## MERCUSYS ME30 Range Extender

For technical support, the user guide and more information, please visit **http://www.mercusys.com/en/support**

1. **Power on**

   Plug the extender into a power outlet near your router, and the Signal LED turns solid red.
2. **Connect to the extender**

   Connect your wireless device to the extender's network MERCUSYS_RE_XXXX.

   **Note:** The default SSID (network name) is printed on the product label at the back of the extender.
3. **Configure**
   - Launch a web browser and enter **http://mwlogin.net**

     Create a password for future login attempts.
   - Select your router's host network and enter the network password when prompted.
   - Check the Signal LED on your extender. Green or orange LED indicates a successful connection.
4. **Relocate**

   To achieve better signal quality, plug in the extender halfway between your router and the Wi-Fi dead zone.

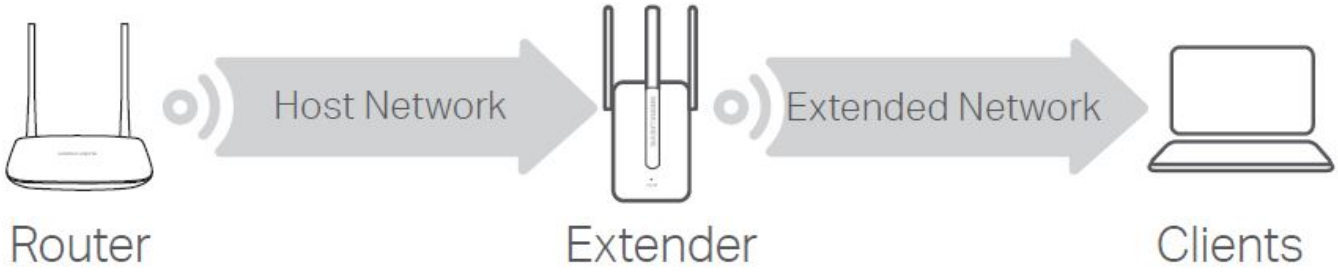

Image may differ from actual product.

**Enjoy!**
Connect your device to the extender using the extended SSID. The default Wi-Fi password is the same as your host network.

## LED Explanation

**(For Range Extender Mode)**

**Off** Power is off.
**Blinking** The extender is starting or connecting to the host network.
**Solid Red** The extender is not connected to the host network.
**Solid Green** The extender is connected to the host network band works well.
**Solid Orange** The extender is connected to the host network, but is too far away from the router.

## FAQ (Frequently Asked Questions)

**Q1 How do I configure the extender using WPS?**

- Plug the extender into a power outlet near your router, and wait until the Signal LED is lit and solid red.
- Press the WPS button on your router.
- Within 2 minutes, press the WPS or RESET/WPS button on the extender. The LED should change from blinking to a solid state, indicating a successful WPS connection.

**Q2 How do I reset the extender?**
With the extender powered on, press and hold the Reset or RESET/WPS button until the Signal LED turns off, then release the button. When the Signal LED turns solid on, the
reset process is complete.

**Q3 What should I do if I cannot access the extender's web management page?**

- Make sure your wireless device is connected to the extended network using the extended SSID.
- Verify that **http://mwlogin.net** is correctly entered in the web browser.
- If you are using a computer, make sure it is set to obtain an

**IP address automatically.**
Refer to Q2 to reset the extender and try again.
