⚠Do not use the equipment under thunder storm weather;

⚠Do not place the device in the water for a long time;

⚠Do not expose the equipment to the sun for a long time.

Trouble Shooting

The device does not respond to charging or connecting to the PC
Usually, use a USB cable to connect the player to the computer, the top of the player will appear with an icon P on the top of the screen.
And an MTP device named MECHEN H1 will appear in the drive list of your computer.

Troubleshooting:

- Check whether it is caused by poor contact.
- Check whether the USB port is damaged.
- Check if the USB cable is damaged.
- You can also try to use the USB cable to connect to other devices.
  If there is also no response, it means also that the USB cable has been damaged. Please contact after-sales support for a replacement or refund.

The SD card is not working properly.
Please try:

- Re-insert it into the MECHEN H1 player.
- Check the SD card for physical damage.
- Check if the SD card is FAT32 or EXFAT. (only FAT32 format is perfectly supported)
- Restart the MECHEN H1 or factory reset.
- Make sure that the SD card's metal teeth are clean.
- Make sure that the SD card has sufficient free storage for your needs.
  If you still run into any issues, e-mail us with a video or photo showing them.
