Melodics Impact GX Mini MIDI Controller Keyboard Instructions

Melodics Impact GX Mini MIDI Controller Keyboard

Contents

Introduction

Melodics is a critically acclaimed music teaching tool that helps put you in control – Melodics will:

- Give you instant feedback on your timing & accuracy.
- Break down relevant theory and brand new techniques step by step.
- Build your musical expertise, with lessons for all skill levels across great genres.

Melodics syncs with your Nektar keyboard, allowing you to plug and play straight away!

This manual will guide you through using the additional controls on your Nektar controller for easy navigation, so you can practice Melodics without leaving your keyboard.

Play, pause, restart, select, plus many more transport controls right at your fingertips. See pages 3-5 for more information on using these controls.
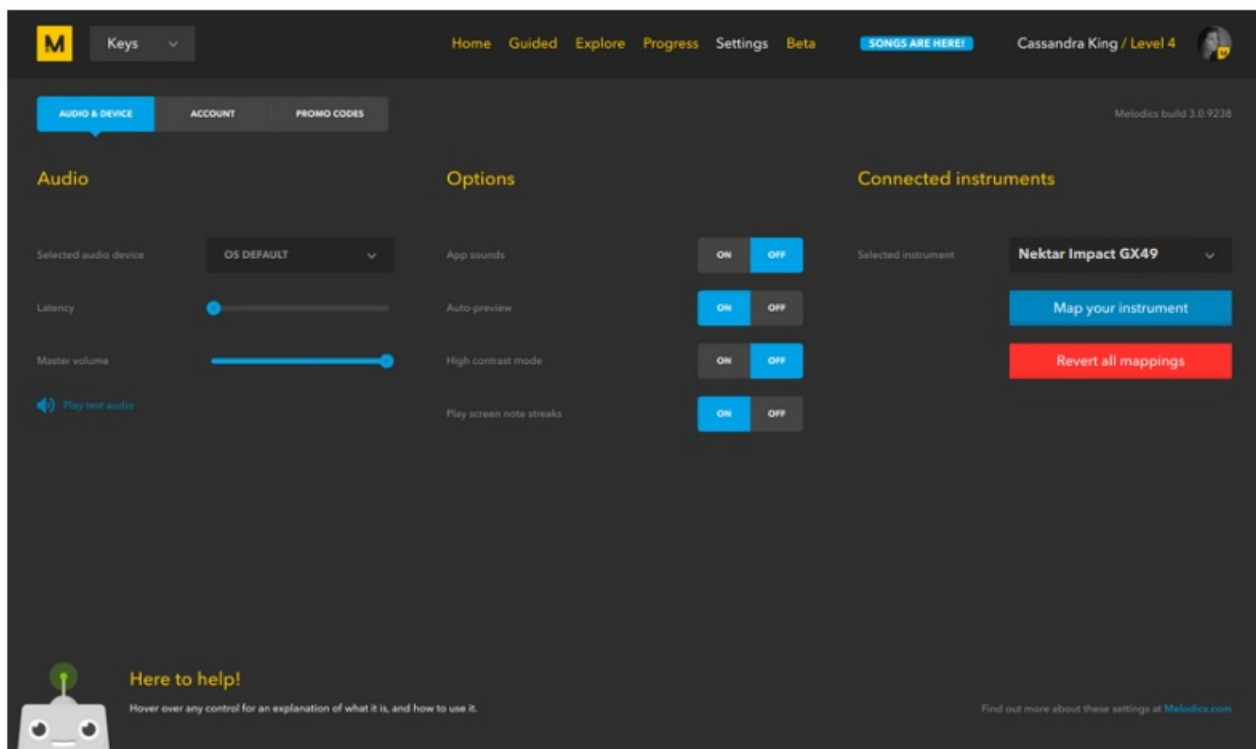

Initial Setup

Step 1

Melodics is free to download! Install the latest version of **Melodics for your desktop**.
Or visit the App Store to **download for iPad**.

Step 2

Plug your Nektar controller into your computer or iPad via a USB connection.
Your device will be available in the 'Selected Instrument' dropdown menu in the Settings screen.

Important note if your devices isn't recognised:

We recommend closing other software (such as MIDI monitors or DAWs) while using Melodics – this will allow Melodics to have exclusive control over your instrument.

If you're having trouble getting connected, reach out to our friendly support team for assistance (**support@melodics.com**)

Transport Controls

Navigating the Lesson menu

When SHIFT is pressed, the button turns BLUE and these controls will work as follows:
