Metaframe PF100 Digital Photo Frame

Product Information

The Cloud Photo Frame, also known as Metaframe, is a digital photo frame that allows you to display and share your photos and videos wirelessly. It comes with a user-friendly mobile app that enables easy management and control of the frame.

Product Quick Start

1. **Photo frame activation:** To set up the photo frame for the first time, follow these steps:

- Secure the frame for support and connect it to a power supply (the frame will turn on automatically).
- Follow the activation wizard to select the language of the photo frame.
- Connect the photo frame to the Internet via the wireless network settings.
- If a new version of the Metaframe software is available, it is recommended to complete the software upgrade immediately.
- After completing the wizard, you will receive the FrameID and Frame Email for the frame.

2. **Register an account and add a photo frame:**

- Download the Metaframe app from Google Play or App Store and sign up for a new account using your email address.
- Login with your new account and click on “Add Photo Frame” as prompted.
- In the “Add Frame” window, fill in the FrameID and name for the frame.
- Click “Send” to share selected photos to the photo frame. You can also preview and filter the photos before sending.

3. Share photos to frames via Email:

- Each frame has a unique Frame Email. You can send photos to this email address for the frame to receive them.
- There is no limit to the number of photos you can share via email, but the maximum size is 30MB. Videos cannot be shared to the photo frame.

4. Invite friends to share photos:

- You can share the photo frame with your family and friends in various ways:
 - Send the FrameID to a friend.
 - Send Frame Email to a friend.
 - Click “Invite Friends” in the Metaframe app and enter your friend’s email address to send an invitation.
 - Click “Invite Friends” in the Metaframe app and send the invitation link to your friends via social media programs.

5. **Special Note:** Recommended wireless network connection for photo frames:

- To access all the features of Metaframe, it is recommended to connect your photo frame to a wireless network.

Share a Photo

To share a photo from the Metaframe app:

1. Open the Metaframe app and go to the “Gallery” tab.

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
