TTLock App settings

Please download the TTLock from Apple store or Google play. Also you can scan the QR code below to download the App directly.

Register

Please register an account with your Email or mobile number.

Sign up and register with mobile or Email

A screenshot of a mobile application's registration screen. The screen has a blue header with a back arrow and the word "Register". Below the header are two tabs: "Email" (selected) and "Phone". The form includes a "Country/Region" dropdown, an "Enter your Email" input field, a "Password" input field, and a "Confirm Password" input field. Below these is a text requirement: "Your password must have 8-20 characters, and include a minimum of two types of numbers, letters and symbols". There is a "Verification Code" input field and a "Get Code" button. At the bottom is a large "Register" button. At the very bottom, there is a checkbox labeled "I've read and agreed User Terms" and a link to "Privacy Policy".

Enter mobile or Email Login with right password

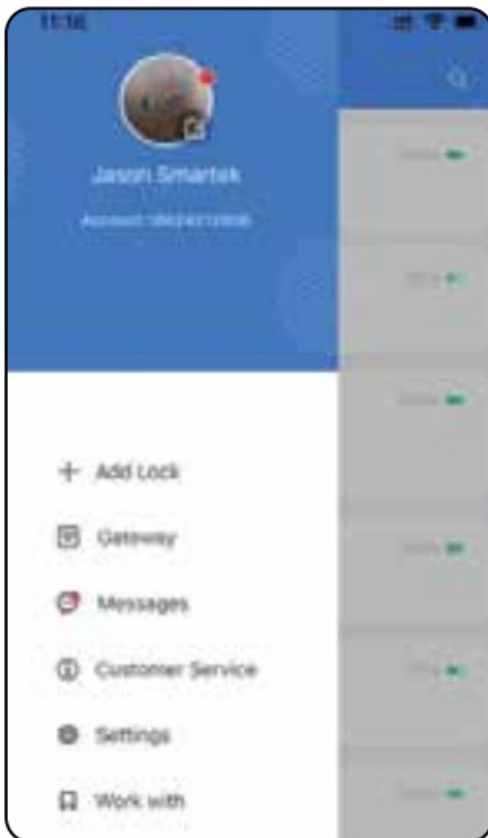

You can reset your password

Enrol eKeys

Under the lock setting, you can click the option "**eKeys**" and issue an eKey to other users. There is permanent /timed and recurring eKeys for different requirements.

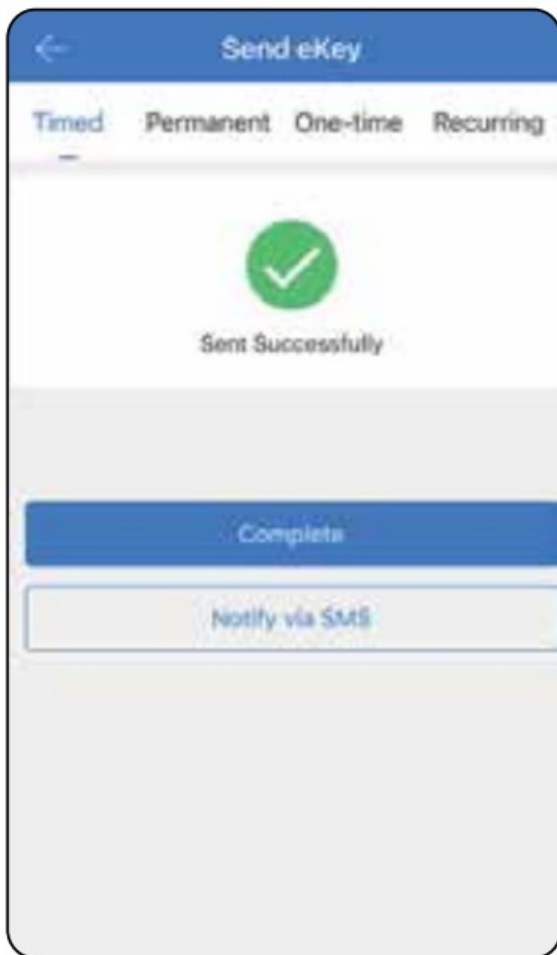

1. Send eKey

2. Choose timed type

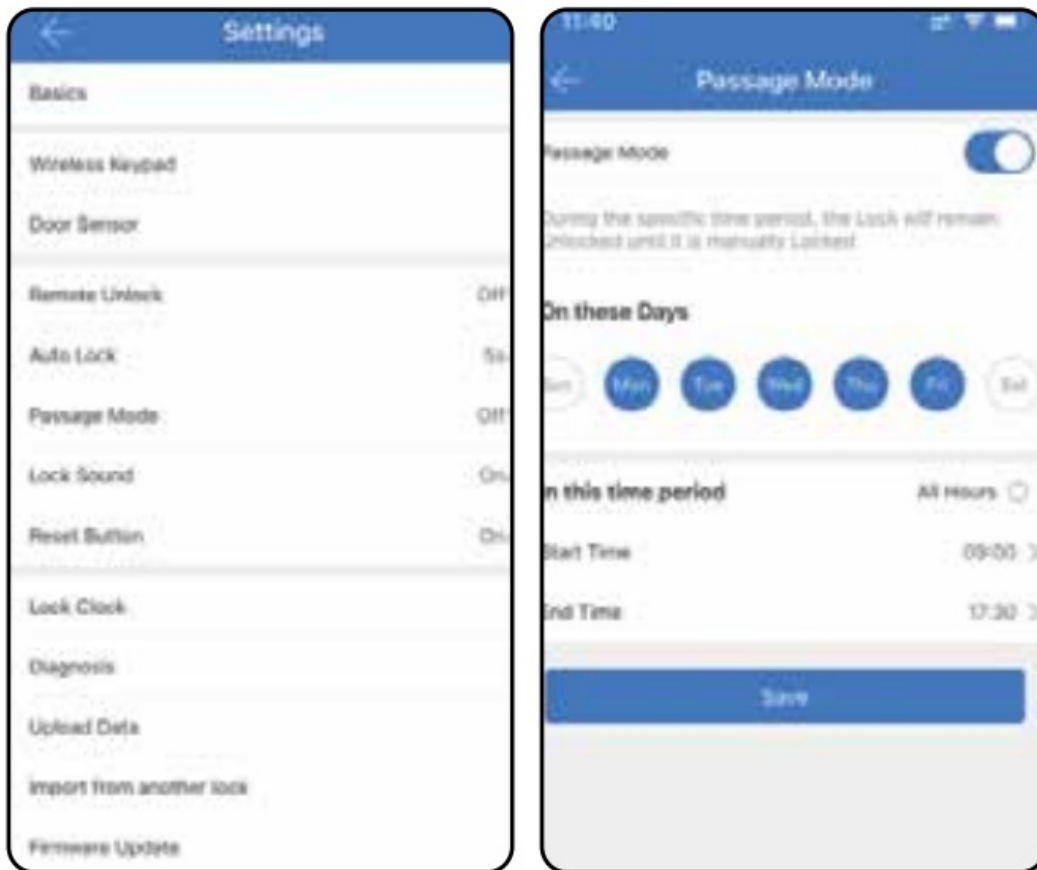

A screenshot of a mobile application interface for sending an eKey. The top blue header bar contains a back arrow, the text 'Send eKey', and a 'Reset' button. Below the header, there are four tabs: 'Timed' (which is selected and highlighted in blue), 'Permanent', 'One-time', and 'Recurring'. The form consists of several input fields: 'Recipient' with the value '13924939063' and an information icon; 'Name' with the value 'Mr S'; 'Start Time' with the value '2023-05-24 11:30'; and 'End Time' with the value '2023-07-24 11:30'. Below these fields, there is a light gray box containing the text: 'Recipients are able to use the eKeys for unlimited times within the validity period.' At the bottom of the form is a large blue button labeled 'Send'. Below the button, the text 'Send multiple ekeys' is visible in a smaller, lighter blue font.

3. Complete, you can share with SMS to recipient

Passage mode

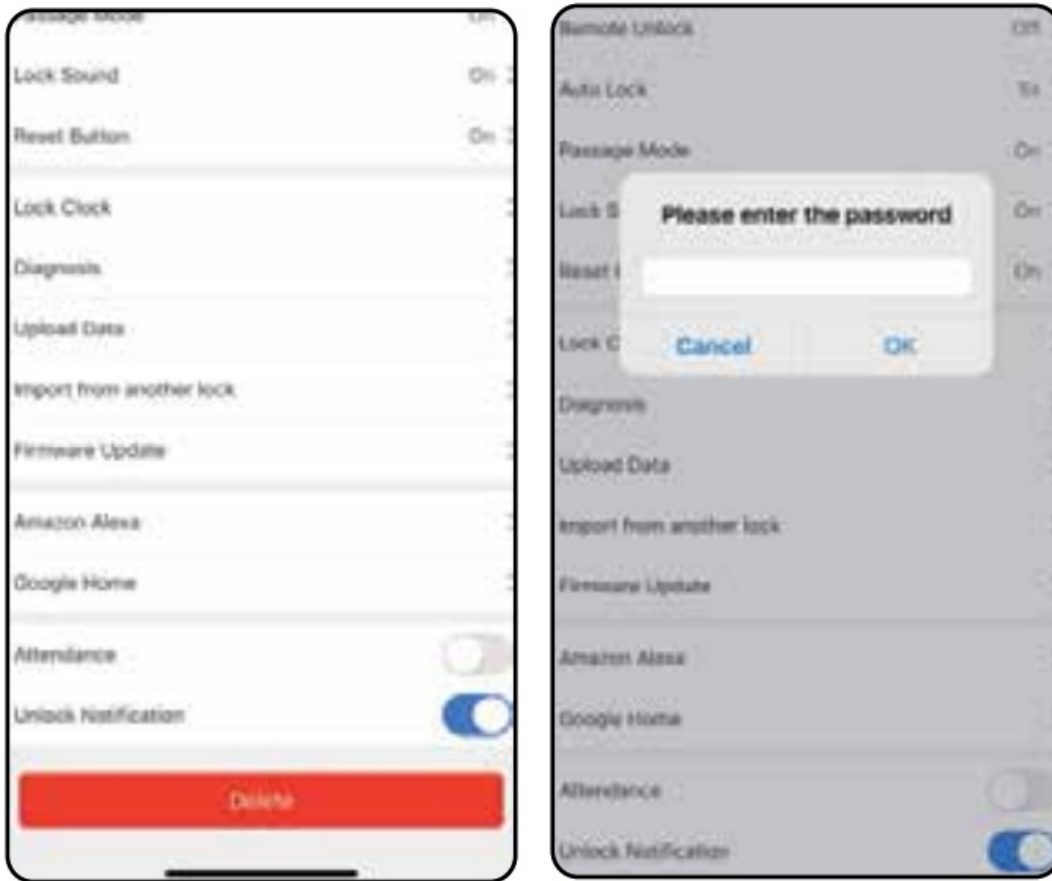

Under the lock setting, you can tick "**Passage mode**", under this setting the KEYSAFE will be in always open state, you can disable the passage mode in the App.

Reset Keysafe

In settings you can factory reset the KEYSAFE by clicking the red “**delete**” button.

When prompted for your password this is the password that was set for the TTLock App not the KEYSAFE. If successful the default pin code of 123456 will be reinstated and all previous settings and users deleted.

Remote unlock function (requires Gateway)

The Wi-Fi gateway is required to enable the remote unlock function, please refer the parameters below:

Model: G2

Dimension: 70x70x26mm

Network: Wi-Fi 2.4G

IEEE Standard: 802.11b/g/n

Power Interface: Type-C USB

Power Input: DC5v/500mA

Light Status

When the gateway is power on:

● ↔ ● Light flashes alternately with red and blue; Stand by mode, ready for connection.

● **Blue light:** working mode

● **Red light:** network failure

Pair the Gateway with App

1. Activate the App on mobile

2. . Press the button “”

3. Select the [Gateway]

4. Select [G2]

5. Connect the Gateway to power, when the light flashes red and blue alternately

6. Press the “+”

7. Add Gateway

8. Select WiFi and enter password

9. Finish paring gateway

Note: If Gateway times out disconnect and reconnect power and retry process.

Remote unlock

Turn on remote unlock function In the lock settings tab as per below photo.

To remote lock and unlock you then use the small blue round symbol next to the large padlock.

Troubleshooting Faq

Can I use my fingerprint upon first powering the KEYSAFE?

After finishing installation and powering the KEYSAFE for the first time it will accept any

fingerprint to unlock the KEYSAFE until you configure the safe with the TTLock App.

What kind of battery is required?

The KEYSAFE is recommended to be powered with 4 x AAA Alkaline batteries of good quality

Does the KEYSAFE auto lock?

The KEYSAFE will auto re-lock after 5 seconds, closing the front panel after this time will lock the KEYSAFE.

I wish to give the KEYSAFE to my friend, how can they add the device with their mobile?

You need to remove the KEYSAFE from your TTLock App by clicking the red “Delete” tab in settings or factory reset using the instructions on the next page.

Is it possible to remotely unlock my door?

Yes it is however you must ensure the KEYSAFE is connected to a recognised Gateway.

The batteries have gone flat in my KEYSAFE, what can I do?

Insert the override key in the cylinder and turn or connect a power bank via the USB-C slot for an emergency open.

- **A:** Remove the silicone plug.
- **B:** Insert the key into the keyhole and turn it clockwise.
- **C:** Pull to open the shell to unlock.
