 megapixels
Battery	3300 mAh
Outline dimension	155.5*73.4*8.95mm
Main screen parameters	15.4 cm(6.1" IPS)

Warning

- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules and Industry Canada license-exempt RSS standard (s). Operation is subject to the following two conditions:
 (1) this device may not cause interference
 (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee taht interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet and a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- SAR** tests are conducted using standard operating positions accepted by the **FCC/ISED** with the device transmitting at its highest certified power level in all tested frequency bands, although the **SAR** is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.
 - Before a new device is available for sale to the public, it must be tested and certified to the **FCC/ISED** that it

does not exceed the exposure limit established by the **FCC/ISED**C, Tests for each device are performed in positions and locations as required by the **FCC/ISED**C.

- 3. For body-worn operation, this device has been tested and meets the **FCC/ISED**C RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1 cm from the body.
- 4. Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
